As part of a larger Army Research Institute effort to survey, synthesize, and evaluate the state of the art in the area of human factors as applied to software development, a fairly extensive literature survey was conducted. This resulting bibliography contains citations of 478 articles or reports pertaining to the behavioral aspects of software design, programming, coding, debugging, testing. evaluation, and maintenance. Most citations are accompanied by descriptive abstracts, and all are indexed by author, publication (continued)

Unclassified

The Human Factors Technical Area is concerned with the human resource demands of increasingly complex battlefield systems used to acquire, transmit, process, disseminate, and utilize information. Research in this area is focused on human performance and interactions within command and control centers, as well as issues of system development. It is concerned with such areas as topographic products and procedures, tactical symbology, user-oriented systems, information management, staff operations and procedures, and sensor systems integration and utilization.

One area of special interest involves the development of computer software to support battlefield automated systems. Software development is a human process which is costly, inaccurate, and not well understood. The present report provides an extensive compilation of literature in the area of human factors aspects of software development; it was developed as a source document supporting human factors research in this area. This report is a part of a larger effort to develop a conceptualization of the programming process as a basis for identification and resolution of behavioral bottlenecks in software development. Efforts in this area are directed at improving accuracy and productivity in programming through the design of procedures, methods, and job aids to enhance programmer performance.

Research concerned with human factors in software development is conducted as an in-house effort augmented contractually by organizations selected as having unique capabilities and facilities. present research was conducted in collaboration with personnel from Science Applications, Inc., under contract DAHC 19-76-C-0040. effort is responsive to requirements of Army Project 20762725A778, and to general requirements expressed by members of the Integrated Software Research and Development Working Group (ISRAD).

INTRODUCTION

The development of software for computer systems is a little-understood, labor-intensive activity. Computer software is developed by people, by systems analysts, software designers, and programmers, yet little is known about the individual and group processes whereby software is produced. The study of human factors in software production is a relatively new area to both psychologists and computer scientists; research investigating human performance in programming tasks has been published in widely scattered journals of psychology and computer science, books, and technical reports.

This bibliography was compiled to bring together in a single reference document literature from many sources related to behavioral aspects of the software development process. It is intended to provide an information source for psychologists, computer scientists, and other persons interested in the human factors of software production.

SCOPE OF THE BIBLIOGRAPHY

CIVACATA CONTRACTOR CO

Software development, for the purpose of this bibliography, encompasses all phases of the process, including requirements analysis, software design, programming, coding, debugging testing, evaluation, and maintenance. The literature of concern deals with the processes of software development, including human performance in software design and programming tasks as well as with the human factors aspects of the tools and programming languages used by software developers. Literature dealing with the selection, training, and management of computer personnel is also included. However, papers dealing with software development, but lacking clear human factors results or discussion have been excluded. The bibliography provides comprehensive, although not exhaustive, coverage of the literature in the field through the end of 1977. Some articles have been included which were published in 1978.

The bibliography is supplemented by four reference lists which appear at the front of the document. In general, items on these reference lists are not cited in the bibliography. For the user of this bibliography who is new to human factors in software development, the first two lists provide a core of references to acquaint the user with software engineering and with related human factors research. The third reference list consists of the fifteen-volume Structured Programming Series. These reports, prepared by IBM for the Army and Air Force, provide background information and standards for the implementation of structured programming methodology using high order languages. Finally, the references to the DoD software program trace the development of the High Order Language Program and the Defense System Software Management Program.

ORGANIZATION OF THE BIBLIOGRAPHY

HOLD BELLEVIEW BELLEVIEW BELLEVIEW BELLEVIEW BELLEVIEW BELLEVIEW AND BELLEVIEW BELLEVI

This bibliography consists of three parts: the four supplemental reference lists, the 478 literature citations and abstracts, and the literature indexes.

A typical bibliographic entry is shown in Figure 1, which identifies the components of the entry. The citation format follows the standards of the Publication Manual of the American Psychological Association (Second Edition) with one exception: both month and year of publication may be noted to make the document easier to locate. Where the same article appeared in multiple sources, the source thought to be more readily available (such as a journal article rather than company technical report) is generally given first.

The majority of the entires include an abstract. Where the abstract was unavailable but the document warranted inclusion, the citation appears without the abstract. Many different abstract styles and formats may be noted by the user of this bibliography; where available, author abstracts were used with no changes made, noted with "(A)" following the abstract. If the abstract appeared with the original document but was written by someone other than the author, it is noted by "(0)" after the abstract. Abstracts written by the bibliography authors are noted with their initials.

Four different classes of indexes are provided for the documents included in this bibliography: an author index, three document source indexes, an institutional affiliation index, and a subject index. The indexes direct the user to citations by document number, not by page number. The document source index consists of three groups, journals, proceedings, and agencies. Most documents within the bibliography are indexed by only one or two subject terms. Some index terms are admittedly broad, but the user is referred to additional index categories which are related.

ABRAMS, P.S. PROGRAM WRITING, REWRITING, AND STYLE. IN P. GJERLOV, H.J. HELMS, R.J. NIELSEN (EDS.), APL CONGRESS 73: PROCEFDINGS OF THE APL CONGRESS 73. NEW YORK: AMERICAN ELSEVIER PUBLISHING CO., 1973, 1-8. DESCRIPTION:

the state of the s

THIS PAPER DISCUSSES THE PROCESSES AND PROBLEMS OF WRITING AND ESPECIALLY OF PEWRITING PROGRAMS. REWRITING IS DEFINED AS DERIVING A NEW PROGRAM USING THE SAME ALGORITHM AS THE ORIGINAL. THERE ARE SEVERAL REASONS FOR REWRITING A PROGRAM -- TO ATTEMPT TO OPTIMIZE IT, TO SIMPLIFY IT, OR TO PUT IT IN A FORM THAT IS EASIER TO UNDERSTAND. THIS PAPER TRACES THE EVOLUTION OF A PROGRAM THROUGH SEVERAL REWRITING STEPS. FOR THE MOST PART, THESE REFINEMENTS ARE BASED ON A FORMAL ANALYSIS OF THE PROGRAM TEXT, ALTHOUGH KNOWLEDGE OF THE SPECIFIC PROBLEM AND THE BEHAVIOR OF THE ALGORITHM ARE ALSO USED AT SEVERAL POINTS. (PEA) BP, 4R.

TIME-SHARING VERSUS BATCH PROCESSING

ADA4S, J., & COHEN, L. TIME-SHARING VS. INSTANT BATCH PROCESSING: AN EXPERIMENT
IN PROGRAMMER TRAINING. COMPUTERS AND AUTOMATION, MARCH 1969, 18(3), 30-34.

DESCRIPTION:

EIGHT STUDENT PROGRAMMERS STUDIED FORTRAN FOR TWO WEEKS, ONE WEEK USING A CRT-BASED TIME-SHARING SYSTEM AND GNE WEEK USING "INSTART BATCH", IN A COUNTERBALANCED REPEATED-MEASURES DESIGN. BECAUSE OF LARGE INDIVIOUAL DIFFERENCES, NO SIGNIFICANT DIFFERENCES IN OBJECTIVE MEASURES WERE DETECTED. IN QUESTIONNAIRE RESULTS, HOWEVER, THE STUDENTS INDICATED A STRON PREFERENCE FOR THE BATCH MODE. GIVEN A CHOICE, ALL STUDENTS USED THE PATCH SYSTEM FOR THE REMAINDER OF THE SUMMER. (HRR) 5P, 5R.

DERUGGING
AKIYAMA, F. AN EXAMPLE OF SOFTWARE SYSTEM DEBUGGING. PROCEEDINGS BY THE IFIP CONGRESS, 1971, 353-359.
DESCRIPTION:

IN THE SOFTWARE DEVELOPMENT PROCESS, THE PROGRAMMING AND DEBUGGING STAGE OF A PROGRAM COMES LAST, I.E., IMMEDIATELY DEFORE DELIVERY, AND THE NUMBER OF SUGS TO BE FOUND THEN IS QUITE UNPREDICTABLE BEFOREHAND. THIS IS THE REASON WHY THE PLANNED PROCESS IS DISTURBED AND THE DELIVERY TIME DELAYED IN SO MANY CASES. IN OPDER TO AVOID THE DELAY IN SCHEDULE, IT IS NECESSARY TO PREDICT QUANTITATIVELY THE NUMBER OF FUGS AND, ALSO, THE MANYOURS RECESSARY FOR DEBUGGING. THE NUMBER OF FUGS MAY BE ESTIMATED PASED ON THE NATURE OF A PROGRAM. HENCE, BY CAREFULLY STUDYING A GENERAL FLOW CHIRT DURING THE DETAILED DESIGNING OF SOFTWARE, WE CAN PREDICT THE NUMBER OF BUGS IN THE SYSIEM, AND DECIDE ON THE NUMBER OF CHECK POINTS TO BE MADE DURING THE PROCESS AND, CONSEQUENTLY, THE MANHOURS NECESSARY. (A) 7P, 'R.

PROGRAMING LANGUAGES
ALEXANDER, W.G. HOW & PROGRAMMING LANGUAGE IS USED (TECHNICAL REPORT (SRG-1C).
TORONTO, ONTAKIO, CANADA: UNIVERSITY OF TORONTO, COMPUTER SYSTEMS RESEARCH
GROUP, FEBRUARY 1972.
DESCRIPTION:

AN EMPIRICAL STUDY OF PROGRAMS APITTEN IN XPL WAS CARRIED OUT WITH THE AIM OF DETERMINING PROPERTIES OF POTH THE LANGUAGE AND THE OPJECT MACHINE, THE S/300. THE INFURRATION GATHERED BY EXAMINING A SET OF TYPICAL XPL PROGRAMS WAS USED TO SUGGEST IMPROVEMENTS TO THE DESIGN OF XPL, TO THE COMPILER FOR XPL, AND TO THE S/300. IN ADDITION, A PROFILE GENERATOR FOR XPL PROGRAMS WAS DEVELOPED AND ILLUSTRATED. A POWERFUL PROGRAMMING TOOL, IT ENAPLES AN XPL PROGRAMMED TO CLEARLY SEE WHERE FXECUTION TIME IS SPENT IN HIS PROGRAM. (A)

5 PROGRAMMING

ALSPAUGH, C.A. IDENTIFICATION OF SOME COMPONENTS OF COMPUTER PROGRAMMING APTITUDE. JOURNAL FOR RESEARCH IN MATHEMATICS EDUCATION, 1972, 3, 89-98. DESCRIPTION:

AN EXPERIMENT WAS CONDUCTED TO DETERMINE THE EXTENT THAT THE THURSTONE TEMPERAMENT SCHEDULE, THE IBM PROGRAMMER APTITUDE TEST, THE WATSON-GLASER CRITICAL THINKING APPRAISAL, THE SCAT QUANTITATIVE AND VERBAL SUBTESTS, AND MATHEMATICAL BACKGROUND CORRELATE WITH A MEASURE OF PROGRAPMING PROFICIENCY (TEST SCORES) IN AN INTRODUCTORY COMPUTER SCIENCE COURSE USING BASIC ASSEMBLY LANGUAGE (BAL) AND FORTRAM. NO SIGNIFICANT DIFFERENCES WERE OBSERVED BETWEEN BAL AND FORTRAN ON EITHER THE PROFICIENCY MEASURE OR THEIR CORRELATIONS WITH THE INDEPENDENT VARIABLES STUDIED. THE MATHEMATICAL BACKGROUND OF A STUDENT WAS THE MAJOR PREDICTOR OF PERFORMANCE. THE MORE SUCCESSFUL STUDENTS ALSO TEMO TO HAVE LOW LEVELS OF "IMPULSIVENESS" AND "SOCIABILITY" AND A RELATIVELY HIGH LEVEL OF "REFLECTIVENESS" AS MEASURED BY THE THURSTONE TEMPERAMENT SCHEDULE. (MEA) 10P, 9R.

THE THE PROPERTY OF THE PARTY O

6 SOCIAL IMPACTS OF COMPUTING AND RESON, R.E. VALUE ORIENTATION OF COMPUTER SCIENCE STUDENTS. COMMUNICATIONS OF THE ACM, 1978, 21, 219-225. DESCRIPTION:

TECHNOLIGICAL AND NON-TECHNOLOGICAL VALUE ORIENTATIONS ARE INVESTIGATED WITH SPECIAL ATTENTION TO THE COMPLEXITY OF VALUE STRUCTURES. COMPUTER SCIENCS STUDENTS, WHO ARE CLOSELY ASSOCIATED WITH TECHNOLOGY, CONTRAST WITH SOCIAL SCIENCE STUDENTS, WHO ARE OFTEN TECHNOLOGICALLY ALOOF. THIS IS CONFIRMED BY THE VALUE RATINGS OF 313 STUDENTS AT THE UNIVERSITY OF MINNESOTA IN 1972. COMPUTER SCIENCE MAJORS WERE FOUND TO HAVE A MORE COMPLEX VALUE STRUCTURE THAY SOCIAL SCIENCE MAJORS. (A) 7P, 29R.

MEMORY OF COMPUTER PROGRAMS: AN INVESTIGATION OF COMPUTER PROGRAM DEBUGGING
(TECHNICAL REPORT TR-78-A21). ALEXANDRIA, VIRGINIA: U.S. ARMY RESEARCH
INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES, AUGUST 1978.
DESCRIPTION:

A mark was well considered in which the south of the south of the second with the south of the s

A THEORETICAL FRAMEWORK, BASED UPON RECENT STUDIES IN COGNITIVE PSYCHOLOGY ON MEMORY FOR TEXT, WAS DEVELOPED TO EXPLAIN CERTAIN ASPECTS OF HUMAN BEHAVIOR DURING COMPUTER PROGRAM COMPREHENSION AND DEBUGGING. A CENTRAL CONCEPT OF THIS FRAMEWORK IS THAT THE INFORMATION CONTAINED IN A PROGRAM IS REPRESENTED IN A PROGRAMMER'S MEMORY AS A CONNECTED, PARTIALLY ORDERED LIST (HIERARCHY) OF "PROPOSITIONS" (UNITS OF INFORMATION WITH PROPERTIES SIMILAR TO THOSE OBSERVED IN RESEARCH ON TEXT MEMORY). AN EXPERIMENT WAS PERFORMED TO TEST THE HYPOTHESIS THAT THE DIFFICULTY IN FINDING A PROGRAM BUG IS A FUNCTION OF THE BUG'S LOCATION IN THIS HIERARCHY. THIS EXPERIMENT COMPARED THE EFFECTS OF BUG LOCATION, BUG TYPE (ARRAY, ITERATION, ASSIGNMENT) AND SPECIFIC PROGRAM. EACH OF 48 SUBJECTS DEBUGGED THO SEPARATE PROGRAMS, WITH ONE TYPE OF BUG AT TWO DIFFERENT HIERARCHICAL LEVELS IN EACH PROGRAM.

A PRELIMINARY ANALYSIS SUGGESTED THAT ALL THREE FACTORS -- PROGRAM, BUG TYPE, AND BUG LOCATION -- SIGNIFICANTLY AFFECTED THE TIME REQUIRED TO LOCATE PROGRAM BUGS. DETAILED ANALYSES, HOWEVER, SUGGESTED THE PROGRAM AND BUG TYPE VARIABLES COULD BE EXPLAINED IN TERMS OF THE BUG LOCATION VARIABLE AND THAT A BUG'S LOCATION IN A PROGRAM'S UNDERLYING PROPOSITIONAL HIERARCHY IS A PRINCIPAL FACTOR AFFECTING PERFORMANCE IN A COMPREHENSION AND DEBUGGING TASK.  DESCRIPTION:

EXPERIENCE IN DEVELOPMENT AND MAINTENANCE OF LARGE COMPUTER-BASED SYSTEMS FOR GOVERNMENT AND INDUSTRY HAS LED THE IPM FEDERAL SYSTEMS DIVISION TO THE FORMULATION OF A NEW APPROACH TO PRODUCTION PROGRAMMING. THIS APPROACH, WHICH COUPLES A NEW KIND OF PPOGRAMMING ORGANIZATION (A CHIEF PROGRAMMER TEAM) WITH FORMAL TOOLS FOR USING STRUCTURED PROGRAMMING IN SYSTEM DEVELOPMENT, WAS RECENTLY APPLIED ON A CONTRACT WITH THE NEW YORK TIMES FOR AN ONLINE INFORMATION SYSTEM. COMPARED TO EXPEPIENCE ON SIMILAR CONTRACTS IN THE PAST, THE APPROACH RESULTED IN INCREASED PROGRAMMER PRODUCTIVITY COUPLED WITH IMPROVED QUALITY. FOLLOWING A BRIEF DESCRIPTION OF THE SYSTEM AND A REVIEW OF THE APPROACH, THIS PAPER DISCUSSES THE QUALITY OF THE SYSTEM AS OBSERVED DURING A THOROUGH ACCEPTANCE TEST AND IN THE INITIAL PERIOD OF OPERATION FOLLOWING ITS DELIVERY. THE SHANNER CONTROL OF SHADE S

METHODS ARE INCORPORATED FOR MONITORING AND AIDING THE STUDENT AS HE WORKS ON PROGRAMMING PROBLEMS IN THE BASIC LANGUAGE. THE INSTRUCTIONAL PROGRAM DEVELOPED CAN BE USED TO INVESTIGATE SCHEMES FOR OFTIMIZING PROBLEM PRESENTATION AND GIVING ASSISTANCE DURING PROBLEM-SOLTING BASED ON A MODEL OF THE STUDENT'S ABILITIFS AND DIFFICULTIES. PREVIOUS EXPERIENCE IN THE INSTRUCTIONAL AND TECHNICAL ASPECTS OF TEACHING A PROGRAMMING LANGUAGE INDICATES THAT A COURSE IN COMPUTER PROGRAMMING CAN BE DESIGNED TO HELP THE STUDENT ACQUIRE PROGRAMMING CONCEPTS IN A PERSONALIZED AND EFFICIENT MANNER AS HE DEVELOPS SKILLS AT INCREASINGLY ADVANCED LEVELS.

THIS ARTICLE REPORTS ON WORK CURRENTLY IN PROGRESS AND BRIEFLY SUMMARIZES

OBSERVATIONS AND CONCLUSIONS BASED ON OPERATION DURING THE PILOT YEAR.

A MAJOR GOAL OF THE RESEARCH PROJECT IS TO INCREASE THE SOPHISTICATION WITH WHICH THE INSTRUCTIONAL PROGRAM MONITORS THE STUDENT'S WORK AND RESPONDS TO IT WITH APPROPRIATE HINTS AND PROMPTS. ONE ASPECT OF SUCH WORK IS THE UTILIZATION OF ALGORITHMS FOR CHECKING THE CORRECTNESS OF A STUDENT PROCEDURE. LIMITED BUT SUFFICIENT PROGRAM VERIFICATION IS POSSIBLE THROUGH SIMULATED EXECUTION OF THE PROGRAM ON TEST DATA STORED WITH EACH PROBLEM. WITHIN THE CONTROLLABLE CONTEXT OF INSTRUCTION, WHERE THE PROBLEMS TO BE SOLVED ARE PREDETERMINED AND THEIR SOLUTIONS KNOWN, SIMULATED EXECUTION OF THE STUDENT'S PROGRAM CAN EFFECTIVELY DETERMINE ITS CLOSENESS TO A STORED MODEL SOLUTION. (A)

BAYER, R. A THEORETICAL STUDY OF HALSTEAD'S SOFTWARE PHENOMENON (TECHNICAL REPORT NO. CSD-TR-69). LAFAYETTE, INDIANA: PURDUE UNIVERSITY, DEPARTMENT OF COMPUTER SCIENCE, MAY 1972. DESCRIPTION:

IN A RECENT PAPER HALSTEAD PRESENTED THE HYPOTHESIS THAT THE LENGTH OF A COMPUTER PROGRAM CAN BE DETERMINED FROM THE NUMBER OF DIFFERENT OPERATORS AND OPERANDS USED IN THE PROGRAM. IN THIS STUDY SEVERAL FORMAL MODELS OF PROGRAMS AND PROGRAMMING ARE PRESENTED. THE FIRST MODEL (R) YIELDS A PLAUSIBILITY ARGUMENT FOR HALSTEAD'S HYPOTHESIS AND THE BASIS FOR THE FOLLOWING MODELS (A,B,C). MODEL R SEEMS TOO DIFFICULT TO SOLVE, THUS MODELS A, B, AND C ARE DEVELOPED AS SUCCESSIVELY CLOSER APPROXIMATIONS TO MODEL R. THEY ARE SOLVED EXPLICITLY OR BY MONTE CARLO APPROXIMATIONS. THE RESULTS SUGGEST A POSSIBLE THEORETICAL EXPLANATION OF THE PHENOMENON ORSERVED BY HALSTEAD. (A) 20P, 1R.

COMPUTER-ASSISTED INSTRUCTION
BEARD, No. 10, & BARR, A.V. THE BASIC INSTRUCTIONAL PROGRAM STUDENT MANUAL
(SPECIAL REPORT 77-2). SAN DIEGO, CALIFORNIA: NAVAL PERSONNEL RESEARCH AND
DEVELOPMENT CENTER, 1976.
DESCRIPTION:

THE BASIC INSTRUCTIONAL PROGRAM (BIP) IS A "HANDS-ON LABORATORY" THAT TEACHES ELEMENTARY PROGRAMMING IN THE BASIC LANGUAGE. THIS MANUAL IS THE STUDENT'S MAIN SOURCE OF INFORMATION ABOUT THE BIP SYSTEM AND THE BASIC LANGUAGE. THE MANUAL IS ORGANIZED AS A REFERENCE DOCUMENT AIMED AT STUDENTS WITH NO PREVIOUS PROGRAMMING EXPERIENCE. SECTION I INTRODUCES THE STUDENT TO THE COURSE ITSELF. SECTION II BEGINS WITH AN EXPLANATION OF PROGRAMMING IN GENERAL. DISCUSSIONS OF PROGRAMMING CONCEPTS SUCH AS INPUT AND VARIABLES ARE FOLLOWED BY THE SPECIFICATIONS OF THE BASIC STATEMENTS USED TO IMPLEMENT THEM. THE SYNTAX AND SAMPLE PROGRAMS ARE USED AS ILLUSTRATIONS. SECTION III LISTS AND EXPLAINS THE COMMANDS THAT CONTROL THE BIP SYSTEM. SOME ARE IDENTICAL TO STANDARD BASIC COMMANDS (E.G., RUN,LIST), AND OTHERS GIVE ACCESS TO THE UNIQUE FEATURES OF THE GLOSSARY LISTS ALL THE SPECIALIZED TERMS USED IN THE MANUAL, EXPLAINS THEIR USE BRIEFLY, AND GIVES REFERENCES TO THE SECTIONS WHERE DETAILED INFORMATION CAN BE FOUND.

BEMER, R.W. A SOFTWARE ENGINEER'S WORKSHOP: TOOLS AND TECHNIQUES. IN
INFOTECH INFORMATION LTD., SOFTWARE ENGINEERING. BERKSHIRE, ENGLAND: INFOTECH
INFORMATION LTD., 1972, 273-286.

THE PAPER DESCRIBES THE PRODUCTION AIDS AND PRODUCTION NOTHODS THAT WERE INCORPOSATED INTO A SOFTWARE FACTORY. THE SOFTWARE FACTORS ORIGINATED IN TWO PARTS: THE FIRST PART IS CONCERNED WITH ASSISTING THE PROGRAMMER; THE SECOND PART TRIES TO TAKE MEASURES OF PROGRAMMERS TO SEE IF ANY IMPROVEMENTS CAN BE MADE AND TO ENABLE STATISTICS TO BE DETERMINED. THE AIDS AND METHODS DISCUSSED IN THIS PAPER INCLUDE FILING SYSTEMS AND TEXT EDITING, DIRECTED GRAPH REPRESENTATIONS OF PROGRAMS, PRODUCTION SCHEDULING, AUTOMATIC FLOWCHARTING, "MAPPER," AND CERTIFICATION TECHNIQUES. EXAMPLES OF HOW THESE AIDS AND METHODS CAN BE USED TO IMPROVE PROGRAMMING PERFORMANCE ARE GIVEN. 19EA)

25 PROGRAMMING, TASK ANALYSIS
BERGER, R.M. COMPUTER PROGRAMMER JOB ANALYSIS REFERENCE TEXT. MONTVALE,
NEW JERSEY: AMERICAN FEDERATION OF INFORMATION PROCESSING SOCIETIES, 1974.
DESCRIPTION:

THIS REPORT PRESENTS THE RESULTS OF AN INVESTIGATION OF WHAT IN FACT PROGRAMMERS ARE AND DO. PROGRAMMING MANAGERS, SENIOR PROGRAMMERS, AND A CROSS SECTION OF PROGRAMMERS IN GENERAL PARTICIPATED IN THE DEVELOPMENT AND EVALUATION OF THE JOB DESCRIPTION. THESE THREE GROUPS, STARTING WITH MANAGEMENT, WERE GIVEN LISTS OF PROGRAMMING TASKS AND SKILLS TO EVALUATE. THE MANAGERS AND SENIOR PROGRAMMERS MADE REVISIONS AND ADDITIONS TO THE LISTS. FIHALLY, PROGRAMMERS IN A NATIONWIDE SURVEY EVALUATED THE TASKS AND SKILLS FOR IMPORTANCE TO THEIR JOBS.

THE RESULTS OF THIS STUDY ARE EXPECTED TO BE USED BY MANAGEMENT PERSONNEL OF COMPUTER PROGRAMMING ORGANIZATIONS TO DEVELOP PROGRAMMER POSITION DESCRIPTIONS TO FIT THEIR SPECIFIC NEEDS. THE RESULTS ARE ALSO EXPECTED TO PROVIDE THE BASIS FOR DEVELOPMENT OF COMPREHENSIVE EXAMINATIONS FOR PROGRAMMER CERTIFICATION AND FUR DEVELOPMENT OF THE TRAINING REQUIRED FOR CERTIFICATION. FINALLY, THE STUDY SHOULD REPRESENT AN INITIAL MILESTONE IN THE CONTINUING PERSONNEL RESEARCH INTO THE NATURE AND EVOLUTION OF OCCUPATIONS IN THE COMPUTER FIELD. (A)

DEBUGGING

BERNSTEIN, W.A., & OWENS, J.T. DEBUGGING IN A TIME-SHARING ENVIRONMENT. AFIPS

BOEHM, B.W., MCCLEAM, R.K., & URFRIG, D.B. SOME EXPERIENCE WITH AUTOMATED AIDS TO THE DESIGN OF LARGE-SCALE RELIABLE SOFTWARE. IEEE TRANSACTIONS ON SOFTWARE ENGINEERING, 1975, SE-1, 123-133 (ALSO PROCEEDINGS, INTERNATIONAL CONFERENCE ON RELIABLE SOFTWARE, 21-23 APRIL 1975, LOS ANGELES, CALIFORNIA. SIGPLAN NOTICES, JUNE 1975, 1063, 105-113). DESCRIPTION:

THIS PAPER SUMMARIZES SOME RECENT EXPERIENCE IN AMALYZING AND ELIMINATING SOURCES OF ERROR IN THE DESIGN PHASE OF LARGE SOFTWARE PROJECTS. IT BEGINS BY POINTING OUT SOME OF THE SIGNIFICANT DIFFERENCES IM SOFTWARE ERROR INCIDENCE BETWEEN LARGE AND SMALL SOFTWARE PROJECTS. THE MOST STRIKING CONTRAST, ILLUSTRATED BY PROJECT DATA, IS THE LARGE PREPONDERANCE OF DESIGN ERRORS OVER CODING ERRORS ON LARGE-SCALE PROJECTS, NOT ONLY WITH RESPECT TO NUMBERS OF ERRORS, BUT ALSO WITH RESPECT TO THE RELATIVE TIME AND EFFORT REQUIRED TO DETECT THEM AND CORRECT THEM.

And the second in water the second the secon

THE PAPER NEXT PRESENTS A TAXONOMY OF SOFTWARE ERROR CAUSES, AND SOME ANALYSES OF THE DESIGN ERROR DATA, PERFORMED TO OBTAIN A BETTER UNDERSTANDING OF THE NATURE OF LARGE-SCALE SOFTWARE DESIGN ERRORS AND TO EVALUATE ALTERNATIVE METHODS OF PREVENTING, DETECTING AND ELIMINATING THEM. BASED ON THIS ANALYSIS OF OBSERVATIONAL DATA, A HYPOTHESTS WAS DERIVED REGARDING THE POTENTIAL COST-EFFECTIVENESS OF AN AUTOMATED AID TO DETECTING INCONSISTENCIES BETWEEN ASSERTIONS ABOUT THE NATURE OF INPUTS AND CUTPUTS OF THE VARIOUS ELEMENTS (FUNCTIONS, MODULES, DATA BASES, DATA SOURCES, ETC.) OF THE SOFTWARE DESIGN. THIS HYPOTHESIS WAS TESTED BY DEVELOPING A PROTOTYPE VERSION OF SUCH AN AID, THE DESIGN ASSERTION CONSISTENCY CHECKER (DACC), USING TRW'S GENERALIZED INFORMATION MANACEMENT (GIM) SYSTEM, AND USING IT ON A LANGE-SCALE SOFTWARE PROJECT WITH 186 ELEMENTS AND 967 ASSERTIONS ABOUT

THEIR INPUTS AND OUTFUTS.

IN GENERAL, THE DATA CONFIRMED THE HYPOTHESIS ABOUT THE GENERAL UTILITY OF A DACC CAPABILITY FOR LARGE SUFTWARE PROJECTS. HOMEVER, A NUMBER OF ADDITIONAL FEATURES SHOULD BE CONSIDERED TO COMPENSATE FOR CURRENT DEFICIENCIES (IN AREAS SUCH AS MANUSCRIPT PREPARATION) AND TO FULLY TAKE ADVANTAGE OF HAVING THE SOFTWARE DESIGN IN MACHINE-READABLE FORM. 35 STATISTICS ON USE OF TIME-SHARING SYSTEM
BOIES, S.J. USER BEHAVIOR ON AN INTERACTIVE COMPUTER SYSTEM. IBM SYSTEMS
JOURNAL, 1974, 13, 2-12.
DESCRIPTION:

THE USER-COMPUTER SYSTEM INTERACTIONS DESCRIBED HERE ARE CONFINED TO IBM/360 TIME SHARING SYSTEM (TSS) AND ITS TERMINALS. THE VARIOUS FACTORS DISCUSSED ARE: THE DURATION AND FREQUENCY OF TERMINAL SESSIONS, THE USER OF LANGUAGE PROCESSORS, COMMAND USAGE AND USER RESPONSE TIME. THE DATA INDICATE THAT A VERY SMALL PERCENTAGE OF USERS ACCOUNT FOR A LARGE PERCENTAGE OF THE TOTAL TERMINAL USAGE. USERS SELDOM USE THE ERROR CORRECTION FEATURES OF THE LANGUAGE PROCESSOR EVEM IF THEY NEED THEM. A LONG SYSTEM RESPONSE TIME IS RELATED TO A LONG USER RESPONSE TIME. ONLY A SMALL NUMBER OF COMMANDS ACCOUNT FOR A LARGE FREQUENCY OF USAGE. WHEN ONE COMMAND WOULD HAVE BEEN SUFFICIENT SEVERAL COMMANDS ARE OFTEN USED BY THE USERS. (0) 17P, 1GR.

34 PROGRAMMING ERRORS
BOIES, S.J., & GOULD, J.D. SYNTACTIC ERRORS IN COMPUTER PROGRAMMING. HUMAN
FACTORS, 1974, 16, 253-257.
DESCRIPTION:

A STUDY OF USERS OF A LARGE-SCALE COMPUTER SYSTEM (TSS/360) REVEALED THAT ONLY 12 TO 17X OF THE FORTRAM, PL/I AND ASSEMBLER LANGUAGE COMPUTER PROGRAMS SUBMITYED TO THE LARGUAGE PROCESSORS CONTAINED SYNTACTIC ERRORS. THUS, SYNTACTIC ERRORS OF NOT APPEAR TO BE A SIGNIFICANT POTTLENECK IN PROGRAMMING. THIS EXPERIMENT IS PART OF A LARGER EFFORT TO IDENTIFY AND REDUCE THE BEHAVIORAL BOTTLENECKS IN COMPUTER PROGRAMMING. (A) 5P, 11R.

35 STATISTICS ON USE OF INTERACTIVE DEBUGGING FACILITIES
BOIES, S.J., & SPIEGEL, M.F. A BEHAVIORAL ANALYSIS OF PROGRAPMING: ON THE USE
OF INTERACTIVE GEBUGGING FACILITIES (TECHNICAL REPORT RC-4472). YORKTOWN
HEIGHTS, NEW YORK: IBM WATSON RESEARCH CENTER, AUGUST 1973. (NTIS NO. AD
772127)
DESCRIPTION:

MEASUREMENT AND ANALYSIS OF USER DEBUGGING BEHAVIOR ON PRESENT INTERACTIVE SYSTEMS CAN LEAD TO AN UNDERSTANDING OF HOW FUTURE INTERACTIVE SYSTEMS SHOULD BE IMPLEMENTED. THIS STUDY PRESENTS BOTH AN ANALYSIS OF THE ON-LINE USAGE OF THE TSS/360 PROGRAM CONTROL SYSTEM (PCS) AS WELL AS THE RESULTS OF A QUESTIONHAIRE DESIGNED TO PROBE THE PCS KNOWLEDGE OF THE POPULATION OF USERS OF THAT SYSTEM. THE QUESTIONNAIRE RESPONSE POPULATION TENDED TO BE DIVIDED INTO THREE COMPETENCE GROUPS, THE HIGHEST OF WHICH CONSISTED MOSTLY OF SYSTEM SUPPORT PERSONNEL AND ASSEMBLER LANGUAGE PROGRAMMERS. THE ON-LINE USAGE ANALYSIS SHOWED THAT PCS COMMANDS ACCOUNTED FOR 7.2 PERCENT OF ALL COMMANDS ENTERED BY PROGRAMMERS. PCS WAS USED RARELY TO MCDIFY THE LOGIC OF A PROGRAM, BUT WAS USED AS A PROGRAM VARIABLE INPUT/OUTPUT SYSTEM. IT WAS CONCLUDED THAT THE UNDERSTANDING OF THE INTERACTIVE DEBUGGING PROCESS MUST COME FROM THE PERSPECTIVE OF THE ENTIRE SYSTEM, AS UP TO 50 PERCENT OF THE DEBUGGING EFFORT IS SPENT ON TASK AND DATA MANAGEMENT. FIVE CRITICAL FEATURES OF AN EFFECTIVE INTERACTIVE PROGRAMMING SYSTEM ARE OUTLINED. (A) 25P, 12R.

36 QUERY LANGUAGE
BOYCE, R.F., CHAMBERLIN, D.D., KING, W.F., III, & HAMMER, M.M. SPECIFYING
QUERIES AS RELATIONAL EXPRESSIONS: THE SQUARE DATA SUBLANGUAGE. COMMUNICATIONS
OF THE ACM, 1975, 18, 621-628.
DESCRIPTION:

THIS PAPER PRESENTS A DATA SUBLANGUAGE CALLED SQUARE, INTENDED FOR USE IN AD HOC, INTERACTIVE PROBLEM SOLVING BY NON-COMPUTER SPECIALISTS. SQUARE IS BASED ON THE RELATIONAL MODEL OF DATA, AND IS SHOWN TO BE RELATIONALLY COMPLETE. HOWEVER, IT AVOIDS THE QUANTIFIERS AND BOUND VARIABLES REQUIRED BY LANGUAGES BASED ON THE RELATIONAL CALCULUS. FACILITIES FOR QUERY, INSERTION, DELETION, AND UPDATE ON TABULAR DATA BASES ARE DESCRIBED. A SYNTAX IS GIVEN, AND SUGGESTIONS ARE MADE FOR ALTERNATIVE SYNTAXES, INCLUDING A SYNTAX BASED ON LINGLISH KEY WORDS FOR USERS WITH LIMITED MATHEMATICAL BACKGROUND. (A) BP. 20R.

THIS PAPER DESCRIBES AN EFFORT TO DEVELOP AN INTEGRATED SET OF SOFTWARE DEVELOPMENT TOOLS TO SUPPORT A DISCIPLINED AND REPEATABLE APPROACH TO SOFTWARE DEVELOPMENT. THIS EFFORT, WHICH IS REALLY PART OF A LARGER PROGRAM CURRENTLY UNDERWAY AT SYSTEM DEVELOPMENT CORPORATION TO INCREASE SOFTWARE RELIABILITY AND CONTROL SOFTWARE PRODUCTION COSTS, IS INTENDED TO REPLACE WHAT THE AUTHORS TERM "AD HOC CONGLOMERATIONS OF DEVELOPMENTAL TOOLS" WITH STANBARD ENGINEERING TECHNIQUES. (0) 10P, 7R.

39 PROGRAMMING

BRATMAN, H., MARTIN, H.G., & PERSTEIN, E.C. PROGRAM COMPOSITION AND EDITING WITH AN ONLINE DISPLAY. AFIPS CONFERENCE PROCEEDINGS, 1968, 33, 1349-1360. DESCRIPTION:

AN INTERACTIVE PROGRAMMING SUPPORT SYSTEM (1955) HAS BEEN UNDER DEVELOPMENT AT SYSTEM DEVELOPMENT CORPORATION SINCE 1965. THE PURPOSE OF THE SYSTEM IS TO PERMIT ALL OF THE PROGRAMMING PROCESSES -- COMPOSITION (IN A PROCEDURE-ORIENTED LANGUAGE), EDITING, EXECUTION, TESTING, AND DOCUMENTATION -- TO BE CARRIED OUT AS PARTS OF A SINGLE, COORDINATED ACTIVITY CENTERED AROUND AN INTERACTIVE COMPILER. 1955 ATTEMPTS TO UNIFY TECHNIQUES THAT ARE USUALLY EMBODIED IN SEPARATE FUNCTIONAL PROGRAMS, SO THAT THE PROGRAMMER NEED NOT KNOW WHICH PARTICULAR PROGRAM IS PERFORMING A SPECIFIC TASK. THE SYSTEM IS INTENDED FOR A TIME-SHARING ENVIRONMENT, WITH USER INTERACTION VIA A SHALL TABULAR DISPLAY OR TYPEWRITER-LIKE TERMINAL. (A) 12P, 4R.

40 SOFTWARE ENGINEERING
BROOKS, F.P., JR. THE MYTHICAL MAN-MONTH: ESSAYS ON SOFTWARE ENGINEERING.
READING, MASSACHUSETTS: ADDISON-WESLEY, 1975.
DESCRIPTION:

THIS BOOK CONTAINS FIFTEEN ESSAYS ON THE MANAGEMENT OF COMPUTER PROGRAMMING PROJECTS. THESE ESSAYS PRIMARILY DESCRIBE THE AUTHOR'S PERSONAL OPINIONS AND EXPERIENCES BUT ALSO PROVIDE A BRIEF INTRODUCTION TO THE LITERATURE ON SOFTUARE ENGINEERING. THE CENTRAL THESIS IS THAT LARGE SOFTWARE PROJECTS SUFFER FROM PROBLEMS THAT ARE QUALITATIVELY DIFFERENT FROM THOSE ENCOUNTERED IN SMALL PROJECTS DUE TO THE DIVISION OF LABOR. FOR THIS REASON, THE MOST IMPORTANT GOAL IN A LARGE SOFTWARE PROJECT IS TO MAINTAIN CONCEPTUAL INTEGRITY. THESE ESSAYS FOCUS BOTH ON THE DIFFICULTIES IN ACHIEVING CONCEPTUAL INTEGRITY AND ON METHODS FOR ACHIEVING IT. (MEA) 203P, 83R.

41 PROGRAMMING

BROOKS, R. A MODEL OF HUMAN COGNITIVE BEHAVIOR IN WRITING CODE FOR COMPUTER PROGRAMS (2 VOLS.). PITTSBURGH, PENNSYLVANIA: CARMEGIE-MELLON UNIVERSITY, DEPARTMENT OF COMPUTER SCIENCE, MAY 1975 (ALSO: REPORTED BRIEFLY IN PROCEEDINGS OF THE FOURTH INTERNATIONAL JOINT CONFERENCE OF ARTIFICIAL INTELLIGENCE, 1975). (NTIS NOS. AD A013582, AD A012918) DEXCRIPTION:

The second of the second of the second secon

A THEORY OF HUMAN COGNITIVE PROCESSES IN WRITING CODE FOR COMPUTER PROGRAMS IS PRESENTED. IT VIEWS BEHAVIOR IN TERMS OF THREE PROCESSES, UNDERSTANDING, PLANNING, AND CODING. THE FIRST OF THESE CONSISTS OF ACQUISITION OF INFORMATION FROM THE PROBLEM INSTRUCTIONS AND DIRECTIONS. THIS IS USED BY THE PLANNING PROCESS TO CREATE A SOLUTION PLAN STATED AS A SET OF FUNCTIONAL SPECIFICATIONS IN A LANGUAGE WHICH IS INDEPENDENT OF THE SYNTAX OF THE PARTICULAR PROGRAMMING LANGUAGE. THE CODING PROCESS CONVERTS THIS PLAN TO CODE USING A PROCESS NAMED "SYMBOLIC EXECUTION" IN WHICH THE PIECES OF CODE ARE ASSIGNED EFFECTS IN TERMS OF THE FUNCTIONS THE PROGRAMMER INTENDS THE CODE TO PERFORM IN ACHIEVING THE PURPOSE OF THE PROGRAM.

WITHIN THE FRAMEWORK OF THIS THEORY, A MORE EXPLICIT MODEL OF THE CODING PROCESS WAS DEVELOPED. THE MODEL IS BASED ON A PRODUCTION SYSTEM AND HAS BEEN IMPLEMENTED AS A COMPUTER PROGRAM, GIVEN PLANS TAKEN FROM PROTOCOLS OF A PROGRAMMER WRITING A SERIES OF SHORT FORTRAN PROGRAMS, IT IS ABLE TO GENERATE THE SAME CODE IN THE SAME ORDER AS THE PROGRAMMER DID.

THE MODEL MAKES THREE ASSUMPTIONS ABOUT PROGRAMMER BEHAVIOR IN WRITING PROGRAMS:

- 1. PROGRAMMERS HAVE A LARGE AMOUNT OF SPECIFIC KNOWLEDGE ABOUT HOW TO ENCODE PARTICULAR PLAN ELEMENTS.
- 2. PROGRAMMERS GENERATE CODE BY USING THE EFFECTS ASSIGNED TO EACH PIECE TO GENERATE THE NEXT.
- 3. THE BASIC UNITS OF A PROGRAMMER'S KNOWLEDGE OF LANGUAGE SYNTAX ARE DETERMINED BY THE WAY IN WHICH HE USES THE LANGUAGE, RATHER THAN BY PROPERTIES OF THE SYNTAX ALONE.

THE INPLICATIONS OF THESE ASSERTIONS ARE DISCUSSED FOR THE USE OF PRODUCTION SYSTEMS TO REPRESENT BEHAVIOR, FOR TEACHING PROGRAMMING, FOR ERROR ANALYSIS IN DEBUGGING, AND FOR THE USE OF BACK-TRACKING IN PROBLEM SOLVING SYSTEMS. (A) 304P, 46R.

42 PROGRAMMING

TOTAL SELECTION OF THE SELECTION OF THE

BROOKS, R. HOW A PROGRAMMER UNDERSTANDS A PROGRAM: A MODEL (TECHNICAL REPORT NO. 97). IRYINE, CALIFORNIA: UNIVERSITY OF CALIFORNIA, DEPARTMENT OF INFORMATION AND COMPUTER SCIENCE, 1977.
DESCRIPTION:

IN A LARGE VARIETY OF PROGRAMMING SITUATIONS, A PROGRAMMER IS REQUIRED TO UNDERSTAND A PROGRAM THAT SOMEONE ELSE HAS WRITTEN. A MODEL HAS BEEN CREATED FOR THE BEHAVIOR SEEN IN THE VERBAL PROTOCOL OF A PROGRAMMER ON A SAMPLE UNDERSTANDING TASK. THE MODEL IS BASED ON A THEORY OF UNDERSTANDING WHICH STRESSES THE ROLE OF THE PROGRAMMER'S A PRIORI KYPOTHESES OR GUESSES ABOUT THE PROGRAM STRUCTURE. ORGANIZATION OF THE MODEL IS THAT OF A PRODUCTION SYSTEM, A STRUCTURE WHICH APPEARS PARTICULARLY WELL-SUITED TO THE ASYNCHROHOUS, NON-SEQUENTIAL NATURE OF THE INPUT. (A) 34P. 9R.

43 PROGRAMMING

STATE OF THE SECOND

BROPHY, H.F. IMPROVING PROGRAMMING PERFORMANCE. AUSTRALIAN COMPUTER JOURNAL, 1970, 2(2), 66-70.
DESCRIPTION:

THERE IS RELATIVELY LITTLE WRITTEN OR DISCUSSED ABOUT PROGRAMMERS, WHO REPRESENT A LARGE PART OF THE INVESTMENT IN COMPUTING. THIS PAPER ATTEMPTS TO FOCUS ATTENTION ON AN UNDERSTANDING AND EVALUATION OF THE PROGRAMMING TASK, SUGGESTING WAYS TO IMPROVE THE PROGRAMMER'S LOT, AND TO RAISE HIS PRODUCTIVITY. IT IS IMPORTANT TO REALIZE THAT THE PROGRAMMER IS INVOLVED IN HUMAN PROBLEM SOLVING, AND COMMUNICATING NOT ONLY WITH THE MACHINE, PUT WITH OTHER PEOPLE. HIS ULTIMATE PRODUCT WILL REFLECT HIS CREATIVITY, EFFICIE'CY AND ARILITY TO COMMUNICATE.

TO GET TORE FROM THE PROGRAMMER, WE SHOULD PROVIDE HIM WITH BETTER TOOLS, TRAIN HIM IN THE USE OF THOSE TOOLS, AND STANDARDIZE AND PANAGE HIS PERFORMANCE. SEVERAL SPECIFIC IDEAS AND SUGGESTIONS ARE GIVEN, MANY OF THEM HAVING SEEN ALREADY INSTITUTED IN A FEW ORGANIZATIONS. (A) 5P, 19R.

44 PMOGRAMMING

BROWN, G.D. PROGRAMMING: THE QUIET EVOLUTION. DATAMATION, 1972, 18, 147-150. DESCRIPTION:

SOFTWARE, UNLIKE HARDWARE, DOES NOT ADVANCE IN CLEAR-CUT GENERATIONS. ITS CHANGES DERIVE MORE FROM HUMAN NEEDS THAN FROM TECHNOLOGICAL POSSIBILITIES. THE EFFECTS OF CIVIL DISORDER, VIET NAM, THE SPACE PROGRAM, AND TRENDS OF THE ECONOMY AND RESEARCH ARE MENTIONED AS INFLUENCES ON THE EVOLUTION OF PROGRAMMING. FUR THE FURSEFARLE FUTURE, PROGRAMMING WILL REMAIN AN EXACTING SKILL. NO ECONOMIES OF SCALF ARE YET APPARENT, AND AUTOMATIC OR MASS PROGRAMMING SEEMS AS FAR AWAY AS EVER. THE PROGRAMMING PROFESSION WILL REQUIRE MORE EDUCATION, PRIDE IN COMPETENCE, AND A PREOCCUPATION WITH QUALITY. (GDC)

THE CORRELATION BETWEEN OBSERVED AND CALCULATED LENGTH FOR 429 FORTRAN PROGRAMS IN THE PROGRAM LIBRARY AT PURDUE UNIVERSITY WAS .95, WITH PROGRAM SIZE RANGING FROM 3 TO 1674 STATEMENTS. THE STUDY CONFIRMS THE EXISTENCE OF A FUNCTIONAL RELATIONSHIP BETWEEN THE MEASURABLE PARAMETERS M(1), N(2), AND N.

THIS PAPER ALSO REVIEWS RULES OBSERVED IN COUNTING ALGORITHM. (0) 8P, 10R.

55 SOFTWARE ENGINEERING

BURNS, I.F., HANSING, M.M., HERRING, F.P., & MCCOY, R.C. SOFTWARE ENGINEERING AND SPECIFICATION VALIDATION. COMPUTER-AIDED SOFTWARE ENGINEERING PROGRAM, SOFTWARE CAPABILITIES DESCRIPTION (TECHNICAL REPORT NO. TRW-22944-6921-006). HUNTSVILLE, ALABAMA: TRW SYSTEMS GROUP, JANUAR' 1974. (HTIS NO. AD 915757) DESCRIPTION:

THIS REPORT DESCRIBES THE CAPABILITIES OF THE COMPUTER-AIDED SOFTWARE ENGINEERING PROGRAM (CASEP), TO BE DEVOLOPED BY 7RW UNDER THE SPONSORSHIP OF ABMDA.

CASEP IS AN INTEGRATED SET OF PROGRAMS WHICH APE BESIGNED TO ENHANCE THE CURRENT ABMDA SOFTWARE ENGINEERING METHODOLOGY. THIS ENHANCEMENT IS ACCOMPLISHED BY ASSURING COMPLETENESS OF SPECIFICATION OF SOFTWARE DESIGN, BY ASSURING CORRECTNESS OF SPECIFIED LOGIC IN PERFORMING STATIC VALIDATION AT ALL LEVELS OF DEVELOPMENT, BY AIDING THE DEVELOPMENT OF SIMULATORS TO VALIDATE THE SPECIFICATIONS, BY PROVIDING ASSISTANCE TO THE PROCESS DESIGNER DURING THE PROCESS DESIGN PHASE, AND BY PROVIDING MANAGEMENT INFORMATION REPORTS AND CONFIGURATION MANAGEMENT CONTROLS AS AN INTEGRAL PART OF THE DEVELOPMENT SUPPORT. (A) 75P, 27R.

56 PROGRAMMING STYLE

BYARS, H.E. AN INVESTIGATION INTO PROGRAMMING STYLE. COMPUTER STUDIES IN THE HUMANITIES AND VERBAL BEHAVIOR, 1969, 2, 198-203.

DESCRIPTION:

THIS PAPER SEEKS TO ANSWER THE QUESTION: WHAT IS A GOOD BASIS FOR DETERMINING WHO WROTE A GIVEN PROGRAM? ANALYSIS OF PROGRAMMING STYLE PROCEEDS ON TWO LEVELS (PROGRAM TEXT AND PEDGRAM SENANTICS) IN ORDER TO IDENTIFY STYLISTIC DISCRIMINATORS AND PROGRAMS OF VARYING AUTHORSHIP. BECAUSE OF ITS FLEXIBILITY AND ITS EASE OF PARSING, THE STUDY CONCENTRATED ON THE FORTRAN LANGUAGE. (A) 6P, 2R.

57 SOFTWARE DESIGN
CAMERON, M.D. HUMAN PROBLEMS IN SOFTWARE DESIGN. IN PROCEEDINGS OF THE TENTH
ANNUAL MEETING, HUMAN FACTORS ASSOCIATION OF CANADA. DOWNSVIEW, ONTARIO,
CAMADA: HUMAN FACTORS ASSOCIATION OF CANADA, 1978, 26-37.
DESCRIPTION:

THE PRODUCTION OF A HUMAN-ENGINEERED COMPUTER SYSTEM REQUIRES HUMAN FACTORS CONSIDERATIONS AT ALL STAGES OF DEVELOPMENT. THOUGH IT IS ESSENTIAL TO CONSIDER THE HUMAN ENGINEERING OF THE VISIBLE MAN-COMPUTER INTERFACE, MORE CONCERN MUST BE CONCENTRATED ON THE FACTORS INVOLVED IN THE CONSTRUCTION OF THAT INTERFACE. IN THE FACE OF A CONTINUING EXPLOSION IN SOFTWARE PRODUCTION, WE MUST CONCERN OURSELVES WITH THE INTERFACE BETWEEN THE PROGRAMMER AND HIS PROGRAM. THE PRODUCTION OF COST-EFFECTIVE HIGH QUALITY SOFTWARE REQUIRES AN UNDERSTANDING OF THE WORKERS PRODUCING IT, THEIR WORK ENVIRONMENT, AND THE TOOLS THEY USE. (A) 12P, 16R.

SB EFFECT OF SYSTEM RESPONSE TYME ON USER CARBONELL, J.R., ELKIND, J.I., & MICKERSON, R.S. ON THE PSYCHOLOGICAL IMPORTANCE OF TYME IN A TIME SHARING SYSTEM. HUMAN FACTORS, 1968, 10, 135-142 (ALSO: REPORT NO. SCIENTIFIC-6, BBN-1687. CAMBRIDGE, MASSACHUSETTS: BOLT BERANEK AND NEWMAN, INC., SEPTEMBER 1967). (NTIS NO. AD 670604) DESCRIPTION:

ONE OF THE MOST IMPORTANT PROBLEMS IN THE DESIGN AND/OR OPERATION OF A COMPUTER UTILITY IS TO OBTAIN DYNAMIC CHARACTERISTICS THAT ARE ACCEPTABLE AND COMVENIENT TO THE ON-LINE USER. THIS PAPER IS CONCERNED WITH THE PROBLEMS OF ACCESS TO THE COMPUTER UTILITY, RESPONSE TIME AND ITS EFFECT UPON CONVERSATIONAL USE OF THE COMPUTER, AND THE EFFECTS OF LOAD ON THE SYSTEM. PRIMARY ATTENTION IS PLACED UPON RESPONSE TIME: RATHER (HAN A SINGLE MEASURE, A SET OF RESPONSE TIMES SHOULD BE REASURED IN A GIVEN COMPUTER UTILITY, IN CORRESPONDENCE TO THE DIFFERENT TYPES OF OPERATIONS REQUESTED. IT IS ASSUMED THAT THE PSYCHOLOGICAL VALUE OF SHORT RESPONSE TIME STEMS FROM A SUBJECTIVE COST MEASURE OF THE USER'S OWN TIME, LARGELY INFLUENCED BY THE VALUE OF CONCURRENT TASKS BEING POSTPONED. A MEASURE OF COST (TO THE INDTVIDUAL AND/OR HIS ORGANIZATION) OF THE TIME-ON-LINE REQUIRED TO PEFFORM A TASK MIGHT THUS BE DEZIVED. MORE SUBTLE IS THE PROBLEM OF THE USER'S ACCEPTABILITY OF GIVEN RESPONSE TIMES. THIS ACCEPTABILITY IS A FUNCTION OF THE SERVICE REQUESTED (E.G., LENGTH OF COMPUTATION), AND VARIABILITY WITH RESPECT TO EXPECTATIONS DUE BOTH TO UNCERTAINTY IN THE USER'S ESTIMATION AND TO VARIATIONS IN THE RESPONSE TIME ORIGINATED BY VARIABLE LOADS ON THE SYSTEM. AN EFFORT SHOULD BE MADE BY COMPUTER-UTILITY DESIGNERS TO INCLUDE DYNAMIC CHARACTERISTICS (SUCH AS PREDICTION OF LOADS AND THEIR EFFECTS) AMONG THEIR DESIGN SPECIFICATIONS. (A)

59 DATA ENTRY ERRORS
CARLSON, G. PREDICTING CLERICAL ERROR IN AN EDP EKVIRONMENT. DATAMATION,
FEBRUARY 19(2)63, 9, 34-36.
DESCRIPTION:

VERY LITTLE IS KNOWN ABOUT ERROR IN ANY PRECISE MARKER, EXCEPT THAT IT IS USUALLY PRESENT AND TROUBLESOME. THIS PAPER DESCRIBES AN ATTEMPT AT PREDICTING, OR SIMULATING, HUMAN ERROR. ERRORS MADE IN A NUMERIC DATA ENTRY TASK ARE ANALYZED AND A BINARY DECISION TREE IS DEVELOPED TO SIMULATE THESE ERRORS. THIS MODEL IS INDEPENDENT OF THE INDIVIDUAL OPERATOR AND TYPE OF WORK BEING DONE AND CORRECTLY PREDICTED 46% OF OBSERVED ERRORS. (MEA) 3P, OR.

PROGRAMMER PRODUCTIVITY
CHAMPINE, G.A. ESTIMATING METHODS AND MEASURES OF PROGRAMMER PRODUCTIVITY
(TECHNICAL REPORT). ROSEVILLE, MINNESOTA: SPERRY-UNIVAC, MAY 1973.
DESCRIPTION:

THE PURPOSE OF THIS PAPER IS TO REVIEW SEVERAL QUANTITATIVE MODELS FOR THE PROGRAMMING PROCESS. THE BASIS OF THE PARAMETERS IN THESE MODELS IS A RATHER CONSIDERABLE AMOUNT OF HISTORICAL WORK THAY HAS BEEN DONE IN THE AREA OF PROGRAMMING MANAGEMENT. THE PURPOSE OF THE MODELS IS TO PERMIT RELIABLE ESTIMATIONS TO BE MADE OF COST, SCHEDULE AND MANPOWER RESOURCES REQUIRED TO PERFORM A GIVEN PROGRAMMING JOB. A SECONDARY OBJECTIVE OF THE MODELS IS TO PROVIDE ADEQUATE STANDARDS OF PERFORMANCE BY WHICH PROJECT PERFORMANCE MAY BE COMPARED AFTER THE FACT. THE PARAMETERS OF THE JOB, PROGRAMMER AND WORKING ENVIRONMENT ARE REVIEWED AND THOSE WHICH CORRELATE WITH COST AND SCHEDULE ARE IDENTIFIED AND RELATED IN A QUALITATIVE MANNER. (A, ABBR.) 25P, 3R.

63 PROGRAMMER PRODUCTIVITY
CHAMPINE, G.A., & CARLSON, W.H. PROGRAMMER PRODUCTIVITY (TECHNICAL REPORT).
ROSEVILLE, MINNESOTA: SPERRY-UNIVAC, UNDATED.
DESCRIPTION:

ONE OF THE KEY ISSUES IN MANAGEMENT OF SOFTWARE IS THE ESTIMATION, PREDICTION, AND CONTROL OF PROGRAMMING PRODUCTIVITY. THE TOPIC OF PROGRAMMING PRODUCTIVITY MAY BE DIVIDED INTO THE TOPICS OF IDENTIFICATION OF FACTORS AFFECTING PRODUCTIVITY ESTIMATION OF PRODUCTIVITY FACTORS PREDICTION OF PROGRAMMING COST AND SCREDULE TECHNICAL METHODS OF IMPROVING PRODUCTIVITY

MANAGEMENT TECHNIQUES FOR IMPROVING PRODUCTIVITY

EACH OF THESE TOPICS IS REVIEWED WITH RESPECT TO THE LITERATURE, AND CURRENT PRACTICE AS IT EXISTS IN INDUSTRY AND IN THE ROSEVILLE DEVELOPMENT CENTER.

A NUMBER OF STATISTICAL STUDIES HAVE BEEN DONE ON PROGRAMMING PRODUCTIVITY, BUT THEIR USE IN ACTUAL PRACTICE HAS BEEN VERY LIMITED. NOVEVER, PRODUCTIVITY HAS BEEN SUBSTANTIALLY IMPROVED THE LAST FEW YEARS MICHOUGH THE WIDESPREAD USE OF INTERACTIVE TERMINALS, STRUCTURED PROGRAMMING, IMPROVED CEBUGGING FOOLS, AND BETTER MANAGEMENT TECHNIQUES. UNFORTUNATELY, THE ENTIRE ISSUE IS CLOUDED BY THE LACK OF A SUITABLE STANDARD OF MEASURE. (A)

66 FLOWCHARTING
CHAPIN, N. NEW FORMAT FOR FLOWCHARTS. SOFTWARE PRACTICE AND EXPERIENCE,
1974, 4, 341-357.
DESCRIPTION:

THIS PAPER PROPOSES A NEW CHART FORMAT AS AN ALTERNATIVE FOR THE FLOW DIAGRAM VARIETY OF ELGACHART. THIS NEW CHART FORMAT IS MORE INFORMATIVE, MORE COMPACT AND EASIER TO USE AND DRAW THAN THE ANS FORMAT, AND FACILITATES MODULARIZATION IN DESIGN AND PROGRAMMING. THE NEW CHART FORMAT SUPPORTS RESTRICTIONS ON CONTROL TRANSFERS, AND CLEARLY IDENTIFIES THE CONTROL STRUCTURES USED IN STRUCTURED PROGRAMMING. THE NEW CHART FORMAT ALSO PERMITS SHOWING MULTIPLE LEVELS OF DETAIL UNAMBIGUOUSLY IN A SINGLE FLOWCHART, AND ENABLES HIPO CHARTS AND SYSTEM CHARTS TO BE USEFULLY AUGMENTED. (A) 17P, 12R.

67 PROGRAM SYNTHESIS

The state of the s

CHATELIN, P. SELF-REDEFINITION AS A PROGRAM MANIPULATION STRATEGY. IN PROCEEDINGS OF THE ACM SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND PROGRAMMING LANGUAGES, SIGPLAN NOTICES, AUGUST 1977, 12(8), 174-179 (ALSO: SIGART MEWSLETTER, AUGUST 1977, NO. 64, 174-179). DESCRIPTION:

The second secon

THIS IS AN EXPLORATION OF A CONSTIUCTIVE STRATEGY FOR PROGRAM IMPROVEMENT AND SYNTHESIS. A FIRST PART RECALLS UNFOLDING-FOLDING STYLE OF MANIPULATIONS INITIATED BY BURSTALL AND DARLINGTON WITH AN APPLICATION TO PROOFS OF EQUIVALENCE OF CERTAIN FUNCTION COMPOSITIONS. SECOND PART, IN A MORE AGSTRACT WAY, PRESENTS THREE BASIC "FORMS" AND THEIR ASSOCIATED "TRANSFORMS" CONSTRUCTED WITH THIS STRATEGY IN A HIERARCHICAL ORDER; THEY MAY SERVE AS GOALS OF TRANSFORMATIONS. LAST PART ASSOCIATES SELF-REDEFINITION TO MIXED STRATEGIES FOR PROGRAM COMPOSITION: SYMBOLIC MACRO REPLACEMENT, LOGARITHMIC SPEED UP, RESOLUTION OF FORMAL RECURRENCES. EACH SITUATION, WHERE TECHNIQUE AND METHOD APPLY, IS DEPICTED ON EXAMPLES AND OPEN PROBLEMS ARE EVOKED. (A)

58 INTELLIGENT TERMINALS

CHEN, T.C. DISTRIBUTED INTELLIGENCE FOR USER-ORIENTED COMPUTING. AFIPS COMFERENCE PROSEEDINGS, 1972, 41, 1949-1056. DESCRIPTION:

THE PRIMITIVES USED BY THE COMPUTER DESIGNER HAVE BLOSSOMED FROM THE SINGLE LOGICAL CONNECTIVES OF YWO DECADES AGO, INTO CHIPS CONTAINING THOUSANDS OF CIRCUITS AND BITS. YET, THE QUANTITATIVE ASPECT OF THE ACHIEVEMENT, IMPOSING AS IT IS, SIGNIFIES LESS THAN THE QUALITATIVE INJECTION OF MACHINE INTELLIGENCE DOWN TO THE CHIP LEVEL. WITH THE CONSEQUENT FREEDOM TO DISTRIBUTE COMPUTING POWER, MACHING DESIGN ENTERS A NEW ERA.

WE ASSERT THAT VERY POWERFUL EXTENSIBLE SYSTEMS, BASED ON THE LOOSE-COUPLING OF NESTED AUTONOMOUS HODGLES, CAN HARMONIZE WITH THE HAPDWARE TRENDS AND BE DIRECTED TOWARD NUMANMORIENTED, INTERPRETIVE COMPUTING. THE KEY TO PERFORMANCE IS SELF-OPTIMIZATION CONDUCTED THROUGHOUT THE POLYCENTRIC SYSTEM. (A)

70 NATURAL LANGUAGE PROGRAMMING
CHODOROW, M.S., & MILLER, L.A. THE INTERPRETATION OF TEMPORAL ORDER IN
COORDINATE CONJUNCTION (TECHNICAL REPORT NO. RC 6199). YORKTOWN HEIGHTS, NEW
YORK: IBM THOMAS J. WATSON RESEARCH CENTER, 1976.
DESCRIPTION:

THIS PAPER PROVIDES A NON-CONTEXTUAL 4NALYSIS OF THE TEMPORAL ORDER OF ACTIONS THAT ARE EXPRESSED AS COORDINATELY CONJOINED VERBS. ALTHOUGH THE ANALYSIS IS DEVELOPED TO ACCOUNT FOR PHINOMENA IN A PROCEDURE SPECIFICATION DOMAIN (THE TOOKING RECIPE), ITS PRINCIPLES ARE BELIEVED TO BE GENERALLY APPLICABLE. COOKING INSTRUCTIONS CONTAINING A PAIR OF CONJOINED VERBS ARE INTERPRETED AS REQUIRING THE TWO ACTIONS TO BE PERFORMED EITHER CONSECUTIVELY OR SIMULTANEOUSLY. IF THE ACTIONS ARE COMPATIBLE, THEY MAY BE EXECUTED SIMULTANEOUSLY; IF THEY ARE INCOMPATIBLE, THEY MUST BE EXECUTED CONSECUTIVELY. COMPATIBILITY IS DEFINED IN TERMS OF PRECONDITIONS AND ON-GOING CONDITIONS FOR ACTIONS. CONSECUTIVE ACTIONS ARE GIVEN ACCOMPANIED BY INTERACTION EFFECTS WHICH CAN BE ATTRIBUTED TO PARTIALLY OR INCORRECTLY FULFILLED PRECONDITIONS. PRECONDITIONS AND COMPATIBILITY PROVIDE THE FRAMEWORK FOR A SUFFICIENT SOLUTION TO ONE TYPE OF INTERACTION PROBLEM. THE SET OF PRE- AND ON-GOING CONDITIONS FOR AN ACTION IS ENTAILED BY THE VERB WHICH EXPRESSES THAT ACTION. THIS ENTAILMENT RELATIONSHIP IS CONSISTENT WITH THE GENERAL REQUIREMENTS FOR A NON-CONTEXTUAL SOLUTION TO THE INTERPRETATION OF TEMPORAL ORDER. PREVIOUS LINGUISTIC APPROACHES CANNOT ACCOUNT FOR SIMULTANEOUS ACTIONS OR FOR INTERACTION PHENOMENA. (A)

71 DESIGN METHODOLOGY
CHU, Y. A METHODOLOGY FOR SOFTWARE ENGINEERING. IEEE TRANSACTIONS ON SOFTWARE
ENGINEERING, 1975, SE-1, 262-270.
DESCRIPTION:

THIS PAPER PRESENTS A METHODOLOGY FOR SOFTWARE ENGINEERING. THIS METHODOLOGY RECOGNIZES THE EXISTENCE OF TWO SEPARATE AND DISTINCTIVE PHASES (ARCHITECTURE AND IMPLEMENTATION) OF A SOFTWARE ENGINEERING TASK. THESE TWO PHASES ARE INTERFACED BY A FORMALIZED BUT DESCRIPTIVE DESIGN SPECIFICATION DESCRIBED BY A LANGUAGE CALLED ADL (ARCHITECTURAL DESIGN LANGUAGE). THIS ADL DESCRIPTION WOULD SERVE A SIMILAR PURPOSE AS THAT SERVED BY THE BLUEPRINT. IMPLEMENTATION CAN THEN BE ACCOMPLISHED FROM THE "SOFTWARE BLUEPRINT" IN ANY OF THREE POSSIBILITIES: SOFTWARE, HARDWARE, OR MICROWARE. DESIGN OF A LEXICAL SCANNER IS CHOSEN AS AN EXAMPLE TO THE POSSIBLESTRATE THIS METHODOLOGY. (A)

- 72 SOFTWARE ENGINEERING: PROBLEMS AND FUTURE DEVELOPMENTS (PEPORT NO. MTR-2791). BEDFORD, MASSACHUSETTS: MITRE CORP., NOVEMBER 1974.

74 SOFTWARE DEVELOPMENT PROJECT MANAGEMENT
CLAPP, J.A., & SULLIVAN, J.E. AUTOMATED MONITORING OF SOFTWARE QUALITY. AFTPS
CONFERENCE PROCEEDINGS, 1974, 43, 337-341.
DESCRIPTION:

ALTHOUGH SOFTWARE COSTS ARE FREQUENTLY DESCRIBED AS "HIGH," ALL WE REALLY KNOW FOR SURE IS THAT FOR LARGE SOFTWARE SYSTAMS WE DO NOT KNOW HOW TO ESTIMATE COST, THE RELATION BETWEEN COST AND QUALITY, OR HOW TO MEASURE QUALITY. THE PRINCIPAL PROBLEM IS THE LACK OF APPLICABLE MEASURES AND MEASURE-RELATING THEOREMS THAT WOULD BE USEFUL IN PLANNING AND CONTROLLING SOFTWARE DEVELOPMENT. THIS PAPER DESCRIBES SIMON, A PROPOSED AUTOMATED AND THAT EXTRACTS MEASURES THROUGHOUT THE SOFTWARE IMPLEMENTATION EFFORT AND PROVIDES ANALYSES OF THE DATA TO MANAGERS AND PROGRAMMERS. (MEA) 5P, 6R.

DESCRIPTION:

The state of the s

"PROBLEMS FACED BY PROGRAMMERS WHO MUST MAINTAGE PROGRAMS SOMEOME ELSE WROTE" WERE IDENTIFIED. THEY WERE REDUCED TO THREE FUNDAMENTAL INHIBITING FACTORS: (1) THE LIMITED RATE AT WHICH PEOPLE CAN MAKE "RELEVANCE TESTS," (2) OVER-CONFIRMATION IN CLUES REQUIRED BEFORE HYPOTHESIS-TESTING, AND (3) HUMAN WULNIGHBILITY TO DISTRACTION AND PROCRASTINATION. STUDIES SUGGESTED COLLECTIVELY BY THESE FACTORS WERE CONDUCTED. THE STUDIES (1) ASCERTAINED THAT PROGRAMMERS TEND TO THINK IN TERMS OF CONCEPTUAL GROUPINGS WHOSE OBJECTIVE IDENTIFICATION WOULD BE HELFFUL, (3) INDICATED THAT IT WAS FEASIBLE TO TRACE THE PATH THE PROGRAMMER TAKES AS HE PREPARES TO MAKE A MODIFICATION, AND (3) IDENTIFIED A FEW TENTATIVE REASURES OF THE DEGREE OF MAINTAINABILITY OF COMPUTER PROGRAMS. WE SUGGEST THAT THE CONCEPT OF A STRATEGY CAM PROFITABLY BE VIEWED AS KNOWLEDGE ABOUT HOW TO SELECT FROM AMONG A SET OF PLAUSIBLY USEFUL KNOWLEDGE SOURCES, AND EXPLORE THE FRAMEWORK FOR KNOWLEDGE ORGANIZATION WHICH THIS IMPLIES. HE DESCRIBE META RULES, A MEANS OF ENCODING STRATEGIES THAT HAS BEEN INPLEMENTED IN A PROGRAM CALLED TEIZESIAS, AND EXPLORE THEIR UTILITY AND CONTIDUITION TO PROBLEM SOLVING PERFORMANCE. META RULES ARE ALSO CONSIDERED IN THE BROADER CONTEXT OF A TOOL FOR PROGRAMMING. HE SHOW THAT THEY CAN BE CONSIDERED A MEDIUM FOR EXPRESSING THE CRITERIA FOR RETRIEVAL OF KNOWLEDGE SOURCES IN A PROGRAM, AND HENCE, CAN BE USED TO DEFINE CONTROL REGIMES. THE UTILITY OF THIS AS A PROGRAMMING MECHANISM IS CONSIDERED.

FINALLY, WE DESCRIBE THE TECHNIQUE OF CONTENT-DIRECTED INVOCATION USED BY META RULES, AND CONSIDER ITS USE AS A WAY OF IMPLEMENTING STRATEGIES. IT IS ALSO CONSIDERED IN HISTORICAL PERSPECTIVE AS A KNOWLEDGE SOURCE INVOCATION TECHNIQUE, AND ITS ADVANTAGE OVER SOME EXISTING MECHANISMS LIKE GOAL-DIRECTED INVOCATION IS CONSIDERED. (A) 10P, 24R.

DIJKSTRA, E.W. THE HUMBLE PROGRAMMER. COMMUNICATIONS OF THE ACM, 1972, 15, 859-366.

DESCRIPTION:

The second section of the second second

THIS ARTICLE PRESENTS A BRIEF REVIEW OF THE HILTORY OF PROGRAMMING VIA FIVE *MILESTONE * PROJECTS -- MAINLY THE INTRODUCTION OF SEVERAL PROGRAMMING LANGUAGES. HARDWARE LIMITATIONS IN EARLY MACHINES RESULTED IN PROGRAMMERS RELYING ON A VARIETY OF 'CLEVER TRICKS." A CHIEF CONSIDERATION OF EARLY PROGRAMMING WAS THE OPTIMIZATION OF COMPUTATIONAL EFFICIENCY. THE INTRODUCTION OF BETTER HARDWARE HAS ONLY EXPANDED THE USE OF CLEVER TRICKS TO THE POINT THAT WE NOW FACE A CRESIS. SIX ARGUMENTS ARE PRESENTEED TO ALVOCATE A REVERSAL IN THIS TREND AND LEAD TO A REVOLUTION IN SOFTWARE DEVELOPMENT. A "HUMBLE PROGRAMMER" SHOULD APPROACH A TASK WITH FULL APPRECIATION OF ITS DIFFICULTY, USE MODEST AND ELEGANT PROGRAMMING LARGUAGES, AND RESPECT THE LIMITATIONS OF THE HUMAN MIND. (GDC) SP. 6R.

DESCRIPTION:

RECENT SHIFTS IN EMPHASIS HAVE OCCURRED IN THE FIELD OF SOFTWARE DEVELOPMENT. THE PRIMARY REQUIREMENT TO BE MET IN SOFTWARE DEVELOPMENT HAS ALWAYS BEEN TO PERFORM THE FUNCTION SPECIFIED FOR THE SOFTWARE. BUT, WHERE AT ONE TIME SECONDARY EMPHASIS WAS PLACED ONLY ON SOFTWARE FFFICIENCY, TODAY THREE OTHER FACTORS ARE RECOGNIZED AS REQUIRING SPECIAL EMPHASIS -- RELIABILITY, MAINTAINABILITY, AND EXTENSIBILITY. SOFTWARE MAINTENANCE AND MODIFICATION ACCOUNT FOR A SUBSTANTIAL PORTION OF SOFTWARE EXPENDITURES. THIS CAN BE COUNTERACTED BY DESIGNING AND IMPLEMENTING SOFTWARE IN A WAY THAT MINIMIZES ERRORS AND MOXIMIZES MODIFIABILITY. (A, ABBR.) 3P, OR.

96 DATA ORGANIZATION

DURDING, 8.M., BECKER, C.A., & GOULD, J.D. DATA ORGANIZATION. HUMAN FACTORS, 1977, 19, 1-14.

DESCRIPTION:

THREE EXPERIMENTS INVESTIGATED HOW PEOPLE ORGANIZE DATA. SUBJECTS WERE GIVEN SETS OF 15-20 WORDS AND ASKED TO ORGANIZE THEM ON PAPER. EACH WORD SET HAD A PRE-DEFINED ORGANIZATION (HIERARCHY, NETWORK, LISTS, TABLE) SASED ON THE SEMANTIC RELATIONS ANONG THE WORDS. EXPERIMENT 1 SHOWED THAT COLLEGE STUDENTS HAVE ALL THESE ORGANIZATIONAL STRUCTURES AVAILABLE FOR USE. THEY ORGANIZED MOST WORD SETS ON THE BASIS OF THE SEMANTIC RELATIONS INHERENT IN THEM. WHEREAS MOST SUBJECTS USED "APPROPRIATE" ORGANIZATIONS (THOSE THAT MOST EASILY PRESERVED THE RELATIONS), A FEW SUBJECTS ORGANIZED NEARLY ALL WORD SETS INTO LISTS. EXPERIMENT 2 SHOWED THAT SUBJECTS CAN EFFICIENTLY FIT THE WORD SETS INTO "SKELETONS" THAT WERE EXPLICITLY DESIGNED TO MAINTAIN ALL THE SEMANTIC RELATIONS AMONG THE WORDS. EXPERIMENT 3 SHOWED THAT SUBJECTS HAVE DIFFICULTY IN PRESERVING THE RELATIONS AMONG THE WORDS WHEN THEY WERE REQUIRED TO ORGANIZE THEM INTO INAPPROPRIATE STRUCTURES. THESE RESULTS ARE EVALUATED RELATIVE TO THE USE OF COMPUTER-BASED INFORMATION RETRIEVAL SYSTEMS. (A)

178 PROGRAMMING

FAGAN, M. DESIGN AND CODE INSPECTIONS. IBM SYSTEMS JOURNAL, 1976, 15(3), 182-211.

DESCRIPTION:

SUBSTANTIAL NET IMPROVEMENTS IN PROGRAMING QUALITY AND PRODUCTIVITY HAVE BEEN OBTAINED THROUGH THE USE OF FORMAL INSPECTIONS OF DESIGN AND OF CODE. IMPROVEMENTS ARE MADE POSSIBLE BY A SYSTEMATIC AND EFFICIENT DESIGN AND CODE VERIFICATION PROCESS WITH WELL-DEFINED ROLES FOR INSPECTION PARTICIPANTS. THE MANNER IN WHICH INSPECTION DATA IS CATEGORIED AND MADE SUITABLE FOR PROCESS ANALYSIS IS AN IMPORTANT FACTOR IN ATTAINING THE IMPROVEMENTS. IT IS SHOWN THAT BY USING INSPECTION RESULTS, A MECHANISM FOR INITIAL ERROR REDUCTION FOLLOWED BY EVER-IMPROVING ERROR RATES CAN BE ACHIEVED. (A) 30P, 9R.

109 PROGRAM TESTING

FAGAN, M.E. INSPECTING SOFTWARE DESIGN AND CODE. DATAMATION, OCTOBER 1977, 23(10), PP. 133-135; 138; 142-144.

DESCRIPTION:

SUCCESSFUL MAILECMENT OF ANY PROCESS REQUIRES PLANNING, MEASUREMENT, AND CONTROL. IN PROGRAM DEVELOPMENT, THESE REQUIREMENTS TRANSLATE INTO DEFINING THE PROGRAMMING PROCESS IN TERMS OF A SERIES OF OPERATIONS, EACH HAVING ITS OWN EXIT CRITERIA. NEXT THERE MUST BE SOME MEANS OF MEASURING COMPLETENESS OF THE PRODUCT AT ANY POINT OF ITS DEVELOPMENT BY INSPECTIONS AND TESTING. AND FINALLY, THE MEASURED DATA MUST BE USED FOR CONTROLLING THE PROCESS. DESIGN AND CODE INSPECTIONS HAVE BEEN APPLIED SUCCESSFULLY IN SEVERAL PROGRAMMING PROJECTS, BOTH LARGE AND SMALL, AND INCLUDING SYSTEMS AND APPLICATIONS PROGRAMS. THEY HAVE NOT BEEN FOUND TO "GET IN THE MAY" OF PROGRAMMING, BUT INSTEAD ENABLED HIGHER PREDICTABILITY THAN OTHER MEANS AND IMPROVED PRODUCTIVITY AND PRODUCT QUALITY. (A) 6P, DR.

FRANCIS, L. THE TUTOR TRAINING COURSE: LESSONS LEARNED. URBANA-CHAMPAIGN, ILLINOIS: UNIVERSITY OF ILLINOIS, COMPUTER-BASED EDUCATION RESEARCH LABORATORY, 1976.

DESCRIPTION:

THE MILITARY TRAINING CENTERS (MTC) GROUP CREATED AND TAUGHT THE FIRST FORMAL AUTHOR TRAINING COURSE FOR THE TUTOR PROGRAMMING LANGUAGE AND THE USE OF THE PLATO SYSTEM. THE COURSE WAS USED OVER A PERIOD OF THREE YEARS TO TRAIN APPROXIMATELY TO AUTHORS WHO SPENT TWO TO THREE WEEKS AT THE COMPUTER-BASED EDUCATION RESEAPCH LABORATORY (CERL) OF THE UNIVERSITY OF ILLINOIS AT URBAHA-CHAMPAIGN. IN GENERAL, THE NEW AUTHORS HAD LITTLE PREVIOUS EXPERIENCE WITH COMPUTERS OR PROGRAMMED INSTRUCTION. HOWEVER, MANY WERE CLASSROOM INSTRUCTORS.

THIRTEEN COGNITIVE AND AFFECTIVE PRINCIPLES GUIDED THE CREATION OF THE AUTHOR COURSE; FIVE WERE POSITIED ORIGINALLY, AND THE REST WERE FORMULATED BASED ON EXPERIENCE DERIVED FROM TEACHING THE COURSE. THIS REPORT CONTAINS A STATEMENT OF THE PRINCIPLES AND A DESCRIPTION OF THEIR IMPLEMENTATION, INCLUDING MANY EXAMPLES FROM COURSE MATERIALS. IT ALSO RECOUNTS THE HIGHLIGHTS AND TURNING POINTS OF THE AUTHOR TRAINING COURSE, REVIEWS THE BASIS FOR ITS MODIFICATION, AND EXAMINES THE DILEMMAS ENCOUNTFRED IN TEACHING NEW AUTHORS TO PREPARE COMPUTER-BASED INSTRUCTIONAL KATERIALS. TECHNIQUES FOR RESOLVING SOME OF THESE VILEMMAS ARE SUGGESTED.

THE PTC TRAINING COURSE WAS EVALUATED BY EXAMINING THE EXPERIENCE OF USERS OUTSIDE OF MTC. THE OPINIONS AND RECOMMENDATIONS OF THESE OUTSIDE GROUPS SUGGEST YHAT THEY FOUND THE MATERIALS VALUABLE AND EFFECTIVE. THIS REPORT IS DIRECTED TO INSTRUCTORS OF NEW AUTHORS, DEVELOPERS OF AUTHOR TRAINING MATERIALS, AND MANAGERS OF COMPUTER-BASED INSTRUCTION DEVELOPMENT CENTERS. (A)

AND THE PROPERTY OF THE PROPER

THE COURSE PROVIDES AN INTRODUCTION TO COMPUTER PROGRAMMING FOR COMMUNITY COLLEGE STUDENTS WHO HAVE TAKEN HIGH SCHOOL ALGEBRA, AND IT IS EQUIVALENT TO A THREE QUARTER-UNIT COURSE IN COMPUTER SCIENCE. ALL INSTRUCTION IS PRESENTED BY COMPUTER, AND A SUPPLEMENTARY STUDENT MANUAL IS PROVIDED FOR REFERENCE. THE COURSE CONTENT RESEMBLES THAT OF OTHER INTRODUCTORY COURSES IN COMPUTER PROGRAMMING AND INCLUDES THE TOPICS OF STORED PROGRAMS, USE OF FUNCTIONS AND SUBROUTINES, CONDITIONAL CLAUSES, AND BRADY IN NG TECHNIQUES. THE INSTRUCTIONAL SYSTEM IMPLEMENT UNDER COMPUTER CLATROL TEACHING STRATEGIES THAT MIGHT BE USED BY A HUFA! TUTOR SUCH AS INDIVIDUALIZING THE CONTENT, PACE, AND SEQUENCE FINSTRUCTION, ALLOWING FOR SUFFICIENT STUDENT CONTENT, PACE, AND SEQUENCE FINSTRUCTION, ALLOWING FOR SUFFICIENT STUDENT CONTENT, TAILORING WRONG ANSJER MESSAGES, AND PROVIDING BOTH REMEDIAL AND EXTRA-SREDIT WORK. STUDENTS ARE REQUIRED TO INTERACT ON—LINE WITH A COMPRECIALLY PREPARED FOITOR—INTERPRETER SIMILAR TO THOSE FOUND IN MANY TIME-SHARING ENVIRONMENTS.

PERFORMANCE DATA FROM BOTH THE INSTRUCTIONAL PROGRAM AND THE EDITOR-INTERPRETER ARE AUTOMATICALLY STORED FOR LATER RETRIEVAL AND ANALYSIS. THE DRGANIZATION OF THE COURSE, TYPES OF EXERCISES USED, AND CONTENT OF EACH LESSON ARE DOCUMENTED AND AN APPENDIX LISTS THE CONCEPTS ASSOCIATED WITH EACH EXERCISE IN THE COURSE. (A)

121 COMPUTER-ASSISTED INSTRUCTION
FRIEND, J. PROGRAMS STUDENTS WRITE (TECHNICAL REPORT NO. 257). STANFORD,
CALIFORNIA: STANFORD UNIVERSITY, INSTITUTE FOR MATHEMATICAL STUDIES IN THE
SOCIAL SCIENCES, JULY 1975. (NTIS NO. AD AC15093)
DESCRIPTION:

THE PRESENT STUDY ADDRESSES ITSELF TO THE PROBLEM OF DESIGNING AN AUTOMATED SYSTEM FOR INSTRUCTION IN PROGRAMMING, AND ALSO TO THE STUDY OF PROBLEM-SOLVING BEHAVIOR, AS EXHIBITED BY STUDENTS USING A CAI COURSE IN COMPUTER PROGRAMMING.

THE STUDY USES COMPUTER PROGRAMS WRITTEN BY 45 COLLEGE STUDENTS DURING THE WINTER AND SPRING QUARTERS OF 1972 AS PART OF A CAI COURSE IN AID (ALGEBRAIC INTERPRETIVE DIALOGUE), AN ALGEBRAIC LANGUAGE SIMILAR TO BASIC. THE COURSE IS SELF-CONTAINED AND CONSISTS OF 50 TUTORIAL LESSONS DESCRIBED IN DETAIL IN FRIEND (19736).

THE PROGRAMS ANALYZED WERE WRITTEN AS SOLUTIONS TO 25 PROGRAMMING PROBLEMS FROM THE COURSE; 747 SOLUTIONS COMTAINING 7063 COMMANDS WERE ANALYZED. THE DISTRIBUTION OF THE DATA OVER PROBLEMS AND OVER STUDENTS IS DISCUSSED. PROBLEM DIFFICULTY AND DIVERSITY OF STUDENT SOLUTIONS ARE ALSO DISCUSSED IN DETAIL. (A) 270P, 7R.

122 COMPUTER-ASSISTED INSTRUCTION FRIEND, J.E., FLETCHER, J.D., & AYXINSON, R.C. STUDENT PERFORMANCE IN COMPUTER-ASSISTED INSTRUCTION IN PROGRAMMING (TECHNICAL REPORT NO. 184). STANFORD, CALIFORNIA: STANFORD UNIVERSITY, INSTITUTE FOR MATHEMATICAL STUDIES IN THE SOCIAL SCIENCES, MAY 1972.

AN INSTRUCTIONAL SYSTEM FOR TEACHING ALGEBRAIC INTERPRETIVE DIALOGUE (AID) TO COLLEGE-AGE STUDENTS, TWO CONTROL PROGRAMS (ONE FOR PRESENTING INSTRUCTIONAL MATERIAL AND ONE FOR INTERPRETING STUDENTS' AID PRODUCTIONS), AND DATA COLLECTED BY THE TWO CONTROL PROGRAMS ARE DESCRIBED. THE FIRST 21 LESSONS OF THE COURSE AND CLASSIFICATION OF THE LESSON EXERCISES ARE ALSO DESCRIBED. DATA BASED ON STUDENT DAILY REPORTS ARE PRESENTED AND DISCUSSED. ITEM ANALYSES OF DATA GATHERED BY THE INSTRUCTIONAL PROSRAM, INCLUDING STEPHISE LINEAR REGRESSION MODELS OF ITEM DIFFICULTY AND ANALYSES OF SELECTED DATA COLLECTED BY THE INTERPRETING PROGRAM ARE PRESENTED AND DISCUSSED.

which the first the first

THE FOLLOWING WERE AMONG THE RESULTS OF THIS INVESTIGATION: ALTHOUGH FIRST RESPONSE ERRORS WERE OFTEN THOSE OF AID SYNTAX, THESE ERRORS WERE EASILY COARECTED IN SUBSEQUENT RESPONSES, AND IN GENERAL, THE SYNTAX OF AID COMMANDS WAS EASILY MASTERED; ALTHOUGH STUDENTS EASILY LEARNED THE MECHANICS OF THE INSTRUCTIONAL SYSTEM, THEY RARELY USED FEATURES THAT ALLOWED STUDENT CONTROL OF INSTRUCTIONAL CONTENT AND SEQUENCE; ALGEBRAIC FORMULATION OF PROBLEMS APPEARED TO BE MORE DIFFICULT THAN TRANSFORMING ALGEBRAIC EXPRESSIONS INTO AID COMMANDS; STUDENTS HAD THE GREATEST DIFFICULTY UNDERSTANDING HIERARCHY OF ARITHMETIC OPERATIONS, USE OF FUNCTIONS, AND THE EXECUTION SEQUENCE OF AID COMMANDS. 4P, 7R. THE PURPOSE OF THIS PAPER IS TO CONSIDER HOW PSYCHOLOGICAL THEORIES CAN BE USEFULLY APPLIED TO IMPROVING PROGRAMMING AND PROGRAM DESIGN. THIS PAPER CENTERS ON THE PSYCHOLOGICAL PHENOMENON OF "CHUNKING", OR THE GROUPING OF RELATED PIECES OF INFORMATION INTO A SINGLE UNIT. IT HAS BEEN EXTENSIVELY DEMONSTRATED THAT THE ABOUNT OF INFORMATION THAT THE HUMAN MIND CAN RETAIN AT ANY ONE TIME IS APPROXIMATELY SEVEN "CHUNKS". CHUNKING EXTENDS THE AMOUNT OF INFORMATION THAT CAN BE RETAINED. THE NUMBER OF CHUNKS REMAINS CONSTAGE. THE PROCESSES OF *ABSTRACTION* AND "DECOMPOSITION", WHICH TEND TO RELATE CHUNKS IN A HIERAFCHIC FASHION ARE ALSO CONSIDERED. ON THE BASIS OF THESE RESULTS, ARGUMENTS ARE MADE IN FAVOR OF MODULARITY AND HIERARCHICAL DESIGN ("TOP-DOWN DECOMPOSITION'). (MEA)

FUNAMI, Y., & HALSTEAD, M.H. A SOFTWARE PHYSICS ANALYSIS OF AKIYAMA'S DEBUGGING DATA (TECHNICAL REPORT NO. CSD-TR-144). LAFAYETTE, INDIAWA: PURDUE UNIVERSITY, DEPARTMENT OF COMPUTER SCIENCE, 1975.

CORRELATION BETWEEN E (HALSTEAD'S "MENTAL EFFORT" MEASURE) AND NUMBER OF BUGS OBSERVED IN 9 MODULES REPRESENTING 84 MAN-MONTHS OF PROGRAPMING WAS .982. AKIYAMA'S OBSERVATIONS REPORTED WERE: COPRELATION BETWEEN BUGS AND SIZE OF MODULE WAS .83, CORRELATION BETWEEN BUGS AND DECISIONS AND CALLS WAS .92. PREDICTED TIME TO COMPLETE 9 MODULES WAS 100 MAN-MONTHS AS COMPARED WITH AN ACTUAL 84 MAN-MONTHS. (0)

123 DEBUGGING

GAINES, R.S. THE DEBUGGING OF COMPUTER PROGRAMS (DOCTORAL DISSERTATION, PRINCETON UNIVERSITY, 1969). (UNIVERSITY MICROFILMS NO. 7-14, 209; ALSO IDA WORKING PAPER NO. 226, INSTITUTE FOR DEFENSE ANALYSES) DESCRIPTION:

.

THIS THESIS IS A GENERAL STUDY OF THE TOOLS AND TECHNIQUES FOR DEBUGGING COMPUTER PROGRAMS, AND THE DESIGN OF COMPUTERS AND OPERATING SYSTEMS TO FACILITATE DEBUGGING. IT INCLUDES AN ANALYSIS OF THE PRUGRAMMING PROCESS TO IDENTIFY CAREFULLY WHAT THE PROBLEMS ARE IN DEBUGGING AND HOW THEY ARISE. BASED ON THIS ANALYSIS, THE FUNDAMENTAL NOTIONS WHICH UNDERLIZE FOST DEBUGGING AIDS ARE DENTIFIED. THE FACILITIES THAT ARE CURRENTLY AVAILABLE TO PROGRAMMERS USING BATCH OPERATING SYSTEMS ARE DISCUSSED, AND A NUMBER OF NEW ONES ARE PRESENTED.

OF NEW ONES ARE PRESENTED.

THE PROBLEMS OF DEBUGGING PROGRAMS WRITTEN IN HIGHER-LEVEL LANGUAGES ARE CONSIDERED IN DETAIL, AND THE CONSTRUCTION OF COMPILERS AND PROGRAMMING LANGUAGES FOR DEBUGGING RECEIVES CAREFUL ATTENTION. IN THIS CONNECTION, THE TOPICS OF AUTOMATIC ERROR DETECTION, LANGUAGE FACILITIES WHICH PERMIT THE PROGRAMMER TO INVOKE DEBUGGING AIDS, AND THE COMPILATION OF CODE IN A MANNER APPROPRIATE FOR DEBUGGING THE PROGRAM ARE ALL DISCUSSED. A METHOD IS PROPOSED TO PERMIT THE HIGHER-LEVEL LANGUAGE PROGRAMMER TO DEBUG HIS PROGRAM AS IF THE LANGUAGE HE WROTE HIS PROGRAM IN WERE THE "MACHINE LANGUAGE" OF THE COMPUTER WHICH EXECUTES THE PROGRAM, AS A CONSEQUENCE OF WHICH THE PROGRAMMER CAN RECEIVE THE SAME KIND OF ASSISTANCE THAT IS AVAILABLE TO THE MACHINE LANGUAGE PROGRAMMER.

THE CONSTRUCTION OF INTERACTIVE DEBUGGING SYSTEMS AND OPERATING SYSTEM FEATURES NECESSARY TO SUPPORT ADVANCED DEBUGGING FACILITIES IS DISCUSSED. THREE INTERACTIVE DEBUGGING SYSTEMS ARE CONSIDERED IN DETAIL, INCLUDING ONE WHICH WAS DESIGNED TO WORK WITH CRT CONSOLES. A NUMBER OF NEW IDEAS IN THIS AREA ARE PRESENTED, AND THE CONSIDERABLE ADVANTAGES OF INTERACTIVE DEBUGGING ARE CLEARLY DEMONSTRATED. (A) 170P. 53R.

126 PROGRAMMING LANGUAGES

GANNON, J. LANSUAGE AND COMPILER DESIGN TO ENHANCE RELIABILITY. SIGPLAN NOTICES, 1973, 8(6), 47-49. DESCRIPTION:

THIS BRIEF ARTICLE DESCRIBES THE OBJECTIVES AND INTENDED APPROACH OF A PROJECT TO ISOLATE THE FACTORS THAY MAKE PROGRAMS EASILY UNDERSTOOD AND THE CONSTRUCTS IN A LANGUAGE THAT ARE MOST PRONE TO CAUSE ERRORS. THE THESIS IS THAT A LANGUAGE SHOULD EMPLOY USEFUL AND CHECKABLE REDUNDANCY, MINIMIZE THE USE OF "UNDISCIPLINED CONSTRUCTS," AND EMPLOY CONSTRUCTS AMENABLE TO PROOFS. (GDC)

3P, PR.

127 PROGRAMMING LANGUAGES

GANNON, J.D. LANGUAGE DESIGN TO ENHANCE PROGRAMMING RELIABILITY (TECHNICAL REPORT NO. CSRG-47). TORONTO, ONTARIO: UNIVERSITY OF TORONTO, COMPUTER SYSTEMS RESEARCH GROUP, 1975.
DESCRIPTION:

THE LANGUAGE IN WHICH PROGRAMS ARE WRITTEN CAN HAVE A SUBSTANTIAL EFFECT ON THEIR RELIABILITY. THIS THESIS DISCUSSES THE DESIGN OF PROGRAMMING LANGUAGES TO ENHANCE THE RELIABILITY OF PROGRAMS. IT PRESENTS SEVERAL DESIGN PRINCIPLES, AND THEY APPLIES THEM TO PARTICULAR LANGUAGE CONSTRUCTS. SINCE ONE CANNO LOGICALLY PROVE THE VALIDITY OF SUCH DESIGN PRINCIPLES, EMPIRICAL FYIDENCE IS NEEDED TO SUPPORT OR DISCREDIT THEM. AN EXPERIMENT WAS PERFORMED TO MEASURE THE EFFECT OF NINE SPECIFIC LANGUAGE DESIGN DECISIONS IN ONE CONTEXT. ANALYSIS OF THE FREQUENCY AND PERSISTENCE OF ERRORS SHOWS THAT SEVERAL DECISIONS HAD A SIGNIFICANT IMPACT ON RELIABILITY. 247P, 61R.

128 PROGRAMMING LANGUAGES GANNON, J.D. AN EXPERIMENTAL EVALUATION OF PATA TYPE CONVENTIONS. COMMUNICATIONS OF THE ACM, 1977, 29, 564-595 (4180 TECHNICAL REPORT, COLLEGE PARK, MARYLAND: UNIVERSITY OF MARYLAND, DEPARTMENT OF COMPUTER SCIENCE, 1976). DESCRIPTION:

THE LANGUAGE IN WHICK PROGRAMS ARE WRITTEN CAN HAVE A SUBSTANTIAL EFFECT ON THE RELIABILITY OF THE RESULTING PROGRAMS. THIS PAPER DISCUSSES AN EXPERIMENT THAT COMPARES THE PROGRAMMING PELIABILITY OF SUBJECTS USING A STATICALLY-TYPED LANGUAGE AND A 'TYPELESS' LANGUAGE. ANALYSIS OF THE NUMBER OF ERRORS SHOWS THAT, AT LEAST IN ONE ENVIRONMENT, THE USE OF A STATICALLY-TYPED LANGUAGE CAN INCREASE PROGRAMMING RELIABILITY. DETAILED ANALYSIS OF THE ERRORS MADE BY THE SUBJECTS IN PROGRAMMING SOLUTIONS TO REASONABLY SMALL PROBLEMS SHOWS THAT THE SUBJECTS HAD CIFFICULTY MANIPULATING THE REPRESENTA JON OF DAYA. (A) 34P, 6R.

PROGRAMMING LANGUAGES

GANNON, J.C. AN EXPERIMENT FOR THE EVALUATION OF LANGUAGE FFATURES. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1976, 8, 61-73. DESCRIPTION:

RECENTLY A NUMBER OF EXPERIMENTS HAVE BEEN PERFORMED WHOSE AIM WAS TO COMPARE PROGRAMMING LANGUAGE FEATURES TO DETERMINE WHICH PROGRAMMING LANGUAGE FEATURES PROGRAMMERS FOUND DIFFICULT TO USE. THIS PAPER EXAMINES THESE EXPERIMENTS IN LIGHT OF THE EVIDENCE THAT PROGRAMMING LANGUAGE DESIGNERS WOULD FIND MOST USEFUL. A NEW EXPERIMENT IS DESCRIBED AND APPLIED TO THE PROBLEM OF WHETHER THE ASSIGNMENT OPERATION SHOULD BE DEFINED AS AN OPERATOR OR A STATEMENT DESIGNATOR. EMPIRICAL EVIDENCE IN THE FORM OF ERRORS MADE BY STUDENTS PROGRAMMING SOLUTIONS TO TWO GOOD-SIJED PROBLEMS IS PRESENTED FAVORING THE USE OF ASSIGNMENT AS A STATEMENT. FINALLY, THE SHORTCOMINGS OF THE NEW EXPERIMENT ARE DISCUSSED. (A) 13P, 15R.

PROGRAMMING LANGUAGES GANNON, J.D., & HORNING, J.J. LANGUAGE DESIGN FOR PROGRAMMING RELIABILITY. IEEE TRANSACTION ON SOFTWARE ENGINEFRING, 1975, SE-1, 179-191 (ALSO: THE IMPACT OF LANGUAGE DESIGN ON THE PRODUCTION OF RELIABLE SOFTWAPE. IN PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON RELIABLE SOFTWARE, 21-23 APRIL 1975, LOS ANGELES, CALIFORNIA. SIGPLAN NOTICES, 1975, 10(6), 10-22.) DESCRIPTION:

THE LANGUAGE IN WHICH PROGRAMS ARE WRITTEN CAN HAVE A SUBSTANTIAL EFFECT ON THEIR RELIABILITY. THIS PAPER DISCUSSES THE DESIGN OF PROGRAMPING LANGUAGES TO ENHANCE RELIABILITY. IT PRESENTS SEVERAL GENERAL DESIGN PRINCIPLES, AND THEN APPLIES THEM TO PAPTICULAR LANGUAGE CONSTRUCTS. SINCE WE CANNOT LOGICALLY PROVE THE VALIDITY OF SUCH DESIGN PRINCIPLES, EMPIRICAL EVIDENCE IS NEEDED TO SUPPORT OR DISCREDIT THEM. GANNON HAS PERFORMED A MAJOR EXPERIMENT TO MEASURE THE EFFECT OF NINE SPECIFIC LANGUAGE DESIGN DECISIONS IN ONE CONTEXT. ANALYSIS OF THE FREQUENCY AND PERSISTENCE OF ERRORS SHOWS THAT SEVERAL DECISIONS HAD A SIGNIFICANT IMPACT ON RELIABILITY. (A) 13P, 44k.

138 PROGRAMMING
GILEADI, A.M., & LEDGARD, H.F. ON A PROPOSED MEASURE OF PROGRAM STRUCTURE.
SIGPLAN NOTICES, MAY 1974, 9(5), 31-36.
DESCRIPTION:

AN IMPORTANT PROBLEM IN QUALITY SOFTWARE RESEARCH IS THE MEASUREMENT OF CERTAIN OBJECTIVE PROPERTIES OF PROGRAMS. WE ARE CONCERNED HERE WITH A MEASURE THAT WE HOPE WILL TELL US HOW "WELL-STRUCTURED" A PARTICULAR FLOWSHART 35 WITH RESPECT TO THE PRECEPTS OF STRUCTURED PROGRAMMING.

WITH SUCH A REASURE, WE COULD DETERMINE WHICH OF SEVERAL FLOWCHARTS USED TO DESCRIBE A PROGRAM IS BEST FROM A STRUCTUPAL POINT OF VIEW, RATHER THAN FROM THE CLASSICAL VIEWPOINTS: THE LEAST COMPUTATION TIME OR THE LEAST AMOUNT OF STORAGE NEEDED. TO ARRIVE AT THE PROPOSED MEASURE, WE PROCEED EXAMPLE. (A)

OP, 9R.

139 PROGRAMMING

AND THE PROPERTY OF THE PROPER

GINSBERG, A.S., HARKOWITZ, H.M., & GLDFATHER, P.M. PROGRAMMING BY QUESTIONNAIRE (TECHNICAL REPORT NO. RM-4460-PR). SANTA MONICA, CALIFORNIA: THE RAND CORPORATION, 1965. DESCRIPTION:

IT HAS BECOME CLEAR THAT GREAT AMOUNTS OF EFFORT AND TIME ARE REQUIRED TO PREPARE THE NECESSARY COMPUTER PROGRAMS IN THE USE OF DIGITAL COMPUTERS FOR SIMULATION STUDIES. A TECHNIQUE FOR REDUCING THIS EFFORT AND PROGRAM PREPARATION TIME HAS BEEN DEVELOPED. THIS TECHNIQUE, "PROGRAMMING BY QUESTIONNAIRE" FOR THE PROGRAM GENERATION CONCEPT) ALLOWS A USER TO OBTAIN A SIMULATION PROGRAM BY FILLING OUT AN ENGLISH LANGUAGE QUESTIONNAIRE. THIS APPROACH HAS SUFFICIENT GENERALITY THAT IT PROPISES APPLICATION TO AREAS OF COMPUTER PROGRAMMING OTHER THAN SIMULATION.

THIS MEMORADUM DESCRIBES THE QUESTIONNAIRE TECHNIQUE, COMPARES IT TO EXISTING TECHNIQUES, AND DISCUSSES POTENTIAL APPLICATIONS. THE WORKINGS OF THE TECHNIQUE ARE DESCRIBED IN TERMS OF THE JOB SHOP SIMULATION PROGRAM GENERATOR, AN EXAMPLE DEVELOPED TO TEST THE FEASIBILITY AND DESIRABILITY OF THE CONCEPT.

PROGRAMMING BY QUESTIONNAIRE SHOULD BE OF INTEREST TO ALL THOSE CONCERNED WITH DEVELOPING MAJOR COMPUTER PROGRAMS. (A)

and the second of the second o

GOLD, Nom. A RETHODOLOGY FOR EYALUAYING TIME-SHARED COMPUTER SYSTEM USAGE. UNPUBLISHED DOCTORAL DISSERVATION, MASSACHUSEVTS INSTITUTE OF TECHNOLOGY, CAMBRIDGE, MASSACHUSETTS, JUNE 1967. BESCRIPTION:

THE DEVELOPMENT OF TIME-SHARED COMPUTER SYSTEMS HAS LED TO MAJOR TECHNICAL AND PHILOSOPHIC CHANGES IN THE COMPUTER FIELD WHIS DECADE. A LARGE NUMBER OF DESIGNERS, MANUFACTURERS, AND USERS OF SUCH SYSTEMS HAVE EXPENDED GREAT AMOUNTS OF REFFORT IN THE DEVELOPMENT OF THE CAPABILITIES OF THE COMPUTER AND THE MEANS TO USE IT. HOWEVER, LITTLE OR NO EFFORT HAS YET BEEN EXPENDED TO EVALUATE THESE SYSTEMS IN TRANS OF THEIR USEFULNESS FOR PRESENT OR FUTURE CUSTOMERS.

The same and the second control of the secon

THE RESEARCH REPORTED HERE HAS FOCUSED ON THE DEVELOPMENT OF A METHODOLOGY THROUGH WHICH TIME-SHARED COMPUTER SYSTEM USAGE CAN BE EVALUATED. IT IS BASED ON A STUDY OF THE CHARACTERISTICS AND DESIGN OF PRESENT AND PROPOSED COMPUTER SYSTEMS, AS WELL AS RELEVANT BEHAVIORAL THEORY AND RESEARCH. FOUR CATEGORIES OF VARIABLES ARE INCLUDED IN THE RESULTING THE METHODOLOGY, NAMELY THOSE WHICH ARE MEASURES OF: (1) THE COST OF USING THE SYSTEM, (2) THE PERFORMANCE PRODUCED THROUGH USE OF THE COMPUTER SYSTEM, (3) THE SPEED WITH WHICH RESULTS COULD BE PRODUCED, AND (4) THE AMOUNT OF LEARNING RESULTING FROM THE USE OF THE COMPUTER SYSTEM.

THE METHODOLOGY DEVELOPED WAS TESTED EXPERIMENTALLY THROUGH EVALUATING USAGE OF TWO COMPUTER SYSTEMS, EACH EXKIBITING CERTAIN CHARACTERISTICS OF BOTH TIME-SHARING AND BATCH-PROCESSING. THE PRIMARY PROBLEM UNDER STUDY WAS THE EFFECT OF RAPID FEEDBACK AND UNLIMITED COMPUTER ACCESS IN A PROBLEM-SOLVING SITUATION --- THE SECONDARY INVESTIGATION INVOLVED THE EFFECT OF QUALITATIVELY DIFFERENT FEEDBACK UPON COMPUTER PROGRAMMING. (A) 152P, 87R.

141 TIME-SHARENG VERSUS BATCH PROCESSING

GOLD, M.M. TIME-SHARING AND BATCH-PROCESSING: AN EXPERIMENTAL COMPARISON OF THEIR VALUES IN A PROBLEM-SOLVING SITUATION. COMMUNICATIONS OF THE ACM, 1969, 12, 249-259.

DESCRIPTION:

TOXONO INTEREST OF CONTROL OF CON

AN EXPERYMENTAL COMPARISON OF PROBLEM-SCLVING USING TIME-SHARING AND BATCH-PROCESSING COMPUTER SYSTEMS CONDUCTED AT MIT IS DESCRIBED IN THIS PAPER. THIS STUDY IS THE FIRST KNOWN ATTEMPT TO EVALUATE TWO SUCH SYSTEMS FOR WHAT MAY WELL BE THE PREDOMINANT USEP POPULATION WITHIN THE NEXT DECADE --- THE PROFESSIONALS WHO, AS NONPROGRAMMERS, ARE USING THE COMPUTER AS AN AID IN DECISION-MAKING AND PROBLEM-SOLVING RATHER THAN AS A PROGRAMMING END IN 175ELF.

STATISTICALLY AND LOGICALLY SIGNIFICANT RESULTS INDICATE EQUAL COST FOR USAGE OF THE TWO COMPUTER SYSTEMS; HOWEVER, A MUCH HIGHER LEVEL OF PERFORMANCE IS ATTAINED BY TIME-SHARING USERS. THERE ARE INDICATIONS THAT SIGNIFICANTLY LOWER COSTS WOULD HAVE RESULTED IF THE TIME-SHARING USERS HAD SYOPPED WORK WHEN THEY REACHED A PERFORMANCE LEVEL EQUAL TO THAT OF THE BATCH USERS. THE USERS SPEED OF PROBLEM-SOLVING AND THEIR ATTITUDES MADE TIME-SHARING THE MORE FAVORABLE SYSTEM. (A)

142 TIME-SHARING

SOFTWARE DEVELOPMENT GOLDBERG, A. (ED.) PROCEEDINGS OF A SYMPOSIUM ON THE HIGH COST OF SOFTWARE. MENLO PARK, CALIFORNIA: STANFORD RESEARCH INSTITUTE, SEPTEMBER 1973. DESCRIPTION:

THE MONTEREY SYMPOSIUM ON THE HIGH COST OF SOFTWARE WAS HELD IN SEPTEMBER 1973, UNDER THE JOINT SPONSORSHIP OF THE AIR FORCE OFFICE OF SCIENTIFIC RESEARCH, THE ARMY RESEARCH OFFICE, AND THE OFFICE OF NAVAL RESEARCH.
OBJECTIVE C: THE SYMPOSIUM WAS TO CONSIDER WHAT RESEARCH IS NEEDED TO ACHIEVE A MAJOR REDUCTION IN SOFTWARE COSTS. ATTENDANCE WAS BY INVITATION. THE 97 ATTENDEES WERE ORGANIZED IN FIVE WORKSHOPS.

atended in the first and a few modern and the second of th

THE ATTENDEES WERE IN STRONG AGREEMENT THA? DIRECT AND INDIRECT SOFTWARE COSTS ARE UNNECESSARILY HIGH AND ARE GROWING RAPIDLY, THAT THEY CONSTITUTE A SERIGUS LIMITATION ON THE EFFECTIVENESS OF INFORMATION-PROCESSING SYSTEMS, AND THAT THE HIGH COST IS A CONSEQUENCE OF THE POOR STATE OF THE ART OF SOFTWARE DESIGN, PRODUCTION, AND MAINTENANCE. THERE WAS A STRONG FEELING OF URGENCY THAT AN ENERGETIC PROGRAM OF RESEARCH BE UNDERTAKEN TO ADVANCE THE SOFTWARE ART.

THE WORKSHOP DISCUSSIONS RESULTED IN TWO SETS OF RECOMMENDATIONS FOR A SERVICE-SUPPORTED RESEARCH PROGRAM.

THE GENERAL RECOMMENDATIONS FOR THE OBJECTIVES OF THE PROGRAM WERE TO: *OVERCOME PROBLEMS AT THE CRUCIAL INTERFACES OF COMPUTER SCIENCE, APPLICATIONS, AND COMPUTER HARDWARE AND SYSTEMS.

*FOSTER THE DEVELOPMENT OF A STRENGTHENED SERVICE TECHNOLOGY BASE IN SOFTWARE AND COMPUTER SYSTEMS.

*COORDINATE SERVICE-SUPPORTED RESEARCH WITH OTHER GOVERNMENT-SUPPORTED RESEARCH AND DEVELOPMENT.

*INCREASE THE SCALE AND QUALITY OF COMPUTER RESEARCH TO MEET PRESENT AND FUTURE DEMANDS.

TEN SPECIFIC TECHNICAL AREAS OF RESEARCH WERE RECOMMENDED IN THREE MAJOR CATEGORIES:

*TECHNIQUES FOR IMPROVING CURRENT PROGRAMMING PRACTICE. *TECHNIQUES FOR ADVANCING PROGRAMMING METHODOLOGY.

*TECHMIQUES FOR PROGRAM GENERATION AND COMPUTER SYSTEM DESIGN.

THE PROCEEDINGS OF THE SYMPOSIUM CONTAIN REPORTS BY THE WORKSHOP CHAIRMAN IN FIVE AREAS:

*UNDERSTANDING THE SOFTWARE PROBLEM (CHAIRED BY JOHN B. SLAUGHTER)

*CONYRIBUTIONS FROM THE SEMANTICS OF LANGUAGES AND SYSTEMS (JACK B. DENNIS)

MADVANCES IN SOSTWARE METHODOLOGY (WILLIAM A. WULF)

*SOFTWARE-RELATED ADVANCES IN COMPUTER HARDWARE (UGO O. GAGLIARDI)

*APPROACHES TO THE PROBLEMS OF LARGE SYSTEMS (JAMES H. BURROWS)

THESE PROCEEDINGS ALSO INCLUDE A SUMMARY OF A KEYNOTE SPEECH ON THE HIGH COST OF SOFTWARE AND A REPORT OF A PANEL ON SOFTWARE TECHNOLOGY TRANSFER. DIGESTS OF THE REPORTS AND THE SPEECH ARE INCLUDED, TOGETHER WITH

SUMMARIES OF THE RECOMMENDATIONS OF THE INDIVIDUAL WORKSHOPS. (A) 138P, 39k.

PROCEEDINGS OF 1975 INTERNATIONAL CONFERENCE ON RELIABLE SOFTWARE, 21-23 APRIL
1975, LOS ANGELES, CALIFORNIA. SIGPLAN NOTICES, JUNE 1975, 10(6), 493-510).
DESCRIPTION:

THIS PAPER EXAMINES THE THEORETICAL AND PRACTICAL ROLE OF TESTING IN SOFTWARE DEVELOPMENT. WE PROVE A FUNDAMENTAL THEOREM SHOWING THAT PROPERLY STRUCTURED TESTS ARE CAPABLE OF DEMONSTRATING THE ABSENCE OF ERRORS IN A PROGRAM. THE THEOREM'S PROOF HIMGES ON OUR DEFINITION OF TEST RELIABILITY AND VALIDITY, BUT ITS PRACTICAL UTILITY HIMGES ON BEING ABLE TO SHOW WHEN A TEST IS ACTUALLY RELIABLE. WE EXPLAIN WHAT MAKES TESTS UNRELIABLE (FOR EXAMPLE, WE SHOW BY EXAMPLE WHY TESTING ALL PROGRAM STATEMENTS, PREDICATES, OR PATHS IS NOT USUALLY SUFFICIENT TO INSURE TEST RELIABILITY), AND WE OUTLINE A POSSIBLE APPROACH TO DEVELOPING RELIABLE TESTS. WE ALSO SHOW HOW THE ANALYSIS REQUIRED TO DEFINE RELIABLE TESTS CAN HELP IN CHECKING A PROGRAM'S DESIGN AND SPECIFICATIONS AS WELL AS IN PREVENTING AND DETECTING IMPLEMENTATION ERRORS. (A) 18P, 16R.

146 STRUCTURED PROGRAMMING GORDON, E.K. EXPERIENCE AND ACCOMPLISHMENTS WITH STRUCTURED PROGRAMMING. COMPUTER MAGAZINE, JUNE 1975, 8(6), 50-53. DESCRIPTION:

A LARGE SOFTWARE PROJECT WAS IMPLEMENTED USING STRUCTURED PROGRAMMING TECHNIQUES. THREE SHORTCOMINGS WERE NOTED: EACH COMPONENT WENT THROUGH A PERIOD OF LOW VISIBILITY WHILE THE DETAILED DESIGN AND CODING WERE BEING DONE, PROBLEMS THAT WOULD RENDER THE SYSTEM ORGANIZATION INVALID WERE GFTEN NOT DETECTED UNTIL WELL INIO THE IMPLEMENTATION PHASE, AND THERE WAS NO EASY WAY TO RECOGNIZE WHAT GENERAL UTILITY ROUTINES WERE NEEDED. TO AVOID THESE DIFFICULTIES, A PROGRAM DESISN LANGUAGE (PDL) WAS USED AS THE PRINCIPAL TOOL IN THE DESIGN PHASE. RESULTS INDICATE THAT THE QUALITY OF THE CODE INCREASED WHILE JOST AND TIME FACTORS DECREASED. (MEA) 4P, GR.

GORDON, R.D., & HALSTEAD, M.H. AN EXPERIMENT COMPARING FORTRAN PROGRAMMING TIMES WITH THE SOFTWARE PHYSICS HYPOTHESIS. AFIPS CONFERENCE PROCEEDINGS, 1976, 45, 935-937 (ALSO: (TECHNICAL REPORT NO. CSD-TR 167). LAFAYETTE, INDIANA: PURDUE UNIVERSITY, OCTOBER 1975).
DESCRIPTION:

THIS STUDY TESTED A "SOFTWARE PHYSICS" FORMULA WHICH ATTEMPTS TO RELATE THE TIME REQUIRED TO IMPLEMENT A SOFTWARE ALGORITHM TO INFORMATION ABOUT OPERATOR AND OPERAND USAGE IN THE PROGRAM. THE AUTHORS CONTEND THAT THE FORMULA CORRESPONDS TO THE MENTAL EFFORT ASSOCIATED WITH THE CONSTRUCTION OF THE ALGORITHM. AN EXPLANATION OF THE FORMULA IS GIVEN. ONE OF THE AUTHORS IMPLEMENTED 11 PROGRAMS BASED ON PROGRAM SPECIFICATIONS PUBLISHED IN TEXTBOOKS, PECORDING THE TIME REQUIRED FOR EACH IMPLEMENTATION. THE FORMULA WAS THEN APPLIED TO EACH RESULTING PROGRAM. AVERAGE OBSERVED TIME WAS 35 MINUTES, WHILE AVERAGE PREDICTED TIME WAS 34.1 MINUTES (RANGE 5-92 MINUTES). CORRELATION OF PREDICTED WITH OBSERVED TIME WAS .934, HEREAS CORRELATION OF PROGRAM LENGTH WITH OBSERVED TIME WAS .887. (HRR)

これできることできることできることのできることのことできることできることできること

TEN EXPERIENCED PROGRAMMERS WERE EACH GIVEN THE SAME 12 FORTRAN LISTINGS TO DEBUG. EACH LISTING CONTAINED A NON-SYNTACTIC ERROR IN ONE LINE. MEDIAN DEBUG TIMES (7 MINUTES), NUMBER OF SWGS NOT FOUND (11% OF THE LISTINGS), AND NUMBER OF INCORRECT ASSERTIONS ABOUT THE LOCATION OF THE BUG (LESS THAN ONE PER LISTING) ALL REPLICATED EARLIER RESULTS (GOULD & DRONGOWSKI, 1974). ALTHOUGH SUBJECTS WERE GIVEN THE OPPORTUNITY TO USE THE INTERACTIVE DEBUGGING FACILITIES OF AN ON-LINE COMPUTER THEY RARELY DID SO. BUGS IN ASSIGNMENT STATEMENTS WERE ABOUT THREE TIMES AS HARD TO DETECT AS ARRAY OR ITERATION BUGS. DEBUGGING WAS ABOUT THREE TIMES AS EFFICIENT ON PROGRAMS SUBJECTS HAD DEBUGGED PREVIOUSLY (ALTHOUGH WITH A DIFFERENT BUG). A NUMBER OF BASIC CONCEPTS RELATING TO DEBUGGING ARE IDENTIFIED AND A GROSS THEORY OF DEBUGGING IS DESCRIBED. (A) 32P, 25R.

150 QUERY LANGUAGES

GOULD, J.D., & ASCHER, R.N. USE OF AN IRF-LIKE QUERY LANGUAGE BY NON-PROGRAMMERS (RESEARCH REPORT NO. RC-5.279). YORKTOWN HEIGHTS, NEW YORK: IBM WATSON RESEARCH CENTER, FEBRUARY 1975 (ALSO PRESENTED AT MEETING OF THE AMERICAN PSYCHOLOGICAL ASSOCIATION, NEW GRLEANS, LOUISIANA, SEPTEMBER 1974). (NTIS NO. AD A043028) DESCRIPTION:

THIS EXPLORATORY EXPERIMENT ATTEMPTS TO EXAMINE SEPARATELY THE FORMULATION, PLANNING, AND CODING OF QUERIES. COLLEGE STUDENTS AND FILE GLERKS REQUIRED ABOUT TEN HOURS TO LEARN A QUERY LANGUAGE WHICH WAS SOMEWHAT SIMILAR TO IMM*! IQF QUERY LANGUAGE, BUT CONTAINED MORE FUNCTIONS. THEY WERE THEN GIVEN 15 TEST PROPLEMS THAT VARIED IN COMPLEXITY AND HOW WELL THEY WERE EXPRESSED. SUBJECTS WERE REQUIRED TO FORMULATE, THEN TO PLAN (WRITING EACH IN THEIR OWN WORDS), AND FINALLY TO CODE EACH PROBLEM. RESULTS PROVIDE SOME SUGGESTIONS ABOUT WHICH PROBLEM VARIABLES AFFECTED WHICH "STAGES" IN WRITING QUERIES. FOR EXAMPLE, WHETHER OR NOT A PROBLEM WAS WELL EXPRESSED SEEMED TO AFFECT PROBLEM FORMULATION TIME, BUT HAD NO EF-ECT UPON PROBLEM PLANNING OR PROBLEM CODING TIMES. SPECIFIC LANGUAGE CONSTRUCTIONS (ADDITIONS TO 1QF), SUCH AS CONTEXTUAL REFERENCING AND A NEW METHOD TO HANDLE LIMITED DISJUNCTIVE PROBLEMS, WERE SHOWN TO BE USEFUL. THE TYPES OF CODING ERRORS THAT SUBJECT MADE WERE IDENTIFIED AND DISCUSSED. (A) 30P, 159.

DESCRIPTION:

THIS EXPERIMENT REPRESENTS A NEW APPROACH TO THE STUDY OF THE PSYCHOLOGY OF PROGRAMMING, AND DEMONSTRATES THE FEASIBILITY OF STUDYING AN ISOLATED PART OF THE PROGRAMMING PROCESS IN THE LABORATORY. THIRTY EXPERIENCED FORTRAM PROGRAMMERS DEBUGGED 12 ONE-PAGE FORTRAN LISTINGS, EACH OF WHICH WAS SYNTACTICALLY CORRECT BUT CONTAINED ONE NON-SYNTACTIC ERROR (BUG). THREE CLASSES OF BUGS (ARRAY BUGS, ITERATION BUGS, AND BUGS IN ASSIGNMENT STATEMENTS) IN EACH OF FOUR DIFFERENT PROGRAMS WERE DEBUGGED. THE PROGRAMMERS WERE DIVIDED INTO FIVE GROUPS, BASED UPON THE INFORMATION, OR DEBUGGING "AIDS", GIVEN THEM. KEY RESULTS WERE THAT DEBUG TIMES WERE SHORT (MEDIAN = 6 MIN.). THE AIDS GROUPS DID NOT DEBUG FASTER THAN THE CONTROL GROUP -- PROGRAMMERS ADOPTED THEIR DEBUGGING STRATEGIES BASED UPON THE INFORMATION AVAILABLE TO THEM. THE RESULTS SUGGEST THAT PROGRAMMERS OFTEN IDENTIFY THE INTENDED STATE OF A PROGRAM BEFORE THEY FIND THE BUG. ASSIGNMENT BUGS WERE MORE DIFFICULT TO FIND THAN ARRAY AND ITERATION BUGS, PROBABLY BECAUSE THE LATTER COULD BE DETECTED FROM A HIGH-LEVEL UNDERSTANDING OF THE PROGRAMMING LANGUAGE ITSELF. DEBUGGING WAS AT LEAST TWICE AS EFFICIENT THE SECOND TIME PROGRAMMERS DEDUGGED A PROGRAM (THOUGH WITH A DIFFERENT BUG IN IT). A SIMPLE HIERARCHICAL DESCRIPTION OF DEBUGGING WAS SUGGESTED, AND SOME POSSIBLE "PRINCIPLES" OF DEBUGGING WERE IDENTIFIED. (A) 20P, 30F:.

153 PROCEDURE SPECIFICATION

GOULD, J.C., LEWIS, C., & BECKER, C.A. WRITING AND FOLLOWING PROCEDURAL, DESCRIPTIVE, AND RESTRECTED SYNTAX LANGUAGE INSTRUCTIONS (RESEARCH REPORT NO. RC-5943). YORKTOWN HEIGHTS, NEW YORK: IBM WATSON RESEARCH CENTER, APRIL 1976. (NTIS NO. AD AG41289)

DESCRIPTION:

TWO EXPLORATORY EXPERIMENTS COMPARED THE WAY PEOPLE (WITH NO EXPERIENCE IN THE USE OF COMPUTING SYSTEMS) WRITE AND CARRY OUT NATURAL LANGUAGE PROCECURES, NATURAL LANGUAGE DESCRIPTIONS, AND INSTRUCTIONS EXPRESSED IN AN ARTIFICIAL RESTRICTED SYNTOX LANGUAGE. THE RESULTS SUGGEST THAT THERE IS NO SINGLE "NATURAL" WAY THAT PEOPLE WRITE SIMPLE PLANS AND INSTRUCTIONS. SPEED AND ACCURACY OF WRITING WERE ABOUT THE SAME FOR ALL THREE APPROACHES, ALTHOUGH THE LINGUISTIC CHARACTERISTICS DIFFERED GREATLY FROM APPROACH TO APPROACH. WHILE SUBJECTS WERE TOLERANT OF AMBIGUITY BOTH IN WRITING AND IN CARRYING OUT INSTRUCTIONS, THEY OFTEN VOLUNTARILY EMPLOYED RESTRICTED—SYNTAX NOTATION IN THEIR WRITING AFTER BEING EXPOSED TO THE NOTATION. SUBJECTS ACCURACY IN FOLLOWING DETAILED INSTRUCTIONS WAS NO GREATER THAN THAT IN WRITING THOSE INSTRUCTIONS. (A) 24P, OR.

THIS STUDY PROVIDES INFORMATION ABOUT THE CLARITY AND USEFULNESS OF PRINTOUT FORMATS DESIGNED FOR USE BY MILITARY NONPROGRAMMER PERSONNEL. THREE PRINTOUT FORMATS CONTAINING THE SAME INFORMATION WERE DESIGNED. VERBAL PRINTOUT FORMAT PRESENTED INFORMATION IN WORDS; DATA BLOCK PRINTOUT FORMAT, IN SETS OF DATA; EIDOFORM PRINTOUT FORMAT IN MAPLIKE FORM. TWENTY-THREE MEN STATIONED AT PHOENIX AIR DEFENSE SECTOR SERVED AS SUBJECTS. IMMEDIATELY FOLLOWING THE EXPERIMENTAL SESSIONS, ATTITUDE INFORMATION WAS COLLECTED IN INDIVIDUAL INTERVIEWS. PRINTOUT FORMATS AND SETS OF INTERPRETATION QUESTIONS WERE COMBINED FOR ANALYSIS USING A LATIN-SQUARE DESIGN. ANALYSIS OF VARIANCE SHOWED EXPERIMENTAL TREATMENT CONDITIONS, PRINTOUT FORMATS, AND PRACTICE EFFECTS TO BE STATISTICALLY SIGNIFICANT. DIFFERENCES DUE TO SEQUENCE AND TEST FORMS WERE NOT SIGNIFICANT. ATTITUDE RESULTS SUPPORTED INFORMATION MEASURE FINDINGS. (A)

INFORMATION MEASURE FINDINGS. (A)
BOTH TEST SCORES AND SUBJECT PREFERENCE RATINGS WERE SLIGHTLY HIGHER FOR
DATA BLOCK FORMAT THAN FOR VERBAL FORMAT AND BOTH WERE SUPERIOR, ON BOTH
TEST SCORES AND PREFERENCE RATINGS, TO EIDOFORM FORMAT. (MEA)

156 TIME-SHARING VERSUS BATCH PROCESSING
GRANT, E.E. AN EMPTRICAL COMPARISON OF ON-LINE AND OFF-LINE DEBUGGING
(REPORT NO. SP-2441). SANTA MONICA, CALIFORNIA: SYSTEM DEVELOPMENT CORP., MAY
1966. (N'IS NO. AD 633907)
DESCRIPTION:

THIS PAPER REPORTS THE RESULTS OF AN EXPERIMENT CONDUCTED AT SYSTEM DEVELOPMENT CORPORATION IN 1965 AND EARLY 1966. THE EXPERIMENT COMPARED THE PROGRAM DEBUGGING (CHECKOUT) PERFORMANCE OF PROGRAMMERS USING SDC'S TIME-SHARING SYSTEM (TSS) WITH THE DEBUGGING PERFORMANCE OF PROGRAMMERS USING A SIMULATED CLOSED SHOP. TWELVE PROGRAMMERS PARTICIPATED IN THE STUDY. EACH PROGRAMMER WAS GIVEN TWO PROBLEM STATEMENTS AND WAS ASKED TO WRITE A PROGRAM TO SOLVE EACH. ONE PROBLEM REQUIRED A PROGRAM TO INTERPRET AND SOLVE ALGEBRAIC EQUATIONS. THE OTHER PROBLEM REQUIRED A PROGRAM TO FIND THE SINGLE PATH THROUGH A 20x20 CELL MAZE REPRESENTED IN THE COMPUTER BY A 400 ENTRY TABLE. SIX SOLUTIONS (PROGRAMS) TO EACH PROBLEM WERE DEBUGGED ON-LINE USING TSS AND SIX WERE DEBUGGED GFF-LINE USING A SIMULATED CLOSED-SHOP SYSTEM WITH A DESK-TO-DESK TURNAROUND TIME OF TWO HOURS. PERFORMANCE WAS MEASURED IN TERMS OF MAN HOURS TO DEBUG AND CENTRAL PROCESSOR TIME USED IN DEBUGGING. PROGRAMMERS WHO DEBUGGED THEIR ALGEBRAIC INTERPRETATION PROGRAMS ON-LINE USED SLIGHTLY FEWER MAN HOURS AND ABOUT THREE TIMES AS MUCH CENTRAL PROCESSOR TIME AS DID PROGRAMMERS WHO DEBUGGED THESE PROGRAMS OFF-LINE. PROGRAMMERS WHO DEBUGGED THEIR MAZE PROGRAMS ON-LINE USED ABOUT ONE-THIRD AS MANY MAN HOURS AND SLIGHTLY MORE CENTRAL PROCESOR TIME THAN THOSE WHO DEBUGGED THEIR MAZE PROGRAMS OFF-LINE. RESULTS ARE DISCUSSED AND THE FOLLOWING POINTS ARE COVERED IN AN EFFORT TO RECONCILE THE DISPARATE RESULTS FROM THE TWO KINDS OF PROGRAMS: (1) THE ADEQUACY AND REALISM OF OFF-LINE SIMULATION, (2) INEQUALITIES BETWEEN THE GROUPS ASSIGNED TO EXPERIMENTAL CONDITIONS, (5) QUALITATIVE DIFFERENCES BETWEEN THE TWO KINDS OF EXPERIMENTAL PROBLEMS, (4) POSSIBLE ADOPTION OF INEFFICIENT WORK HABITS ON THE PART OF PROGRAMMERS WORKING ON-LINE. (A) 16P, 8R.

157 TIME-SHARING VS. BATCH PROCESSING GRANT, E.E., & SACKMAN, H. AN EXPLORATORY INVESTIGATION OF PROGRAMMER PERFORMANCE UNDER ON-LINE AND OFF-LINE CONDITIONS. IEEE TRANSACTIONS ON HUMAN FACTORS IN ELECTRONICS, 1967, HFE-8, 33-48.
DESCRIPTION:

THIS IS THE FIRST KNOWN STUDY COMPARING THE PERFORMANCE OF PROGRAMMERS UNDER CONTROLLED CONDITIONS FOR A STANDARD TASK. AN EXPERIMENT WAS CONDUCTED TO COMPARE THE PERFORMANCE OF PROGRAMMERS WORKING UNDER CONDITIONS OF ON-LINE AND OFF-LINE ACCESS TO THE COMPUTER. TWO GROUPS OF SIX PROGRAMMERS EACH, COMPRISING A SAMPLE OF 12 SUBJECTS, CODED AND DEBUGGED TWO TYPES OF PROBLEMS UNDER ON-LINE AND OFF-LINE CONDITIONS IN ACCORDANCE WITH A LATIN-SQUARE EXPERIMENTAL DESIGN. THE ON-LINE CONDITION WAS THE NORMAL MODE OF OPERATION FOR THE SYSTEM DEVELOPMENT CORPORATION TIME-SHARING SYSTEM; THE OFF-LINE CONDITION WAS SIMULATED USING A TWO-HOUR TURNAROUND TIME.

THE RESIDENCE OF THE PROPERTY OF THE PROPERTY

STATISTICALLY SIGNIFICANT RESULTS INDICATED FASTER DEBUGGING UNDER ON-LINE CONDITIONS. PERHAPS THE MOST IMPORTANT PRACTICAL FINDING OF THIS STUDY, OVERSHADOWING ON-LINE/OFF-LINE DIFFERENCES, CONCERNED THE LARGE AND STRIKING INDIVIDUAL DIFFERENCES IN PROGRAMMER FERFORMANCE. ATTEMPTS ARE MADE TO RELATE OBSERVED INDIVIDUAL DIFFERENCES TO OBJECTIVE MEASURES OF PROGRAMMER EXPERIENCE AND PROFICIENCY THROUGH FACTORIAL TECHNIQUES. IN LINE WITH THE EXPLOPATORY OBJECTIVES OF THIS STUDY, METHODOLOGICAL PROBLEMS ENCOUNTERED IN DESIGNING AND CONDUCTING THIS TYPE OF EXPERIMENT ARE DESCRIBED, LIMITATIONS OF THE FINDINGS ARE POINTED OUT, HYPOTHESES ARE FRESENTED TO ACCOUNT FOR THE RESULTS, AND SUGGESTIONS ARE MADE FOR FURTHER RESEARCH. (A) 16P, 13R.

158 PROGRAMMING LANGUAGES

GREEN, T.R.G. CONDITIONAL PROGRAM STATEMENTS AND THEIR COMPREHENSIBILITY TO PROFESSIONAL PROGRAMMERS. JOURNAL OF OCCUPATIONAL PSYCHOLOGY, 1977, 50, 93-109.

DESCRIPTION:

The state of the s

PROGRAMMING LANGUAGES EMBODY TWO PRINCIPAL FORMS OF CONDITIONAL STATEMENT, THE NESTING IF...THEN...ELSE... FORM AND THE GOTO FORM. SIME, GREEN & GUEST (1974) COMPARED THESE TWO AND A THIRD VARIETY NOT IN COMMON USE, NESTING WITH REDUNDANCY, AND THEY FOUND THAT NON-PROGRAMMERS LEARNING TO WRITE PROGRAMS BASED ON CONDITIONALS OBTAINED BEST RESULTS WITH THIS LAST VARIETY. THEIR EXPLANATION EMPHASIZED THE NEED TO COMPREHEND A PROGRAM, AND DISTINGUISHED BETWEEN TWO COMPREHENSION PROCESSES APPLICABLE TO CONDITIONALS: TRACING THROUGH A PROGRAM LIKE A COMPUTER, AND FINDING HOW A PARTICULAR POINT IN A PROGRAM MIGHT BE REACHED. THEY HYPOTHESIZED THAT COMPREHENSIBILITY DIFFERENCES OCCURRED MAINLY IN THE SECOND PROCESS. THE PRESENT EXPERIMENTS COMPARED RESPONSE TIMES OF PROFESSIONAL PROGRAMMERS IN COMPREHENSION TASKS REQUIRING EITHER THE FIRST PROCESS (EXPT. I) OR THE SECOND (EXPT. II). MUCH LARGER DIFFERENCES BETWEEN THE THREE STYLES OF CONDITIONAL STATEMENTS WERE FOUND IN THE SECOND TASK, FAVOURING NESTING WITH REDUNDANCY AND THUS SUPPORTING THE HYPOTHESIS. IMPLICATIONS FOR RESEARCH IN THIS AREA AND FOR PROGRAMMING LANGUAGE DESIGN ARE DISCUSSED. (A) 17P, 19R.

159 PROGRAMMING LANGUAGES
GREEN, T.R.G., SIME, M.E., & FITTER, M. BEHAVIOURAL EXPERIMENTS ON PROGRAMMING
LANGUAGES: SOME METHODOLOGICAL CONSIDERATIONS (MRC MEMO NO. 66). SHEFFIELD,
ENGLAND: SHEFFIELD UNIVERSITY, DEPARTMENT OF PSYCHOLOGY, 1975.

THIS PAPER OFFERS AN INTRODUCTION TO EMPIRICAL RESEARCH ON PROGRAMMING BEHAVIOUR AND THE DESIGN OF PROGRAMMING LANGUAGES. EMPIRICAL STUDIES ARE THE FASTEST ROUTE TO BETTER PROGRAMMING LANGUAGES — ESPECIALLY TO LANGUAGES FOR CASUAL COMPUTER USERS. HOWEVER, EXPERIMENTS ON PROGRAMMING BEHAVIOUR PRESENT UNUSUAL PROBLEMS, AT ALL LEVELS FROM A THEORETICAL ANALYSIS OF WHAT IT MEANS TO UNDERSTAND A PROGRAM TO THE INVENTION OF A SCENARIO TO ASSIST THE EXPERIMENTAL SUBJECT. THE PROBLEMS ARE DISCUSSED FROM THE VIEWPOINT OF APPLIED PSYCHOLOGISTS, INTRODUCING RELEVANT EVIDENCE FROM COGNITIVE PSYCHOLOGY WHILE REVIEWING EXISTING LITERATURE ON EMPIRICAL PROGRAMMING LANGUAGE COMPARISONS. FOUR GOALS FOR FUTURE RESEARCH EMERGE FROM THE DISCUSSION: A MEASURE OF PROGRAM COMPREHENSION, AN EXAMINATION OF PARTICULAR SYNTACTIC FEATURES IN COMMON USE, AN ATTACK ON THE SPECIAL PROBLEMS OF LARGE-SCALE PROGRAMS, AND AN ATTEMPT TO ABSORB THE FINDINGS OF CONTEMPORARY PSYCHOLINGUESTICS. (A) 50P. 49R.

HALL, H.M., & KIDMAN, B.P. RUN MONITORING OF STUDENT PROGRAMMING. AUSTRALIAN
COMPUTER JOURNAL, 1975, 7, 127-131.

DESCRIPTION:

THIS REPORT IS PRIMARILY CONCERNED WITH RESULTS OBTAINED FROM AN EXPERIMENTAL MONITORING OF COMPUTER RUNS MADE BY STUDENTS WHILE DEVELOPING ONE PARTICULAR BASIC PROGRAM. HIGH REPORTED EPROR RATES AND A WIDE VARIATION IN INDIVIDUAL RUN PATTERNS WERE FOUND, A LARGE NUMBER OF RUNS BEING REQUIRED BY MANY STUDENTS. THE NUMBER OF RUNS COULD NOT BE RELATED TO THE PROGRAM TEXT, BUT ONE PARAMETER WAS FOUND TO BE RELATED TO THE ACADEMIC GRADE OF THE STUDENTS. THE RESULTS OBTAINED SUGGEST THAT THOSE WHO RAN MOST PROGRAMS PER DAY DID NOT SAVE MAN-HOURS IN "DEBUGGING BY MACHINE." (A) 57, 4R.

THE PURPOSE OF THIS PAPER IS TO CLARIFY SOME OF THE MISCONCEPTIONS THAT IMPEDE USEFUL DISCUSSION OF THE QUESTION OF THE SUITABILITY OF NATURAL LANGUAGE FOR PROGRAMMING. IT IS ARGUED THAT: (1) NATURAL-LANGUAGE PROGRAMMING IS AN ATTEMPT TO PUT NONPROGRAMMERS IN A CLOSER RELATION WITH THE COMPUTER, (2) A NATURAL PROGRAMMING LANGUAGE MUST BE ABLE TO BE WRITTEN EASILY, NOT JUST READ EASILY, (3) PROCESSING NATURAL LANGUAGE IS QUALITATIVELY DIFFERENT FROM (AND EASIER THAN) TRANSLATING ONE LANGUAGE TO ANOTHER, (4) THE REDUNDANCY OF NATURAL LANGUAGE IS AN ADVANTAGE RATHER THAN A DISADVANTAGE, AND (5) NATURAL LANGUAGE PROGRAMMING WILL HELP BRIDGE THE MAN-MACHINE COMMUNICATION GAP. (MEA) 10P, 17R.

180 SPECIFICATIONS

HARTMAN, P.H., & OWENS, D.H. HOW TO WRITE SCFTWARE SPECIFICATIONS. IN PROCEEDINGS, FALL JOINT COMPUTER CONFERENCE, 1967, 779-790. DESCRIPTION:

IN GENERAL, COMPUTER SOFTWARE IS "LITTING MORE COMPLICATED AT AN INCREASING RATE. UNFORTUNATELY, THE PEOPLE WHO HAVE TO DEVELOP THIS SOFTWARE HAVE BEEN AT IT FOR ONLY A RELATIVELY SHORT TIME. THE RESULT IS PREDICTABLE: EVER-LARGER SOFTWARE TROUBLES. THIS, IN TURN, LEADS MANY PEOPLE TO FLEL INSECURE ABOUT SOFTWARE DEVELOPMENT, TO THINK OF IT AS A MODERN "BLACK ART" FOR WHICH EVEN THE MOST ABLE PRACTITIONERS LOSE THE RECIPE EVERY FEW MONTHS.

WE THINK MANY OF THESE TROUBLES ARE SELF-INFLICTED, THE RESULT OF A NATURAL DESIRC TO GET ON THE COMPUTER CAFTER ALL, ISN'T THAT WHAT PROGRAMMING IS ALL ABOUT?) INSTEAD OF "WASTING" TIME IN PLANNING AND OTHER "PAPER SHUFFLING."

TO ILLUSTRATE THIS POINT, WE PARTICULARLY DISCUSS THE SPECIFYING OF A FORTRAN COMPILER.

THIS PAPER IS NOT A "COOKBOOK" ON HOW TO WRITE A COMPILER (THAT PROBLEM IS TOO BROAD FOR A BRIEF DISCUSSION), NOR EVEN WHAT KIND OF COMPILER TO WRITE. INSTEAD, IT IS AN INTRODUCTION TO A WAY OF THINKING ABOUT AND DEFINING THE PRODUCT TO BE DEVELOPED. (A, ABBR.) 12P, OR.

181 PERSONALIZED MAN-COMPUTER DIALOGUE

HEAFNER, J.F. A METHODOLOGY FOR SELECTING AND REFINING MAN-COMPUTER LANGUAGES TO IMPROVE USERS' PERFORMANCE (REPORT NO. ISI/RR-74-21). MARINA DEL RAY, CALIFORNIA: UNIVERSITY OF SOUTHERN CALIFORNIA, INFORMATION SCIENCES INSTITUTE, SEPTEMBER 1974. (NTIS NO. AD 787684) DESCRIPTION:

THIS REPORT DESCRIBES A METHODOLOGY (SUFPORTED BY A SOFTWARE PACKAGE) TO MODEL, MEASURE, ANALYZE, AND EVALUATE USERS' PERFORMANCE IN A MESSAGE COMMUNICATION SYSTEM ENVIRONMENT. THE THESES OF THE REPORT ARE: (1) THAT MODELS OF USERS AND SERVICES CAN ACCURATELY BE USED AS PREDICTORS IN SELECTING A LANGUAGE FORM, FOR AN APPLICATION, WHICH WILL RESULT IN HIGH USERS' PERFORMANCE, AND (2) THAT SUCH A LANGUAGE FORM IS ONLY AN APPROXIMATION (IN TERMS OF YIELDING OPTIMAL USER'S PERFORMANCE) DUE TO WITHIN VARIANCES OF USER AND SERVICE-CLASSES, HENCE INDIVIDUAL, ON-LINE REGULATION OF LANGUAGE CONSTRUCTS IS NECESSARY TO FURTHER IMPROVE PERFORMANCE.

THIS REPORT DEVELOPS APPROPRIATE MODELS AND ALGORITHMS, AND STATES HYPOTHESES RELATING THE INTERACTIVE EFFECTS OF USERS, SERVICES, LANGUAGE FORMS, AND OTHER VARIABLES IMPORTANT IN MAN-MACHINE DISCOUPSE. AN EXPERIMENTAL DESIGN IS PRESENTED, WHICH TESTS THE MAJOR HYPOTHESES. (A) 64P, 1GR.

PROTOCOL AMALYSIS FOR DESIGN OF MAN-COMPUTER DIALOGUE
HEAFNER, J.F. PROTOCOL AMALYSIS OF MAN-COMPUTER LANGUAGES: DESIGN AND
PRELIMINARY FINDINGS (REPORT NO. ISI/RR-75-34). MARINA DEL REY, CALIFORNIA:
UNIVERSITY OF SOUTHERN CALIFORNIA, IMPORMATION SCIENCES INSTITUTE, JULY 1975,
(MIS NO. AD A 13568)
DESCRIPTION:

THIS REPORT DESCRIBES AN ON-GOING STUDY IN MAN-MACHINE COMMUNICATIONS. THE STUDY'S MALE PREMISE IS THAT IN DEVELOPING MAN-COMPUTER LANGUAGES, ONE SHOULD CONSIDER THE USERS' NEEDS AND HABITS, AS WELL AS FEATURES OF THE COMPUTER SERVICE. THE PROBLEM IN DOING SO IS THAT THE DESIGNER THE NAME SUFFICIENT QUANTITATIVE INFORMATION ABOUT THE USERS TO ENABLE HIM TO SPECIFY LANGUAGES PERMITTING NEAR-OPTIMAL PERFORMANCE. THE STUDY PROPOSES AND TESTS A METHOD TO ACHIEVE A CLOSER FIT BETWEEN USERS AND THEIR COMPUTER LANGUAGES BY INVOLVING POTENTIAL USERS IN THE DESIGN PROSESS.

TOKEN LANGUAGES OF SEVERAL SYNTACTIC FORMS ARE DEFINED. THEN, RESEARCH HYPOTHESES ARE STATED CONCERNING THE USERS' PREFERENCES REGARDING THE LANGUAGE STRUCTURE AND VOCABULARY. NEXT, AN EXPERIMENT DESIGN IS DESCRIBED, BASED OF A STATISTICAL MODEL OF OBSERVATIONS OF COMMANDS ENTERED BY USERS AS THEY PERFORM. A STANDARDIZED TASK. THE METHOD IS TESTED BY PROTOCOL ANALYSIS, SUBJECTS WICKLEY STATED COMMANDS IN EACH OF THE TOKEN LANGUAGES AS THEY PERFORMED THE STANDARDIZED TASK. THESE RESPONDENTS WERE REQUESTED TO CHANGE THE GRAPMAR OF EACH LANGUAGE (DURING THE TASK) TO MAKE IT MORE NATURAL FOR THEM TO USE. THEIR TASK INPUTS WERE USED TO TEST THE HYPOTHESIS. THE REPORT CONCLUDES THAT THE METHOD OF MODELLING USERS AND THEN TESTING PRAFT LANGUAGES IS USEFUL IN LANGUAGE DESIGN, SINCE THERE WAS A CONSEASUR OF USERS' OPINIONS AS TO SPECIFIC LANGUAGE IMPROVEMENTS. (A) 227P, 24R.

143 PROGRAMMING LANGUAGES
HEHNER, E.C.A. MERLIN: TOWARDS AN IDEAL PROGRAMMING LANGUAGE (TECHNICAL REPORT NO. CSRG-57). TORONTO, CANADA: UNIVERSITY OF TORONTO, COMPUTER SYSTEMS RESEARCH GROUP, 1975.
DESCRIPTION:

and the Arthur States and the Sandard Sandard

ALCEPTING THE PREMISE THAT MACHINES SHOULD BE DESIGNED TO SUIT THE LANGUAGES THAT WILL BE IMPLEMENTED ON THEM, AND NOT VICE VERSA, THIS PROJECT EXPLORES ISSUES OF LANGUAGE DESIGN NOT INFLUENCED BY IMPLEMENTATION CONSIDERATIONS, OUR CONCERN IS ONLY CONVENIENCE FOR THE DEVELOPMENT AND CLEAR EXPRESSION OF ALGORITHMS. UNDER THIS, WE INCLUDE SIMPLICITY, A MINIMUM OF TERMINOLOGY, FREEDOM FAND SENSELESS RESTRICTIONS, LACK OF USELESS REDUNDANCY, INCLUSION OF USEFUL REPUMBANCY, AND AFFINITY OF LANGUAGE STRUCTURES TO THOUGHT STRUCTURES. AN ATTEMPT IS MADE TO INTRODUCE A DISCIPLINE OF LANGUAGE DESIGN, MATRIC THAN STICKING TOGETHER FAVORITE LANGUAGE PEATURES. (A) 33P, 16R.

186 SOFTWARE ENGINEERING

HEWITT, C.E., & SMITH, B. TOWARDS A PROGRAMMING APPRENTICE. IEEE TRANSACTIONS ON SOFTWARE ENGINEERING, 1975, SE-1(2), 26-45 (ALSO TECHNICAL REPORT, CAMBRIDGE, MASSACHUSETTS: MASSACHUSETTS INSTITUTE OF TECHNOLOGY, ARTIFICIAL INTELLIGENCE LABORATORY, 1975). (NTIS NO. AD AUG9519) DESCRIPTION:

THE PLANNER PROJECT IS CONSTRUCTING A PROGRAMMING APPRINTICE TO ASSIST IN KNOWLEDGE BASED PROGRAMMING. WE WOULD LIKE TO PROVIDE AN ENVIRONMENT WHICH HAS SUBSTANTIAL KNOWLEDGE OF THE SEMANTIC DOMAIN FOR WHICH THE PROGRAMS ARE BEING WRITTEN, AND KNOWLEDGE OF THE PURPOSES THAT THE PROGRAMS ARE SUPPOSED TO SATISFY. FURTHER, WE WOULD LIKE TO MAKE IT EASY FOR THE PROGRAMMER TO COMMUNICATE THE KNOWLEDGE ABOUT THE PROGRAM TO THE APPRENTICE. THE APPRENTICE IS TO AID EXPERT PROGRAMMERS IN THE FOLLOWING KINDS OF ACTIVITIES:

- 1) ESTABLISHING AND MAINTAINING CONSESTENCY OF SPECIFICATIONS.
- 2) VALIDATING THAT MODULES MEET THEIR SPECIFICATIONS,
- 3) ANSWERING QUESTIONS ABOUT DEPENDENCIES BETWEEN MODULES,
- 4) ANALYZING IMPLICATIONS OF PERTURBATIONS IN MODULES,
- S) ANALYZING IMPLICATIONS OF PERTURNATIONS IN SPECIFICATIONS.

 WE USE CONTRACTS (PROCEDURAL SPECIFICATIONS) TO EXPRESS WHAT IS SUPPOSED TO BE ACCOMPLISHED AS OPPOSED TO HOW IT IS SUPPOSED TO BE DONE. THE IDEA IS THAT AT LEAST TWO PROCEDURES SHOULD BE WRITTEN FOR EACH MODULE IN A SYSTEM. ONE PROCEDURE IMPLEMENTS A METHOD FOR ACCOMPLISHING A DESIRED TRANSFORMATION AND THE OTHER CAN CHECK THAT THE TRANSFORMATION HAS IN FACT BE ACCOMPLISHED. THE PROGRAMMING APPRENTICE IS DESIGNED FOR INTERACTIVE IS BY EXPERT PROGRAMMERS IN THE META-EVALUATION OF IMPLEMENTATIONS IN THE JUNTEXT OF THEIR CONTRACTS AND BACKGROUND KNOWLEDGE. META-EVALUATION PRODUCES JUSTIFICATION WHICH MAKES EXPLICIT EXACTLY HOW THE MODULE DEPENDS ON THE CONTRACTS OF OTHER MODULES AND ON THE BEHAVEOR DEPENDENCIES DETWERN MODULES AND IN ANALYZING THE IMPLICATIONS ON PERTURBATIONS IN SPECIFICATIONS AND/OR IMPLEMENTATION. (A)

187 NATURAL-LANGUAGE PROGRAMMING

HILL, I.D. WOULDN'T IT BE NICE IF WE COULD WRITE COMPUTER PROGRAMS IN ORDINARY ENGLISH -- OR WOULD IT? COMPUTER BULLETIN, JUNE 1972, 16(6), 306-312.

DESCRIPTION:

The book of the same of the sa

ORE ARGUMENT THAT IS FREQUENTLY MADE IN FAVOR OF NATURAL-LANGUAGE PROGRAMMING IS THAT PEOPLE SHOULD BE ABLE TO COMMUNICATE WITH COMPUTERS IN THE SAME WAY THAT THEY COMMUNICATE WITH EACH OTHER. WHILE IT IS DESIRABLE TO HAVE A COMMON MODE OF CONMUNICATION, THIS DOES NOT IMPLY THAT WE NEED TO TEACH COMPUTERS ENGLISH; AN ALTERNATIVE IS TO TEACH PEOPLE TO COMMUNICATE WITH EACH OTHER THROUGH UNAMBIGUOUS INSTRUCTIONS. THIS PAPER WILL CONSIDER THE INTPICACIES IN NATURAL ENGLISH THAT PROFIBIT NATURAL LANGUAGE AND SIMULYANEOUSLY ILLUSTRATE THE NEED FOR PEOPLE TO USE PROGRAMMING LANGUAGES IN THEIR INTERACTIONS WITH OTHERS. HOARE, C.A.R. HINTS FOR PROGRAMMING LANGUAGE DESIGN (TECHNICAL REPORT NO. CS-73-403). STANFORD, CALIFORNIA: STANFORD UNIVERSITY, DEPARTMENT OF COMPUTER SCIENCE, DECEMBER 1973. (NTIS NO. AD 773391) DESCRIPTION:

Total particular second and the second secon

THIS PAPER (BASED ON A KEYNOTE ADDRESS PRESENTED AT THE SIGACT/SIGPLAN SYMPOSIUM ON PRINCIPLES OF PROGRAMMING LANGUAGE, BOSTON, OCTOBER 1-3, 1973) PRESENTS THE VIEW THAT A FROGRAMMING LANGUAGE IS A TOOL WHICH SHOULD ASSIST THE PROGRAMMER IN THE MOST DIFFICULT ASPECTS OF HIS ART, NAMELY PROGRAM DESIGN, DOCUMENTATION, AND DEBUGGING. IT DISCUSSES THE OBJECTIVE CRITERIA FOR EVALUATING A LANGUAGE DESIGN, AND ILLUSTRATES THEM BY APPLICATION TO LANGUAGE FEATURES OF BOTH HIGH LEVEL LANGUAGES AND MACHINE CODE PROGRAMMING. IT CONCLUDES WITH AN ANNOTATED READING LIST, RECOMMENDED TO ALL INTENDING LANGUAGE DESIGNERS. (A) 31P, 9R.

189 NATURAL-LANGUAGE PROGRAMMING

HOGBS, J.R. WHAT THE NATURE OF NATURAL LANGUAGE TELLS US ABOUT HOW TO MAKE NATURAL-LANGUAGE-LIKE PROGRAMMING LANGUAGES MORE NATURAL. IN PROCEEDINGS OF THE ACM SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND PROGRAMMING LANGUAGES, SIGPLAN NOTICES, AUGUST 1977, 12(8), 85-93 (ALSO: SIGART HEWSLETTER, AUGUST 1977, 64, 35-93).

DESCRIPTION:

WHEN A STUDENT IS LEARNING AN ALGORITHM FROM A TEXTBOOK, HIS FIRST APPROACH IS FREQUENTLY THROUGH AN ENGLISH DESCRIPTION. THIS IS NORMALLY EASIER TO UNDERSTAND THAN RAW CODE, AND SOMETIMES EASIER THAN A FLOWCHART, IN SPITE OF THE FACT THAT PROGRAMMING LANGUAGES ARE DESIGNED FOR ALGORITHM SPECIFICATION WHILE ENGLISH IS ONLY PRESSED INTO ITS SERVICE. IF THE ENGLISH IS EASIER TO UNDERSTAND, IT IS LIKELY THAT IT HAS MANY FEATURES THAT WOULD EASE PROGRAMMING ITSELF. THIS PAPER INVESTIGATES SOME OF THESE FLATURES. (A) 9P, 9R.

the state of the s

THE STATE OF THE PARTY OF THE P

HOC, J.M. THE ROLE OF MENTAL REPRESENTATION IN LEARNING A PPOGRAMMING LANGUAGE. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1977, 9, 87-105. DESCRIPTION:

A THEORETICAL FRAMEWORK HAS BEEN DEFINED AND BEGUN TO GET A VALIDATION BY A PRELIMINARY EXPERIMENT. THIS EXPERIMENT ENABLED US YO SHOW THAT THE PROGRAMMING LANGUAGE IS INTERIORIZED BY THE SUBJECT STEP BY STEP IN THE FORM OF A "SYSTEME DE REPRESENTATION ET DE TRAITEMENT" (SRT) IN WHICH THE SKILLED PROGRAMMER WILL BE ABLE TO ANALYZE THE PROBLEMS. BEFORE THIS, HE PERFORMS HIS ANALYSIS IN OTHER SRTS MORE OR LESS COMPATIBLE WITH THE PROGRAMMING LANGUAGE. NINETEEN SUBJECTS, AT VARIOUS LEVELS OF TRAINING, HAD TO CONSTRUCT THE COBOL-ALGORIGRAM OF THE PROGLEM OF CONTROLLING A SUBWAY TICKET MACHINE. AN ANALYSIS OF THE ERRORS AND A DESCRIPTION OF AMALYSIS STRATEGIES, BY MEANS OF 22 VARIABLES, HAVE BEEN PERFORMED IN ORDER TO SPECIFY THREE IMPORTANT STEPS THROUGH THE PROCRAMMING LANGUAGE LEARNING. (A)

191 PROGRAMMING

HOLTON, J.B. ARE THE NEW PROGRAMMING TECHNIQUES BEING USED? DATAMATION, JULY 1977, 23:7), 97-103.

DESCRIPTION:

IT IS OFTEN CLAIMED THAT THE USE OF EFFECTIVE SYSTEM DEVELOPMENT TECHNIQUES CAN LEAD TO GREATER SUCCESS IN BUSINESS DATA PROCESSING FUNCTIONS. THIS PAPER PRESENTS THE RESULTS OF A SURVEY DIRECTED AT DETERMINING HOW WIDESPREAD IS THE USE OF SUCH TECHNIQUES AND HOW EFFECTIVE THEY ARE. THE FOLLOWING TECHNIQUES WERE INVESTIGATED: STRUCTURED PROGRAMMING, TOP-DOWN DESIGN AND IMPLEMENTATION, THE STRUCTURED WALK-THROUGH, PROGRAMMER TEAM OPERATIONS, AND USE OF A PROGRAM DEVELOPMENT SUPPORT LIBRARY. IT APPEARS THAT THESE TECHNIQUES ARE NOT WIDELY USED, BUT THEY HAVE BEEN FOUND TO BE VERY USEFUL WHEN THEY HAVE BEEN TRIED. (MEA) 5P, OR.

HORNING, J.J., & WORTMAN, D.B. SOFTWARE HUT: A COMPUTER PROGRAM ENGINEERING PROJECT IN THE FORM OF A GAME. IEEE TRANSACTIONS ON SOFTWARE ENGINEERING, 1977, SE-3, 325-330.

DESCRIPTION:

THE FLICK STATES OF THE STATES

THE SOFTWARE HUT (A SMALL SOFTWARE HOUSE) IS A COURSE PROJECT DESIGNED FOR A GRADUALE-LEVEL COURSE IN COMPUTER PROGRAM ENGINEFRING. THIS PAPER DESCRIBES THE SOFTWARE HUT PROJECT AND DISCUSSES THE AUTHORS EXPERIENCE USING IT IN GRADUATE COURSES AT THE UNIVERSITY OF TORONTO. SUGGESTIONS FOR IMPROVEMENTS IN THE PROJECT ARE GIVEN. (A) 69, 98.

193 STRUCTURED PROGRAMMING
HOROWITZ, E. FORTRAN: CAN IT BE STRUCTURED -- SHOULD IT BE? (OMPUTER,
JUNE 1975, 8(6), 30-37.
DESCRIPTION:

IN ADDITION TO THE COMMONLY ACCEPTED CRITERIA OF CORRECTNESS AND EFFICIENCY, STRUCTURED PROGRAMMING EMPHASIZES THREE CRITERIA FOR DESIGN AND CODING -- HEADABILITY, NODIFIABILITY, AND PROVABILITY. THIS PAPER EXPLORES THE ADVANTAGES AND DISADVANTAGES OF STRUCTURED FORTRAN. IT IS CONCLUDED THAT STRUCTURED FORTRAN HAS BOTH GOOD POINTS AND LIMITATIONS, THAT USING STRUCTURED FORTRAN DOES NOT NECESSARILY IMPLY THE USE OF STRUCTURED PROGRAMMING, BUT ALSO THAT IT HAS SEVERAL ADVANTAGES THAT SHOULD PROVE BENEFICIAL WHEN IT IS CAREFULLY APPLIED. (MEA) 3P, 1CR.

197 SOFTWARE DEVELOPMENT AND MAINTENANCE
IVIE, E.L. THE PROGRAMMER'S WORKBENCH -- A MACHINE FOR SOFTWARE DEVELOPMENT.
COMMUNICATIONS OF THE ACM, 1977, 20, 746-753.
DESCRIPTION:

ON ALMOST ALL SOFTWARE DEVELOPMENT PROJECTS THE ASSUMPTION IS MADE THAT THE PROGRAM DEVELOPMENT FUNCTION WILL BE DONE ON THE SAME MACHINE ON WHICH THE EVENTUAL SYSTEM WILL RUP. IT IS ONLY WHEN THIS PRODUCTION MACHINE IS UNAVAILABLE OR WHEN ITS PROGRAMMING ENVIRONMENT IS TOTALLY INADEQUATE THAT ALTERNATIVES ARE CONSIDERED. IN THIS PAPER IT IS SUGGESTED THAT THERE ARE MANY OTHER SITUATIONS WHERE IT WOULD BE ADVANTAGEOUS TO SEPARATE THE PROGRAM DEVELOPMENT AND MAINTENANCE FUNCTIVE ONTO A SPECIALIZED COMPUTER WHICH IS DEDICATED TO THAT PURPOSE. SUCH A COMPUTER IS HERE CALLED A PROGRAMMER'S WORKBENCH. THE FOUR BASIC SECTIONS OF THE PAPER INTRODUCE THE SUBJECT, OUTLINE THE GENERAL CONCEPT, DISCUSS AREAS WHERE SUCH AN APPROACH MAY PROVE BENEFICIAL, AND DESCRIBE AN OPERATIONAL SYSTEM UTILIZING THIS CONCEPT. (A) SP, 7R.

 VIRGINIA: JOINT TECHNICAL COORDINATING GROUP ON ELECTRONIC EQUIPMENT
 RELIABILITY, DEPARTMENT OF THE ARMY, THE NAVY AND THE AIR FORCE, OCTOBER 1975.
 DESCRIPTION:

THE DEPARTMENT OF DEFENSE IS CURRENTLY SEEKING METHODS TO IMPROVE THE FIELD RELIABILITY OF ITS ELECTRONIC SYSTEMS, PARTICULARLY WEAPON 57STEMS. SINCE MODERN WEAPON SYSTEMS NOW CONTAIN AN INCREASING NUMBER OF EMBEDDED DIGITAL COMPUTER SUBSYSTEMS, THE QUESTION OF HOW TO DEVELOP HIGHLY RELIABLE COMPUTER PROGRAMS (OR SOFTWARE) HAS BECOME OF VITAL INTEREST TO EXECUTIVES AT THE 4IGHEST LEVELS OF GOVERNMENT. THIS PAPER ADDRESSES THE SOFTWARE RELIABILITY JUESTION IN THIS CONTEXT AND DESCRIBES SOME OF THE PROBLEMS BEING ENCOUNTERED, THE REASONS FOR THEM, AND SUGGESTIONS FOR THEIR RESOLUTION. (A)

202 SPECIFICATIONS
JONES, M.N. HEPO FOR DEVELOPING SPECIFICATIONS. DATAMATION, MARCH 1976, 22(3), PP. 112; 114; 121; \$25.
DESCRIPTION:

A PRECISE DEFINITION OF USER REQUIREMENTS IS ESSEMTIAL TO THE DEVELOPMENT OF A CORRECT DATA PROCESSING SYSTEM. TOO FREQUENTLY, THE CONTENTS OF SPECIFICATION PACKAGES ARE FUZZY, INACCURATE, AND INCOMPLETE, RESULTING IN SYSTEMS WITH THESE SAME CHARACTERISTICS. IMAGINE, THEN, UNDERTAKING A DATA PROCESSING PROJECT WITH NO WRITTEN USER SPECIFICATIONS, YET DELIVERING A QUALITY SYSTEM WHICH MEETS USER REQUIREMENTS IN ALL RESPECTS. THIS MAY SEEM IMPOSSIBLE, BUT IT HAS BEEN ACHIEVED USING A TECHNIQUE KNOWN AS HIPO TO DEVELOP AND DOCUMENT SYSTEM SPECIFICATIONS. (A) 4P, 9R.

JUDD, D.R. THE DOCUMENTATION OF COMPUTER PROGRAMS. IN INFOTECH INFORMATION
LTD. SOFTWARE ENGINEERING. BERKSHIRE, ENGLAND: INFOTECH INFORMATION 1.TD.,
1972, 411-424.
DESCRIPTION:

THIS PAPER PROVIDES A BRIEF INTRODUCTION TO THE PURPOSES OF COMPUTER PROGRAM DOCUMENTATION. SEVERAL STAGES OF DOCUMENTATION ARE IDENTIFIED AND THE FUNCTIONS THAT EACH MUST FULFILL ARE SPECIFIED. THE STAGES OF DOCUMENTATION CONSIDERED ARE: PROGRAM DESIGN, ERROR DIAGNOSIS, OPERATIONS, MAINTENANCE, DEVELOPMENT, AND MARKETING. (MEA) 12P, OR.

204 SOFTWARE TESTING AND VALIDATION
KANE, J.R., & YAU, S.S. CONCURRENT SOFTWARE FAULT DETECTION. IEEE
TRANSACTIONS ON SOFTWARE ENGINEERING, 1975, SE-1, 87-99.
DESCRIPTION:

A MODULE IS AN ABSTRACT COMPONENT OF A SOFTWARE SYSTEM. IT MAY BE INTERPRETED AS A MACHINE INSTRUCTION, HIGH LEVEL LANGUAGE STATEMENT, SUBROUTINE, PROCEDURE, ETC. A SEQUENCE OF MODULES IS EXECUTED FOR EACH TRANSACTION PROCESSED BY THE SYSTEM. CONTROL FAULTS MANIFEST THEMSELVES AS INCORRECT EXECUTION SEQUENCES. A GRAPH-THEORETIC MODEL FOR SOFTWARE SYSTEMS IS PRESENTED WHICH PERMITS A SYSTEM TO BE CHARACTERIZED BY ITS SET OF ALLOWABLE EXECUTION SEQUENCES. IT IS SHOWN HOW A SYSTEM CAN BE STRUCTURED SO THAT EVERY EXECUTION SEQUENCE AFFECTED BY A CONTROL FAULT IS OBVIOUSLY IN ERROR, I.E., NOT IN THE ALLOWABLE SET DEFINED BY THE SYSTEM MODEL. FAULTS ARE DETECTED BY MONITORING THE EXFCUTION SEQUENCE OF EVERY TRANSACTION PROCESSED BY THE SYSTEM AND COMPARING ITS EXECUTION SEQUENCE TO THE SET OF ALLOWABLE SEQUENCES. ALGORITHMS ARE PRESENTED BOTH FOR STRUCTURING A SYSTEM SO THAT ALL FAULTS CAN BE DETECTED AND FOR FAULT DETECTION CONCURRENT WITH SYSTEM OPERATION. SIMULATION RESULTS ARE PRESENTED WHICH SUPPORT THE THEORETICAL DEVELOPMENT OF THIS PAPER. (A) 13P, 10R.

205 AUTONATIC PROGRAMMING
KHRT, E. THE SELECTION OF EFFICIENT IMPLEMENTATION FOR A HIGH-LEVEL LANGUAGE.
IM PROCEEDINGS OF THE ACM SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND PROGRAMMING
LANGUAGES, SIGPLAN NOTICES, AUGUST 1977, 12(8), 140-146 (ALSO: SIGART
MENSLETTER, AUGUST 1977, NO. 64, 140-146).
DESCRIPTION:

THIS PAPER CONSIDERS THE PROBLEM OF IDENTIFYING AN EFFICIENT SET OF IMPLEMENTATIONS FOR THE ABSTRACT CONSTRUCTS IN A VERY HIGH LEVEL PROGRAM DESCRIPTION. LIBRA IS A SYSTEM THAT PRUNES AND EXPANDS A TREE OF PARTIALLY IMPLEMENTED PROGRAM DESCRIPTIONS, GIVEN A SET OF REFINEMENT RULES FOR GENERATING THE TREE. SEVERAL SETS OF RULES GROUP, ORDER, AND SELECT REFINEMENTS. THE ANALYSIS OF THE COST OF A PROGRAM (OR PROGRAM PART) AT ANY LEVEL OF REFINEMENT IS MAINTAINED FOR COST COMPARISONS RETWEEN DIFFERENT REFINEMENTS, FOR BOTTLENECK IDENTIFICATION, AND FOR BRANCH AND BOUND SEARCH. (A)
7P, 11R.

236 STRUCTURED PROGRAMMING

KATKUS, G.R. APPLYING STRUCTURED PROGRAMMING TO COMMAND, CONTROL, AND

COMMUNICATION SOFTWARE DEVELOPMENT. COMPUTER MAGAZINE, JUNE 1975, 8(6),

43-47.

DESCRIPTION:

MUCH HAS BEEN WRITTEN DESCRIBING STRUCTURED PROGRAMMING (SP) TECHNOLOGIES, BUT LITTLE HAS BEEN WRITTEN CONCERNING MEASURABLE RESULTS FROM USING THOSE TECHNOLOGIES TO DELIVER PROGRAMS WITHIN COST, TIME, AND PERFORMANCE CONSTRAINTS. SP JECHNOLOGIES HAVE BEEN APPLIED TO LARGE-SCALE REAL-TIME PROGRAM DEVELOPMENT, ANALYZED, AND FURTHER DEVELOPED AT HUGHES AIRCRAFT COMPANY SINCE 1971. AS NEW SUFTWARE PROJECTS ARE STARTED, THE RESPECTIVE MANAGERS MUST STATE WHICH OF THE TECHNOLOGIES WILL AND WILL NOT BE USED. THE USE OF THE APPLIED TECHNIQUES AS THEN MONITORED TO DETERMINE BENEFITS AND PROBLEMS AND TO DEFINE USEFUL MODIFICATIONS TO THE TECHNOLOGIES. (A) SP, OR.

KNUTH, D.E. AN EMPIRICAL STUDY OF FORTRAN PROGRAMS. SOFTWARE-PRACTICE AND EXPERIENCE, 1971, 1, 105-133 (ALSO IOM RESEARCH REPORT RC-3276, IBM CORP., MARCH 1971; TECHNICAL REPORT C5-186, STANFORD, CALEFORNIA: STANFORD UNIVERSITY, COMPUTER SCIENCE DEPARTMENT, 1971). (NTIS NO. AD 715513) DESCRIPTION:

A SAMPLE OF PROGRAMS, WRITTEN IN FORTRAN BY A WIDE VARIETY OF PEOPLE IN A WIDE VARIETY OF APPLICATIONS, WAS CHOSEN "AT RANDOM" IN AN ATTEMPT TO DISCOVER QUANTITATIVELY "WHAT PROGRAMMERS REALLY DO." STATISTICAL RESULTS OF THIS SURVEY ARE PRESENTED HERE, TOGETHER WITH SOME OF THEIR APPARENT IMPLICATIONS FOR FUTURE WORK IN COMPILER DESIGN. THE PRINCIPAL CONCLUSION WHICH MAY BE DRAWN IS THE IMPORTANCE OF A PROGRAM "PROFILE," NAMELY, A TABLE OF FREQUENCY COUNTS WHICH RECORD HOW OFTEN EACH STATEMENT IS PSRFORMED IN A TYPICAL RUN; THERE ARE STRONG INDICATIONS THAT PROFILE-KEEPING SHOULD BECOME A STANDARD PRACTICE IN ALL COMPUTER SYSTEMS, FOR CASUAL USERS, AS JELL AS SYSTEM PROGRAMMERS. THIS PAPER IS THE REPORT OF A THREE-MONTH STUDY UNDERTAKEN BY THE AUTHOR AND ABOUT A DOZEN STUDENTS AND REPRESENTATIVES OF THE SOFTWARE INDUSTRY DURING THE SUMMER OF 1970. IT IS HOPED THAT A READER WHO STUDIES THIS REPORT WILL OBTAIN A FAIRLY CLEAR CONCEPTION OF HOW FORTRAN IS BEING USED, AND WHAT COMPILERS CAN DO ABOUT IT. (A)

211 STRUCTURED PROGRAMMING

KNUTH, D.E. A REVIEW OF "STRUCTURED PROGRAMMING" (TECHNICAL REPORT NO. STAN-CS-/3-371). STANFORD, CALIFORNIA: STANFORD UNIVERSITY, COMPUTER SCIENCE DEPARTMENT, 1973.

212 STRUCTURED PROGRAMMING

KNUTH, D.E. STRUCTURED PROGRAMMING WITH GO TO STATEMENTS. COMPUTING SURVEYS, 1974, 6, 261-301.

DESCRIPTION:

A CONSIDERATION OF SEVERAL DIFFERENT EXAMPLES SHEDS NEW LIGHT ON THE PROBLEM OF CREATING RELIABLE, WELL-STRUCTURED PROGRAMS THAT BEHAVE EFFICIENTLY. THIS STUDY FOCUSES LARGELY O'. TWO ISSUES: (A) IMPROVED SYNTAX FOR ITERATIONS AND ERROR EXITS, MAKING IT POSSIBLE TO WRITE A LARGEP CLASS OF PROGRAMS CLEARLY AND EFFICIENTLY WITHOUT GO TO STATEMENTS; (B) A METHODOLOGY OF PROGRAM DESIGN, BEGINNING WITH READABLE AND CORRECT, BUT POSSIBLY INTO EFFICIENT PROGRAMS THAT ARE SYSTEMATICALLY TRANSFORMED IF NECESSARY INTO EFFICIENT AND CORRECT, BUT POSSIBLY LESS READABLE CODE. THE DISCUSSION BRINGS OUT OPPOSING POINTS OF VIEW ABOUT WHETHER OR NOT GO TO STATEMENTS SHOULD BE ABOLISHED; SOME MERIT IS FOUND ON BOTH SIDES OF THIS QUESTION. FINALLY, AN ATTEMPT IS MADE TO DEFINE THE TRUE NATURE OF STRUCTURED PROGRAMPING, AND TO RECOMMEND FRUITFUL DIRECTIONS FOR FURTHER STUDY. (A) 41P, 122R.

213 PROGRAHMING

KNUTH, D.E. COMPUTER PROGRAMMING AS AN ART. COMMUNICATIONS OF THE ACM, 1974, 17, 667-673.

DESCRIPTION:

MUCH HAS BEEN WRITTEN ABOUT THE NEED FOR COMPUTER PROGRAMMING TO MAKE A TRANSITION FROM AN ART TO A DISCIPLINED SCIENCE. IMPLICIT IN SUCH REMARKS IS THE IDEA THAT AN ACTIVITY THAT IS CLASSIFIED AS AN ART IS LESS DESIRABLE THAN ONE CLASSIFIED AS A SCIENCE. THIS PAPER ATTEMPTS TO DEMORSTRAYE THAT COMPUTER PROGRAMMING IS AN ART BECAUSE IT INVOLVES ACCUMMULATED REAL WORLD KNOWLEDGE, REQUIRES SKILL AND INGENUITY, AND PRODUCES OBJECTS OF BEAUTY. A PROGRAMMER WHO VIEWS HIMSELF AS AN ARTIST WILL ENJOY WHAT HE DOES AND WILL DO IT BETTER. (MEA)

214 PROGRAMMING LANGUAGES

KNUTH, D.E., & PARDO, L.T. THE FARLY DEVELOPMENT OF PROGRAMMING LANGUAGES (TECHNICAL REPORT STAN-CS-76-562). STANFORD, CALIFORNIA: STANFORD UNIVERSITY, DEPARTMENT OF COMPUTER SCIENCE, AUGUST 1976. (NTIS NO. AD AC32123) DESCRIPTION:

THIS PAPER SURVEYS THE EVOLUTION OF HIGH LEVEL PHOGRAMMING LANGUAGES DURING THE FIRST DECADE OF COMPUTER PROGRAMMING ACTIVITY. WE DISCUSS THE CONTRIBUTIONS OF ZUSE (PLANKALKUEL, 1945), GOLDSTINE/VON NEUMANN (FLOW DIAGRAMS, 1946), CURRY (COMPOSITION, 1946), MAUCHLY ET AL (SHORT CODE, 1957), BURKS, (INTERMEDIATE PL, 1950), RUTISHAUSER (1951), BOEHM (1951), GLENVIE (AUTOCODE, 1952), HOPPER ET AL (A-2, 1953), LANING/ZIERLER (1953), BACKUS ET AL (FORTRAN, 1954-1957), BROOKER (MARK I AUTOCODE, 1954), *AMQUIN/LIUBIMSKII (PI-PI-2, 1954), ERSHOV (PI-PI, 1955), GREMS/PORTER (BACAIC, 1955), ELSWORTH ET AL (KOMPILER 2, 1955), BLUM (ADES, 1956), PORLIS ET AL (II, 1955), KATZ ET AL (MATH-MATIC, 1956-1958), HOPPER ET AL (FLOW-MATIC, 1956-1958), BAUER/SAMELSON (1956-1958). THE PRINCIPAL FEATURES OF EACH CONTRIBUTION ARE ILLUSTRATED; AND FOR PURPOSES OF COMPARISON, A PARTICULAR FIXED ALGORITHM HAS BEEN ENCODED (AS FAR AS POSSIBLE) IN EACH OF THE LANGUAGES. THIS RESEARCH IS BASED PRIMARILY ON UNPURLISHED SOURCE TATTRIALS, AND THE AUTHORS HOPE THAT THEY HAVE BEEN ABLE TO COMPILE A FAIRLY COMPLETE PICTURE OF THE EARLY DEVELOPMENTS IN THIS AREA. (A) 11P, 127R.

DESCRIPTION:

THE ATTRIBUTES OF A WELL-WRITTEN COMPUTER PROGRAM ARE EVIDENT. IT IS EFFICIENT, FAST, WELL-DOCUMENTED, ELEGANT, AND, OF COURSE, CORRECT. HOW TO WRITE SUCH A PROGRAM IS NOT SO OBVIOUS. BY PRESENTING ESSENTIAL TECHNIQUES OF FORTRAN STYLE, THIS BOOK TEACHES THE ART OF WRITING A GOOD PROGRAM. EACH TECHNIQUE IS CAREFULLY EXPLAINED AND THE RATIONALE FOR IT IS GIVEN SO THAT THE STUDENT CAN LEARN WHEN TO APPLY A RULE AND WHEN TO DEVELOP HIS OWN. IT IS OUR HOPE THAT "THE ELEMENTS OF FORTRAN STYLE" WILL ENABLE THE NOVICE PROGRAMMER TO BECOME A GOOD ONE AND THE GOOD PROGRAMMER TO BECOME A BETTER ONE. (A, ABBR.)

LAMPSON. B.W. A CRITIQUE OF "AN EXPLORATORY INVESTIGATION OF PROGRAMMER
PERFORMANCE UNDER ON-LINE AND OFF-LINE CONDITIONS". IEEE TRANSACTIONS ON
HUMAN FACTORS IN ELECTRONICS, 1967, HFE-8, 48-51.
DESCRIPTION:

THE PAPER BY GRANT AND SACKMAN (1967), "AN EXPLORATORY INVESTIGATION OF PROGRAMMER PERFORMANCE UNDER ON-LINE AND OFF-LINE CONDITIONS" IS DISCUSSED CRITICALLY. PRIMARY EMPHASIS IS ON THIS PAPER'S FAILURE TO CONSIDER THE MEANING OF THE NUMBERS OBTAINED. AN UNDERSTANDING OF THE NATURE OF AN ON-LINE SYSTEM IS NECESSARY FOR PROPER INTERPRETATION OF THE OBSERVED RESULTS FOR DEBUGGING TIME, AND THE RESULTS FOR COMPUTER TIME ARE CRITICALLY DEPENDENT ON THE IDMOSYNCRACIES OF THE SYSTEM ON WHICH THE WORK WAS DONE. LACK OF ATTENTION TO THESE MATTERS CANNOT BE COMPENSATED FOR BY ANY AMOUNT OF STATISTICAL ANALYSIS. FURTHEPMORE, MANY OF THE CONCLUSIONS DRAWN AND SUGGESTIONS MADE ARE TOO VAGUE TO BE USEFUL. (A)

226 SOFTWARE DESIGN

LEVIN, S.L. PROBLEM SELECTION IN SOFTWARE DESIGN (TECHNICAL REPORT NO. 93). IRVINE, CALIFORNIA: UNIVERSITY OF CALIFORNIA, DEPARTMENT OF INFORMATION AND COMPUTER SCIENCE, NOVEMBER 1976. DESCRIPTION:

THIS PAPER REPORTS THE RESULTS OF RESEARCH INTO THE COGNITIVE PROCESSES OF SOFTWARE DESIGN. DESIGN IS VIEWED AS A COMPLEX ACTIVITY INVOLVING THREE FUNDAMENTAL PROCESSES: SELECTING PROBLEMS TO WORK ON, GATHERING NEEDED INFORMATION FOR THEIR SOLUTION, AND GENERATING SOLUTIONS. A DETAILED MODEL OF THE PROBLEM SELECTION PROCESS IS PRESENTED. (A, ABBR.) 96P, 19R.

227 ERRORS, PROGRAMMING

LIPOW, M. ESTIMATION OF SOFTWARE PACKAGE RESIDUAL ERROR (TECHNICAL REPORT NO. TRW-SS-72-09). REDONDO BEACH, CALIFORNIA: TRW, NOVEMBER 1972. DESCRIPTION:

A METHOD FOR ESTIMATING THE NUMBER OF ERRORS REMAINING IN A SOFTWARE PACKAGE IS PROPOSED AND ANALYZED. IT IS BASED UPON A SCHEME, PROPOSED BY H.D. MILLS OF IBM, IN WHICH A SET OF KNOWN ERRORS IS "SEEDED" INTO THE SOFTWARE. A SPECIFIED NUMBER OF TESTS IS CONDUCTED, EACH TEST CAPABLE OF FINDING ONE OF THE INDIGENOUS OR UNKNOWN ERRORS, OR ONE OF THE SEEDED ERRORS WITH THE SAME PROBABILITY, OR OF FINDING NO ERROR. THE PROBLEM IS TO ESTIMATE THE TWO PARAMETERS: N1, THE UNKNOWN NUMBER OF RESIDUAL ERRORS, AND Q, THE UNKNOWN PROBABILITY OF DETECTING EITHER A SEEDED OR AN INDIGENOUS ERROR. THE REASON THE SEEDING SCHEME WORKS, OF COURSE, IS BECAUSE OBSERVED DETECTION RATE OF SEEDED ERRORS WITH A KNOWN NUMBER OF SEEDED ERRORS REMAINING YIELDS INFORMATION ON THE NUMBER OF RESIDUAL INDIGENOUS ERRORS, SINCE THE LATTER ERRORS ARE DETECTED AT THE SAME RATE, BY ASSUMPTION. IN ADDITION TO FINDING MAXIMUM LIKELIHOOD ESTIMATORS FOR N1 AND Q, THE CONDITIONAL DISTRIBUTION OF THE MAXIMUM LIKELIHOOD ESTIMATOR FOR N1, GIVEN THE TOTAL NUMBER OF ERRORS DETECTED, IS GIVEN ANALYTICALLY AND ALSO COMPUTED IN TWO CASES. THE DISTRIBUTION CALCULATION ALSO YIELDS THE MEAN AND THE ROOT MEAN SQUARE DEVIATION OF THE ESTIMATOR FOR N1, AND CONSEQUENTLY, AN INDICATION OF ITS BIAS AND PRECISION FOR VARIOUS TRUE VALUES OF N1, NUMBER OF SEEDED ERRORS, AND OBSERVED TOTAL NUMBERS OF ERRORS. (A) 13P, 2R.

LITECKY, C.R. ASSISTING STUDENTS TO AVOID CODING ERRORS IN THE COBOL LANGUAGE. AEDS JOURNAL, 1976 (WINTER), 36-38. DESCRIPTION:

COBOL IS THE MOST WIDELY USED PROGRAMMING LANGUAGE FOR DATA PROCESSING; MOST COMMERCIAL CODING IS DONE IN COBOL. YET COBOL HAS NOT BEEN TAUGHT AS EXTENSIVELY AS MIGHT BE EXPECTED. PERHAPS THE MAJOR REASON IS THAT THE COBOL LANGUAGE SEEMS TO HAVE A PARTICULARLY TROUBLESOME AND ERROR-PRONE SYNTAX FOR INEXPERIENCED PROGRAMMING LANGUAGE LEARNERS.

THIS SHORT PAPER PRESENTS DATA ON COBOL SYMTACTICAL ERROR FPEQUENCIES AND AN APPROACH THAT INSTRUCTORS MAY USE TO ASSIST STUDENTS TO AVOID ERRORS WHILE LEARNING THE COBOL LANGUAGE. THESE DATA MAY ALSO BE HELPFUL IN FINDING ERRORS DURING DEBUGGING OF SYNTACTICAL ERRORS IN COBOL PROGRAMS.

LITECKY, C.R., & DAVIS, G.B. A STUDY OF ERRORS, ERROR-PRONENESS, AND ERROR DIACNOSIS IN COBOL. COMMUNICATIONS OF THE ACM, 1976, 19, 33-37, DESCRIPTION:

THIS PAPER PROVIDES DATA ON COBOL ERROR FREQUENCY FOR CORRECTION OF FRRORS IN STUDEUT-ORIENTED COMPILERS, IMPROVEMENT OF TEACHING, AND CHANGES IN PROGRAMMING LANGUAGE. COBOL WAS STUDIED BECAUSE OF ECONOMIC IMPORTANCE, WIDESPREAD USAGE, POSSIBLE ERROR-INDUCING DESIGN, AND LACK OF RESEARCH. THE TYPES OF ERRORS WERE IDENTIFIED IN A PILOT STUDY; THEN, USING THE 132 ERROR TYPES FOUND, 1,777 ERRORS WERE CLASSIFIED IN 1,400 RUNS OF 73 COBOL STUDENTS. ERROR DENSITY WAS HIGH: 20 PERCENT OF THE TYPES CONTAINED 80 PERCENT OF THE TOTAL FREQUENCY, WHICH IMPLIES HIGH POTENTIAL EFFECTIVENESS FOR SOFTWARE-BASED CORRECTION OF COBOL. SURPRISINGLY, ONLY FOUR HIGH-FPEQUENCY ERRORS WERE ERROR-PRONE, WHICH IMPLIES MINIMAL ERROR INDUCING DESIGN. COBOL MISSPELLINGS WERE CLASSIFIABLE IN THE FOUR ERROR CATEGORIES OF PREVIOUS RESEARCHERS. WHICH IMPLYES THAT COBOL MISSPELLINGS ARE CORRECTABLE BY EXISTENT ALGORITHMS. RESERVED WORD USAGE WAS NOT ERROR-PRONE, WHICH IMPLIES MINIMAL INTERFERENCE WITH USAGE OF RESERVED WORDS. OVER 80 PERCENT OF EPROR DIAGNOSIS WAS FOUND TO BE INACCUPATE. SUCH FEEDBACK IS NOT OPTIMAL FOR USERS, PARTICULARLY FOR THE LEARNING USER OF COBOL. (A) SP, 16R.

DESCRIPTION:

DEBUGGING EFFICIENCY DEPENDS ON SEARCHING FOR THE BUG IN THE RIGHT PLACE. ON MANY OCCASIONS, WHEN CONFRONTED BY PARTICULARLY STUBBORN BUGS, THE PRINCIPLE: 'IF YOU FON'T SEE THE BUG WHERE YOU'RE LOOKING, THEN YOU'RE LOOKING IN THE WRONG PLACE,' HAS HELPED US GREATLY. WE HAVE COME TO REFER TO THIS PRINCIPLE AS THE SECOND LAW OF DEBUGGING. OUR PRACTICAL EXPERIENCE WITH IT EXTENDS OVER A DOZEN YEARS. ON MANY OCCASIONS (JUDGING AFTER THE FACT), USE OF THIS LAW ENABLED US TO LOCATE A BUG MORE QUICKLY THAN WE OTHERWISE WOULD HAVE DONE. ON MANY OTHER OCCASIONS (AGAIN JUDGING AFTER THE FACT), WE WOULD HAVE FOUND A PARTICULAR BUG MORE QUICKLY IF WE HAD USED IT. JE ARE THOROUGHLY CONVINCED THAT THE SECOND LAW IS A KEY TO MORE RAPID DEBUGGING. IT, THEREFORE, MERITS WIDER RECOGNITION AND APPLICATION. (A)

LOVE, L.T., & BOWMAN, A.B. AN INDEPENDENT TEST OF THE THEORY OF SOFTWARE PHYSICS. SICPLAN NOTICES, NOVEMBER 1976, 11(11), 42-49.

DESCRIPTION:

RECENT WORK IN THE FIELD OF SOFTWARE PHYSICS HAS PRODUCED SEVERAL HYPOTHESES RELATING THE NATURE OF ALGORITHMS TO MEASURAPLE PROPERTIES OF COMPUTER PROGRAMS. ONE HYPOTHESIS IS THAT HALSTEAD'S MEASURE OF E, THE NUMBER OF ELEMENTARY MENTAL DISCRIMINATIONS REQUIRED TO IMPLEMENT AN ALGORITHM, IS STRONGLY RELATED TO MEASURABLE PROPERTIES OF COMPUTER PROGRAMS. SEVERAL EXPERIMENTS HAVE SHOWN A SURPRISINGLY HIGH CORRELATION BETWEEN E AND SUCH MEASURABLE PROPLRTIES OF PROGRAMS AS NUMBER OF BUG, CODING TIMES, ETC. THIS PAPER PRESENTS THE RESULTS OF AN INDEPENDENT STUDY OF TEST THIS HYPOTHESIS.

HALSTFAD'S MEASURE IS CALCULATED FOR THE TEST PROGRAMS USED IN TWO STUDIES PUBLISHED BY OTHER INVESTIGATORS (GOULD, 1975; WEISSMAN, 1574). CORRELATIONS ARE GIVEN BETWEEN 'AND GOULD'S MEDIAN DEBUG TIME (R=.2C) AND AVERAGE NUMBER OF ERRORS (R=.78), AND BETWEEN E AND WEISSMAN'S COMPREHENSION QUIZZES AND SELF-EVALUATIONS (COPRELATIONS RANGE FROM -.97 TO +.37). LOVE, L.T., & FITESIMMONS, A. A SURVEY OF SOFTWARE PRACTITIONERS TO IDENTIFY CRITICA' FACTORS IN THE SOFTWARE DEVELOPMENT PROCESS (TECHNICAL REPORT NO. 76D6AS1). ARLINGTOM, VIRGINIA: GENERAL ELECTRIC COMPANY, INFORMATION SYSTEMS PROGRAMS, 1976.
DESCRIPTION:

WE MUST FIRST IDENTIFY THE CRITICAL AND INEFFICIENT COMPONENTS OF THE SOFTWARE DEVELOPMENT PROCESS, THEN DETERMINE WHICH ONES CAN BE ELIMINATED OR IMPROVED. THE PRESENT RESEARCH PROJECT WAS CONCEIVED AS A STEP TOWARD THE IDENTIFICATION OF CRITICAL COMPONENTS OF THE SUSTWARE DEVELOPMENT PROCESS.

ESSENTIALLY, WE DECIDED TO POLL THOSE PEOPLE MOST QUALIFIED TO PINPOINT CURRENT SOFTWARE DEVELOPMENT DIFFICULTIES; VIZ., THE SOFTWARE DEVELOPERS THEMSELVES. WE RECOGNIZE THAT THE INTGOSPECTIONS OF SOFTWARE PRACTITIONERS MAY NOT GENERATE THE ULTIMATE ANSWERS SINCE THE DIFFICULTIES WHICH THEY DELIEVE TO BE MOST CRITICAL MAY NOT, IN THE FINAL ANALYSIS, BE THE MOST CRITICAL. HE, THEREFORE, MAKE NO PRETENSE THAT WE ARE FINDING THE ANSWER TO OUR QUESTION. RATHER, UPON CONCLUSION OF THIS EFFORT, WE CAN ONLY SAY THAT WE KNOW WHAT SOFTWARE PRACTITIONERS "THINK" THE ANSWER IS.

A SIGNIFICANT CONTRIBUTION OF THIS WORK WILL BE THE ABILITY TO NOT ONLY IDENTIFY THE CRITICAL COMPONENTS OF THE SOFTWARE DEVELOPMENT PROCESS, BUT ALSO TO HAVE AN INDEX OF THE CRITICALITY OF EACH SUCH COMPULENT.

EMPULATION SAMPLED: TWO HUNDRED SURVEYS WERE SENT OUT TO SOFTWARE DEVELOPERS AND MANAGERS IN FIVE LOCATIONS OF GENERAL ELECTRIC. THESE INCLUDED SO SENT TO ARLINGTON; 69 SENT TO SUNNYVALE; 30 TO BELTSVILLE; 10 TO SCHENECTADY; AND SC TO SYRACUSE. THE RESPONDENTS INCLUDED ANY PERSON WHO WAS OR HAD BEEN DIRECTLY INVOLVED IN DEVELOPING SOFTWARE FOR AT LEAST ONE YEAR. THE RESPONDENTS WERE INSTRUCTED TO ANSWER EACH QUESTION BASED ON THEIR OWN EXPERIENCES IN SOFTWARE DEVELOPMENT PROJECTS. BECAUSE OF THE RAPID RATE OF CHANGE OF METHODS AND TOOLS IN THE SOFTWARE FIELD, THE RESPONDENTS WERE ASKED THAT RESPONSES BE LIMITED TO EMPERIENCES DURING THE LAST TWO YEARS.

DESCRIPTION OF SURVEY: THE SURVEY WAS COMPOSED OF THREE SECTIONS AND A COVER LETTER DESCRIBING THE PURPOSE AND GENERAL DUTLINE OF THE SURVEY. (A COPY OF THE COMPLETE SURVEY IS 13 APPENDIX A.) (A)

DESCRIPTION:

and the second s

IT HAS BECOME INCREASINGLY IMPORTANT CITHIN GE TO IMPROVE THE PRODUCTIVITY OF PROGRAMMERS AS WELL AS THE BELIABILITY OF THE SOFTWARE THEY PRODUCE. TO PROVIDE US WITH INFORMATION AS TO WHICH COMPONENTS OF THE SOFTWARE DEVELOPMENT PROCESS ARE NOST IMPORTANT TO THE OVERALL SUCCESS OF A SOFTWARE DEVELOPMENT SEFORT, WE SURVEYED 89 SOFTWARE PRACTITIONERS FROM 4 GE LOCATIONS.

WE ATTEMPTED TO ELICIT THE SAME TYPE OF ENFORMATION IN THREE DIFFERENT WAYS: 12 KATINGS OF THE CRITICALITY OF 100 INDIVIDUAL PROBLEMS, 22 RANK ORDERING OF CLASSES OF PROBLEMS, AND 32 OPEN-ENDED QUESTIONS REQUESTING SIMILAR INFORMATION.

NO SINGLE PROBLEM STOOD OUT AS MOST CRITICAL IN ALL THREE SECTIONS OF THE SURVEY. IN SECTION 1, MGST CRITICAL DIFFICULTIES WERE RELAYED TO THE MANAGEMENT PLAN AND REQUIREMENTS ANALYSIS. BY CONTRAST, ON THE OPEN-ENDED QUESTIONS, THE SINGLE MOST IMPORTANT FACTOR CONTRIBUTING TO THE SUCCESS OF SOFTWARE DEVELOPMENT EFFORTS WAS CLAIMED TO BE COMPETENT AND COOPERATIVE PEOPLE. (A)

A SYSTEM CALLED THE PROGRAM MODEL BUILDER (PMB) IS BEING DESIGNER AND IMPLEMENTED TO PERFORM THE BASIC OPERATIONS REQUIRED TO SYNTHESIZE AND MODIFY PROGRAMS. PMB PLAYS A CENTRAL ROLE 'S ONE OF THE EXPERT MODULES OF THE PSI PROGRAM SYNTHESIS SYSTEM. PMB BUILDS A COMPLETE AND CONSISTENT PROGRAM MODEL FROM SMALL CHUNKS OF PROGRAM SPECIFICATION RECEIVED FROM OTHER PSI EXPERTS. PMB MUST DEAL WITH THE FACT THAT THESE PROGRAM FRAGMENTS OFTEN OMIT DETAILS AND MAY BE INCOMPLETE, AMBIGUOUS, INCONSISTENT, NONSPECIFIC, AND ARBITRARILY ORDERED. THE INITIAL VERSION OF PMB HAS SUCCESSFULLY SYNTHESIZED A FEW PROGRAM MODELS FROM FRAGMENTS. THIS WORK INCLUDES THE FVOLUTION OF A VERY HIGH-LEVEL PROGRAM MODELLING LANGUAGE, THE IDENTIFICATION AND CODIFICATION OF USEFUL VERY H'GH-LEVEL PROGRAMMING KNOWLEDGE FROLUDINE EQUIVALENCE TRANSFORMATIONS, AND THE IMPLEMENTATION OF A RULE-BASED PROBLEM SOLVING SYSTEM EMBODYING THIS KNOWLEDGE. MCGEE, R.T. THE TRANSLATION OF DATA STRUCTURE REPRESENTATIONS OF SIMPLE QUEUING PROBLEMS INTO GPSS PROGRAMS AND ENGLISH TEXT. MONTEREY, CALIFORNIA: NAVAL POSTGRADUATE SCHOOL, JUNE 1971. (NTIS NO. AD 757701) DESCRIPTION:

ONE OF THE GOALS OF COMPUTER TECHNOLOGY IS TO HAVE THE ABILITY TO COMMUNICATE WITH THE COMPUTER IN A NATURAL LANGUAGE SUCH AS ENGLISH. A RESEARCH EFFORT UNDCRWAY AT THE NAVAL POSTGRADUATE SCHOOL INVOLVES THE DESIGN AND IMPLEMENTATION OF A COMPUTER SYSTEM FOR TRANSLATING HATURAL LANGUAGE DESCRIPTIONS OF SIMULATION PROBLEMS INTO EXECUTABLE COMPUTER PROGRAMS. IN THIS SYSTEM, ENGLISH TEXT IS TRANSLATED INTO AN INTERNAL DATA STRUCTURE WHICH IS THEN TRANSLATED INTO A COMPUTER PROGRAM FOR PERFORMING THE SIMULATION. THIS PAPER REPORTS ON AN EFFORT MADE TO AID THE USER OF THIS SYSTEM BY (1) EXTENDING THE CAPABILITIES OF AN EXISTING PROCEDURE FOR TRANSLATING THE INTERNAL DATA STRUCTURE INTO A GPSS SIMULATION PROGRAM, AND (2) DEVELOPING A PROCEDURE FOR TRANSLATING THE DATA STRUCTURE INTO ENGLISH TEXT SO THE USER COULD SEE THAT HIS INPUT TEXT HAD BEEN CORRECTLY INTERPRETED. THE BASIC OPERATION OF THE SYSTEM IS DESCRIBED AND EXAMPLES ARE GIVEN TO ILLUSTRATE THE SYSTEM'S CAPABILITIES. (A)

250 STRUCTURED PROGRAMMING
MCGGWAN, C. STRUCTURED PROGRAMMING: A REVIEW OF SOME PRACTICAL CONCEPTS.
COMPUTER MAGAZINE, JUNE 1975, 8(6), 25-30.
DESCRIPTION:

THE SOFTWARE DEVELOPMENT PROCESS IS BEING REEXAMINED CRITICALLY THESE DAYS. THERE ARE AT LEAST TWO REASONS FOR THIS RENEWED SCRUTINY: FIRST, THE INEXORABLE ADVANCE OF HARDWARE TECHNOLOGY HAS NOW MADE SOFTWARE COSTS THE CLEARLY DOMINANT COMPONENT OF COMPUTING COSTS. SECOND, AMIDST THE FUROR OVER STRUCTURED PROGRAMMING (SP), WE HAVE COLLECTIVELY REALIZED THAT WE CAN INDEED DO BETTER (IN AT LEAST THE CODING SUBPROCESS OF SOFTWARE PRODUCTION). THIS REALIZATION LEADS US TO RECONSIDER CURRENT DESIGN AND IMPLEMENTATION STRATEGIES FOR POSSIBLY BETTER WAYS.

SP HAS BECOME A RALLYING POINT FOR METHODOLGGY CHANGES. IN THE LONG RUN, THIS MAY WELL BE ITS MOST SIGNIFICANT IMPACT UPON PRODUCTION PROGRAMMING PRACTICES. SEVERAL NEW SOFTWARE TECHNIQUES AND YOOLS HAVE GATHERED UNDER THE GONFALON OF SP. IN THIS PAPER, I WILL DISCUSS SOME IMPORTANT PRACTICAL FEATURES OF THE ENSEMBLE CALLED SP. (A) 6P. 11R.

 DESCRIPTION:

INTERNATIONAL BUSINESS MACHINES HAS COMPLETED A SERIES OF REPORTS, RADC-TR-3DC, WHICH OUTLINE A NUMBER OF PROCEDURES WHICH COLLECTIVELY ARE CONCEIVED OF AS MODERN PROGRAMMING PRACTICES. THESE MODERN PROGRAMMING PRACTICES ARE DESIGNED TO IMPROVE THE PRODUCTION OF SOFTWARE BY REDUCING ERRORS, ENHANCING AMENABILITY TO CHANGE, AND IMPROVING PERFORMANCE OF INDIVIDUAL PROGRAMMERS, THUS REDUCING COSTS AND CONCOMITANTLY LOWERING TIME TO COMPLETE SOFTWARE PROJECTS. SINCE IMPLEMENTATION OF THESE PRACTICES IS COSTLY IN TERMS OF TRAINING, SETTING OF STANDARDS AND MONITORING, IT IS CONSIDERED PRUDENT TO EVALUATE HOW MODERN PRACTICES MIGHT BE COMPARED TO CONVENTIONAL PROGRAMMING PRACTICES IN ORDER TO ASSESS THE VALUE OF IMPLEMENTING THE PROGRAM ON A LARGE SCALE. THIS PAPER SUMMARIZES THE ANALYSES MADE BY FOUR INDEPENDENT CONSULTANTS ABOUT HOW SUCH EVALUATIONS MIGHT BE CONDUCTED. (A)

259 STRUCTURED PROG. AMNING

MILLER, E., F., JR. & LINDAMOOD, G. E. STRUCTURED PROGRAMMING: TOP-DOWN APPROACH. DATAMATION, DECEMBER 1973, 50-52, DESCRIPTION:

STRUCTURED PROGRAMMING, IF THE CURRENT LEVEL OF INTERES) AND CONTROVERSY WITHIN THE COMPUTING COMMUNITY IS ANY MEASURE, IS AN IDEA WHOSE TIME HAS COAL. IN A VERY GENERAL WAY, STRUCTURED PROGRAMMING IS A REFLECTION OF THE CONCERN WITH FORM AND THE INTERRELATIONSHIPS WHICH EXIST BETWEEN THE ATTRIBUTES OF A "GOOD" PROGRAM AND WHAT THE PROGRAM IS SUPPOSED TO DO. THUS, THE INTERSE INTEREST IN STRUCTURED PROGRAMMING MAY BE A MANIFESTATION OF A COMING MATURATION OF COMPUTING WHICH IS INTRINSICALLY A HUMAN ACTIVITY. (A, ABBR.)
3P, 11R.

260 PROGRAMMING LANGUAGES

MILLER, E.F., JR., & WASSERMAN, A.I. HIGH ORDER LANGUAGE EVALUATION PROJECT: FINAL REPORT (TECHNICAL REPORT NO. 3/1-78-523-110-SF). SAN FRANCISCO, CALIFORNIA: SCIENCE APPLICATIONS, INC., FEBRUARY 1977.

261 TESTING

MILLER, J.C., & MALONEY, C.J. SYSTEMATIC MISTAKE ANALYSIS OF DIGITAL COMPUTER PROGRAMS. COMMUNICATIONS OF THE ACM, 1963, 6, 58-63.
DESCRIPTION:

EFFECTIVE PROGRAM TESTING REQUIRES THAT EVERY PART OF THE PROGRAM BE CONSIDERED. THIS PAPER DESCRIBES A METHOD FOR DETERMINING THE NECESSARY YEST CASES AND FACILITATING THE LOCATION OF ERRORS. A PRINCIPAL COMPONENT OF THIS METHOD IS THE IDENTIFICATION OF BRANCHPOINTS THAT ARE AFFECTED BY INPUT DATA. (MEA) 6P, 11%.

262 GENERAL

MILLER, L.A. HARLAN MILLS ON "THE PSYCHOLOGY OF QUALITY" (REPORT NO. RC 3779). YORKTOWN HEIGHTS, NEW YORK: IBM WATSON RESEARCH CENTER, MAY 1973. DESCRIPTION:

IN PREPARING FOR AN OPEN DISCUSSION PANEL ON THE PSYCHOLOGY OF QUALITY SCHEDULED FOR THE 1972 IBM SYSTEMS DEVELOPMENT DIVISION PROGRAMMING SYMPOSIUM (MARCH 26-29, WASHINGTON, D.C.), A NUMBER OF TENTATIVE SUGGESTION QUESTIONS PREPARED BY THE AUTHOR (AS MODERATOR) WERE SENT TO DR. HARLAN MILLS, AND OTHER PANEL MEMBERS, FOR THEIR EVALUATION PRIOR TO THE SYMPOSIUM. THE QUESTIONS, AND DR. MILLS RESPONSES, ARE REPRODUCED VERBATIM IN THIS REPORT.

DR. RILLS COMMENTS REFLECT HIS THINKING AND PROPOSALS FOR ALMOST ALL ASPECTS OF PROGRAMMING, RANGING FROM PROGRAMMER SELECTION AND MANAGEMENT TO THE PROGRAMMING WORK ENVIRONMENT. IN VIEW OF THE INCREASING INTEREST IN AND INFLUENCE OF DR. MILLS IDEAS (E.G., CHIEF PROGRAMMER TEAM, TOF-DOWN PROGRAMMING), IT WAS BELIEVED USEFUL TO COMMUNICATE THIS INFORMATION TO ABROAD AUDIENCE.

A SECOND OBJECTIVE OF THIS DOCUMENTATION IS TO STIMULATE GENERAL INTEREST IN LOOKING AT THE PROBLEMS OF PROGRAMMING AND PROGRAM QUALITY FROM A BEHAVIORAL POINT OF VIEW.

THE READER SHOULD KEEP IN MIND THAT THE QUESTIONS, AND ANSWERS, WERE INTENDED TO EXPLORE A VARIETY OF POSSIBLE RELATIONS BETWEEN PSYCHOLOGICAL FACTORS OF PROGRAMMERS AND THE QUALITY OF PROGRAMS PRODUCED BY THEM (DEFINED PRIMARILY IN TERMS OF MINIMIZING BUGS AND PROVIDING FOR EASY EFFICIENT MAINTENANCE AND MODIFICATION OF CODES). THE PAPER IS NOT A TECHNICAL TREATMENT OF THE SUBJECT MATTER, DUE TO THE INFORMAL ATTITUDINAL NATURE OF THE INTERCHANGE. THUS, LITERATURE CITATIONS AND OTHER DOCUMENTATION ARE NOT INCLUDED. THE SPECIFIC QUESTIONS WERE ORGANIZED INTO THREE MAIN CONTENT AREAS: (1) COGNITIVE AND TRAIT ASPECTS OF INDIVIDUAL PROGRAMMERS, (2) MANAGEMENT AND ORGANIZATION OF PROGRAMMING GROUPS AND PROJECTS, AND (3) THE PROGRAMMING WORK ENVIRONMENT.

263 PROGRAMMING AND QUERY LANGUAGE PROPERTIES
MILLER, L.A. PROGRAMMING BY NON-PROGRAMMERS. INTERNATIONAL JOURNAL OF
MAN-MACHINE STUDIES, 1974, 6, 237-260 (ALSO: RESEARCH REPORT RC-428C, IBM
WATSON RESEARCH CENTER, YORKTOWN HEIGHTS, NY, 1973).
DESCRIPTION:

NON-PROGRAMMERS WERE ASKED TO DEGAMIZE NATURAL ENGLISH COMMANDS OF A LABORATORY PROGRAMMING LANGUAGE INTO PROGRAMS FOR SOLVING NAME-SORTING PROBLEMS. THE PROBLEMS DIFFERED IN THE SORT CONCEPT TO BE PROGRAMMED (CONJUNCTION VS. DISJUNCTION) AND IN THE FORM OF EXPRESSION OF THE LETTER TESTS TO BE MADE ON THE NAMES (AFFIRMATION VS. NEGATION).

PROGRAMMING PERFORMANCE WAS FOUND TO BE IMPAIRED WITH DISJUNCTIVE CONCEPTS AND WITH LETTER TESTS INVOLVING NEGATION. DIFFERENT CLASSES OF PROGRAM STRUCTURE WERE IDENTIFIED AND WERE ASSOCIATED WITH CERTAIN PROBLEM CONDITIONS AND ERROR MEASURES. AN INFLUENCE OF PRIOR EXPERIENCE WITH PROCEDURES ON PERFORMANCE WAS SUGGESTED. PROGRAM DEBUGGING AND TESTING PERFORMANCE WAS CHARACTERIZED. (A) 24P, 17k.

266 PROGRAMMING

MILLER, L.A. NAIVE PROGRAMMER PROBLEMS WITH SPECIFICATION OF TRANSFER-OF-CONTROL. AFIPS CONFERENCE PROCEEDINGS, 1975, 44, 657-063...
DESCRIPTION:

WE HAVE CONDUCTED A SERIES OF EXPERIMENTS CONCERNING THE PROGRAMMING PERFORMANCE OF PERSONS WITH NO PRIOR CONTACT WITH COMPUTERS OTHER THAN THE TRAINING RECEIVED IN THE EXPERIMENTAL SESSIONS. OUP OBJECTIVE IN THESE EXPERIMENTS IS TO IDENTIFY DESIGN PRINCIPLES FOR FACILITATING COMMUNICATION BETWEEN THE NAIVE USER, AS A PROBLEM SOLVER, AND A COMPUTER SYSTEM. WE VIEW PROGRAMMING AS A PROBLEM SOLVING ACTIVITY, AN INSTANCE OF WHAT GENERALLY MAY BE CALLED "PROCEDURE SPECIFICATION." WE BELIEVE IT POSSIBLE TO DESIGN COMPUTERS AS OPTIMAL PROBLEM-SOLVING TOOLS ONLY IF THE OPERATING CHARACTERISTICS OF THE PROBLEM SOLVERS ARE KNOWN AND TAKEN INTO ACCOUNT. CONSEQUENTLY, WE ARE SEEKING TO DISCOVER THE PROBLEMS AND PROCESSES INVOLVED IN HUMAN SPECIFICATION OF PROCEDURES, USING EXPERIMENTAL LABORATORY METHODS. THE TOPICS COVERED ARE: (1) INITIAL STUDIES DEMONSTRATING THE FEASIBILITY OF INVESTIGATING PROGRAMMING IN THE LABORATORY AND SUGGESTING EXPRESSION OF TRANSFER-OF-CONTROL AS A LOCUS OF DIFFICULTY, (2) STUDIES COMPARING VARIOUS MEANS FOR EXPRESSING TRANSFER-OF-CONTROL, (3) RESULTS OF EXPERIMENTS USING OUR "PROCEDURE TABLE", AND (4) RESULTS OF AMALYSIS OF FECTFICATIONS IN NATURAL LANGUAGE. (A. ABBR.) 7P, 2R.

265 PROGRAMMING LANGUAGES

MILLER, L.A. MATURAL LANGUAGE PROCEDURES: GUIDES FOR PROGRAMMING LANGUAGE DESIGN. IN PROCEEDINGS OF THE 6TH CONGRESS OF THE INTERNATIONAL ENGCHOMICS ASSOCIATION. SANTA MONICA, CALIFORNIA: HUMAN FACTOR'S SOCIETY, 1976. DESCRIPTION:

THE OBJECTIVE OF THIS PAPER IS TO FIND A COMMON SET OF MECHANISMS FOR EXPRESSING PROCESS INFORMATION AS PROCEDURES. THE UNDERLYING ASSUMPTIONS ARE THAT 1) THERE IS A COMMON SET OF MECHANISMS FOR COMMUNICATING PROCEDURAL INFORMATION, 2) A MAPPING OF PROCESS INFORMATION ONTO STRYAGTIC STRUCTURES. MAY COMMUNICATE SPECIFIC PROCESS INFORMATION, AND 35 THE DECODING OF PROCESS INFORMATION IS VERB-DRIVEN. A MODEL AS PRUPOSED HALL CONSISTS OF 1) A DOMAIN ENCYCLOPEDIA WITH RELEVANT ATTRIBUTES AND HELATIONS FOR THE ELEMENTS IN A PROCEDURAL DOMAIN, 2) PROCEDURAL FOSTULATES TO SULDE THE EXTRECTION AND EXECUTION OF INFORMATION, AND 3) VERB PROGRAMS SIVING TEMPORAL PROCESS MEANINGS. THE MODEL WAS EVALUATED IN THE DOMAIN OF KITCHEN RECIPES. (MEA) 3CP, 3R.

266 SPECIFICATION OF PROCEDURES IN NATURAL LANGUAGE

MILLER, L.A., & BECKEP, C.A. PROGRAMMING IN NATURAL ENGLISH (TECHNICAL REPORT NO. RC-5137). YORKTOWN HEIGHTS, NEW YORK: IBM NATSON RESEARCH CENTER, HOVEMBER 1974. (NTIS NO. AD ADC3923) DESCRIPTION:

COLLEGE STUDENTS WERE ASKED TO TYPE DETAILED SPECIFICATIONS OF PROCIDURES IN THEIR NATURAL LANGUAGE (ENGLISH) AS SOLUTIONS FOR A SET OF SIX FILE MANIPULATION PROBLEMS. THE LANGUAGE PRODUCTIONS WERE EXAMINED FROM THE POINTS OF VIEW OF SOLUTION CORRECTNESS, PREFERENCES OF EXPRESSIONS, CONTEXTUAL REFERENCING, WORD USAGE, AND FORMAL PROGRAMPING LANGUAGES. (A) AMONG OTHER PESULTS, SOLUTIONS WERE GENERALLY SATISFACTORY ONLY FOR THE SIMPLEST PROBLEMS; FOR MORE COMPLEX PROPLEMS, SOLUTIONS TENDED TO HE INCOMPLETE. SUBJECTS TENDED TO SELECT THE SIMPLEST OF THE AVAILABLE ALGORITHMS; THESE WERE NOT NECESSARILY THE MOST EFFICIENT OR THE LEAST ERROR-PRONE APPROACHES. FORTY-TWO PERCENT OF THE DATA REFERENCES WEFE CONTEXT-DEPENDENT. SUBJECTS TENDED TO TREAT DATA AGGREGATES, RATHER THAN INDIVIDUAL DATA ELEMENTS. LITTLE EXPLICIT TRANSFER OF CONTROL OCCURRED; THE PROCEDURES WERE MOSTLY LINEAR. (HRR) 58P, 38R.

267 GENERAL DISCUSSION OF ISSUES IN MAN-COMPUTER INTERACTION
MILLER, L.A., & THOMAS, J.C., JR. BEHAVIORAL ISSUES IN THE USE OF INTERACTIVE
SYSTEMS. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1977, 9, 509-536
(ALSO TECHNICAL REPORT NO. RC=6326, YORKTOWN HEIGHTS, NEW YORK: IEM WATSON
PESEARCH CENTER, DECEMBER 1976).
DESCRIPTION:

THIS PAPER IDENTIFIES BEHAVIORAL ISSUES RELATED TO THE USE OF INTERACTIVE COMPUTERS PRIMARILY BY PERSONS WHO ARE NOT COMPUTER PROFESSIONALS, SO-CALLED "GENERAL USERS." THIS IS NOT AN EXHAUSTIVE LITERATURE SURVEY, BUT INSTEAD PROVIDES: (1) A STRUCTURE FOR DISCUSSING ISSUES OF INTERACTIVE COMPUTING, AND (2) THE AUTHORS BEST ESTIMATE OF IMPORTANT BEHAVIORAL PROBLEMS, WITH SUGGESTIONS FOR SOLUTIONS.

THE DISCUSSION IS LIMITED IN THIS PAPER TO GENERAL ISSUES WHICH DO NOT TAKE INTO A:COUNT THE USER'S PARTICULAR TASK. THE TWO MAJOR TOPICS ARE SYSTEM CHARACTERISTICS (PERFORMANCE, FACILITIES, AND ON-LINE INFORMATION), AND INTERFACE CHARACTERISTICS (DIALOGUE SYTLE, DISPLAYS AND GRAPHICS, OTHER INPUT/OUTPUT MEDIA). (A) 28P, 142R.

- 268 CHIEF PROGRAMMER TEAMS
 MILLS, H.D. CHIEF PROGRAMMER YEAMS: TECHNIQUES AND PROCEDURES (IBM INTERNAL REPORT). JANUARY 1970.
- 269 STRUCTURED PROGRAMMING MILLS, N.D. TOP-DOWN PROGRAMMING IN LARGE SYSTEMS. IN R. RUSTIN (ED.), DEPUGGING TECHNIQUES IN LARGE SYSTEMS. ENGLEWOOD CLIFFS, NEW JERSEY: PRENTICE-HALL, 1971, 41-55.
 DESCRIPTION:

STRUCTURED PROGRAMMING CAN BE USED TO DEVELOP A LARGE SYSTEM IN AN EVOLVING REE STRUCTURE OF NESTED PROGRAM GODULES, WITH NO CONTROL BRANCHING BETWEEN MODULES EXCEPT FOR MODULE CALLS DEFINED IN THE TREE STRUCTURE. BY LIMITING THE SIZE AND COMPLEXITY OF MODULES, UNIT DEBUGGING CAN BE DONE BY SYSTEMATIC READING, AND THE MODULES EXECUTED DIRECTLY IN THE EVOLVING SYSTEM IN A TOP DOWN TESTING PROCESS. (A) 15P, 15<.

270 SOFTHARE ENGINEERING
MILLS, H.). HOW TO WRITE CORRECT PROGRAMS AND KNOW IT. IN PROCEEDINGS,
INTERNATIONAL CONFERENCE ON RELIABLE SOFTWARE, 21-23 APRIL 1975, LOS ANGELES,
CALIFORNIA. SIGPLAN NOTICES, 1975, 10, 363-370 (ALSO IBM TECHNICAL REPORT
NO. FSI 73-5000, GAITHERSBURG, MARYLAND: IBM CORP., 1973).
DESCRIPTION:

THURE IS NO FOOLPROOF WAY TO EVER KNOW THAT YOU HAVE FOUND THE LAST ERROR IN A PROGRAM. SO THE BEST WAY TO ACQUIRE CONFIDENCE THAT A PROGRAM HAS NO ERRORS IS MEVER TO FIND THE FIRST ONE, NO MATTER HOW MUCH IT IS TESTED AND USED. IT IS AN OLD MYTH THAT PROGRAMMING MUST BE AN EPPOR-PRONE, CUT-AND-TRI PROCESS OF FRUSTRATION AND ANXIETY. THE MEW PEALITY IS THAT YOU CAM LEARN TO CONSISTENTLY WRITE PROGRAMS WHICH ARE STROKE IN THEIR DEBUGGING AND INBSEQUENT USE. THIS NEW REALITY IS FOUNDED IN THE IDEAS OF STRUCTURED PROGRAMMING, AND PROGRAM CORRECTNESS, WHICH MOT ONLY PROVIDE A SYSTEMATIC APPRICACH (10) PROGRAMMING, BUT ALSO MOTIVATE A HIGH DEGREE OF CONCENTRATION AND PRECISION IN THE CODING SUBPROCESS. (A)

271 SOFTWARE ENGINEERING

MILLS, H.D. SOFTWARE DEVELOPMENT. IEEE TRANSACTIONS ON SOFTWARE ENGINEERING, 1976, SE-2, 265-273.

DESCRIPTION:

SOFTWARE DEVELOPMENT HAS EMERGED AS A CRITICAL BOTTLENECK IN THE HUMAN USE OF AUTOMATIC DATA PROCESSING. BEGINNING WITH AD HOC HEURISTIC METHODS OF DESIGN AND IMPLEMENTATION OF SOFTWARE SYSTEMS, PROBLEMS OF SOFTWARE MAINTENANCE AND CHANGES HAVE BECOME UNEXPECTEDLY LARGE. IT IS CONTENDED THAT IMPROVEMENT IS POSSIBLE ONLY WITH MORE RIGOR IN SOFTWARE DESIGN AND DEVELOPMENT METHODOLOGY. RIGOROUS SOFTWARE DESIGN SHOULD SURVIVE ITS IMPLEMENTATION AND BE THE BASIS FOR FURTHER EVOLUTION. SOFTWARE DEVELOPMENT AND REPLANKING, AND WITH DESIGN-TO-COST PROGRAMMING WITHIN EACH STAGE. (A) 9P, 18R.

272 SUFTWARE ENGINEERING

MILLS, H.D. SOFTWARE ENGINEERING. SCIENCE, 1977, 195, 1199-1205. DESCRIPTION:

THE PRACTICAL CONTROL OF COMPUTERS AND THEIR VERY COMPLEXITY REQUIRES A MATHEMATICAL BASIS FOR THEIR UNDERSTANDING. SOFTWARE IS BETTER DEFINED AS THE "LOGICAL DOCTRINE FOR THE HARMONIOUS COOPERATION OF PEOPLE AND MACHINES." CURRENT DATA PROCESSING SYSTEMS ARE WORKING WELL ENOUGH TO BE INDISPENSABLE, BUT POORLY ENOUGH TO BE THE CAUSE OF UNTOLD FRUSTRATION. SOFTWARE ENGINEERING IS, THEREFORE, AN EMERGING IDEA. THREE OF ITS CURRENT AREAS OF DISCIPLINE AND STUDY ARE DISCUSSED. THESE ARE: THE DESIGN AND VERIFICATION OF SEQUENTIAL PROCESSES, THE INTER/CTION OF PARALLEL OR "INDEPENDENT" PROCESSES, AND THE ORGANIZATION OF PROCESSES INTO SYSTEMS OF ABSTRACT MACHINES. (GDC)

273 USER REQUIREMENTS ANALYSIS

MJOSUND, A. TOWARD A STRATEGY FOR INFORMATION NEEDS ANALYSIS. COMPUTERS AND OPERATIONS RESEARCH, 1975, 2, 39-47.
DESCRIPTION:

INFORMATION NEEDS ANALYSIS IS A PREREQUISITE FOR DESIGN OF AN EFFECTIVE INFORMATION SYSTEM. HOWEVER, THE PROBLEMS ASSOCIATED WITH SUCH ANALYSIS HAVE BEEN LARGELY NEGLECTED IN THE INFORMATION SYSTEMS LITERATURE. TWO SIMULTANEOUS GENERAL APPROACHES ARE SUGGESTED WHICH ARE EXPECTED TO CONTRIBUTE TO THE SOLUTION OF THESE PROBLEMS. ONE IS TO USE THE INFORMATION SYSTEM ANALYSIS TO GUIDE RESEARCH, OR APPLICATION OF RESULTS FROM RESEARCH, TO SOLVE MANAGEMENT PROBLEMS. THE OTHER IS TO FOLLOW A STRATEGY IN THE ANALYSIS OF INFORMATION NEEDS SUCH THAT THE STEPS IN THIS ANALYSIS ARE CLOSELY RELATED TO THE STRUCTURE RELATING THE DECISIONS AND ACTIONS IN THE ORGANIZATION. A SROSS CLASSIFICATION SCHEME IS PROPOSED TO AID IN DETERMINING THE STRATEGY. (A) PP. 7R.

274 KAN-COMPUTER DIALOGUE

MOORE, R.K., & MAIN, W. INTERACTIVE LANGUAGES: DESIGN CRITERIA AND A PROPOSAL. AFIPS CONFERENCE PROCEEDINGS, 1968, 33 (Pt. 1), 193-200... DESCRIPTION:

THIS PAPER DISCUSSES THE DESIGN CRITERIA FOR INTERACTIVE PROGRAMMING LANGUAGES AND DESCRIBES TOL (TYMSHARE CONVERSATIONAL LANGUAGE). THE SALIENT FEATURES OF TOL INCLUDE LONG VARIABLE NAMES, SYMBOLIC STATEMENT LABELS, FULL-FLEDGED SUBPROGRAMS WITH PARAMETERS, AND THE ABILITY TO HANDLE RECURSIVE PROCEDURAL ALGORITHMS. (MEA) 8P, 2R.

275 PROGRAMMING

MORGAN, H.L. SPELLING CORRECTIONS IN SYSTEMS PROGRAMS. COMMUNICATIONS OF THE ACM, 1970, 13, 90-94.

DESCRIPTION:

THE PROPERTY OF THE PROPERTY O

A CANAL CANA

SEVERAL SPECIALIZED TECHNIQUES ARE SHOWN FOR EFFICIENTLY INCORPORATING SPELLING CORRECTION ALGORITHMS INTO COMPILERS AND OPERATING SYSTEMS. THESE INCLUDE THE USE OF SYNTAX AND SEMANTICS INFORMATION, THE ORGANIZATION OF RESTRICTED KEYWORD AND SYMBOL TABLES, AND THE CONSIDERATION OF A LIMITED CLASS OF SPELLING ERRORS. SAMPLE 360 CODING FOR PERFORMING SPELLING CORRECTION 1S PRESENTED. BY USING SYSTEMS WHICH PERFORM SPELLING CORRECTION, THE NUMBER OF DEBUGGING RUNS PER PROGRAM HAS BEEN DECREASED, SP. 11R.

276 SOFTWARE DESIGN

MORSENSTERN, M. AUTOMATING THE SOFTWARE DESIGN PROCESS FOR MANAGEMENT INFORMATION SYSTEMS. IN PROCEEDINGS OF THE COMPUTER SOFTWARE AND APPLICATIONS CONFERENCE. NEW YORK: INSTITUTE OF ELECTRICAL AND ELECTRONICS FRIGINEERS, INC., 1977, 642-648.

DESCRIPTION:

AN OPERATIONAL PROTOTYPE FACILITY HAS BEEN DEVELOPED WHICH AUTOMATES THE DESIGN OF SEFTWARE FOR BATCH-ORIENTED MANAGEMENT INFORMATION SYSTEMS. THE GLOBAL OPTIMIZATION CONSIDERATIONS INCLUDE THE DESIGN OF THE FILE SYSTEM, STRUCTURING OF EACH RUN, INTER-RUN DATA FLOW, ACCESS METHODS, FILE ORGANIZATIONS, AND SORTING. AN ANALYSIS OF THE INTERDEPENDENCIES ENABLES US TO ACCOUNT FOR THE NON-LOCAL EFFECTS OF THE DESIGN DECISIONS, SUCH AS THE INTERACTIONS WHICH OCCUR AMONG THE SORT ORDERS OF MULTIPLE KEY FILES AND THE SELECTION OF BLOCKING FACTORS. BOTH PRACTICAL AND 12 EORETICAL EVALUATION OF THIS DESIGNER-OPTIMIZER FACILITY INDICATES THAT THE RESULTING DESIGNS ARE GOOD, AND ARE COMPARABLE TO THOSE LIKELY TO BE PRODUCED BY A SYSTEM DESIGNER JHO IS LIMITED TO THE SAME REPERTOIRE OF TECHNIQUES. (A) 7P, SR.

277 PROGRAMMING LANGUAGES

MOULTON, P.G., & MULLER, M.E. DITRAN: A COMPILER EMPHASIZING DIAGNOSTICS. COMMUNICATIONS OF THE ACM, 1967, 10, 45-52.

DESCRIPTION:

DITRAM (DIAGNOSTIC FORTRAM) IS AN IMPLEMENTATION OF ASA BASIC FORTRAM WITH RATHER EXTENSIVE ERROR CHECKING CAPABILITIES BOTH AT COMPILATION TIME AND DURING EXECUTION OF A PROGRAM. THE NESD FOR IMPROVED DIAGNOSTIC CAPABILITIES AND SOME OBJECTIVES TO BE PET BY ANY COMPILER ARE DISCUSSED. ATTENTION IS GIVEN TO THE DESIGN AND IMPLEMENTATION OF DITRAM AND THE PARTICULAR TECHNIQUES EMPLOYED TO PROVIDE THE DIAGNOSTIC FEATURES. THE HANDLING OF ERROR MESSAGES BY A GENEPAL MACRO APPROACH IS DESCRIBED. SPECIAL FEATURES WHICH PROVIDE TEACHING AIDS FOR USE BY INSTRUCTORS ARE NOTED. (A)

278 SOFTWARE RELIABILITY

MUSA, J.O. O THEORY OF SOFTWARE RELIABILITY AND ITS APPLICATION. IEEE TRANSFITIONS ON SOFTWARE ENGINEERING, 1975, SE-1, 312-327. DESCRIPTION:

AN APPROACH TO A THEORY OF SOFTWARE RELIABILITY BASED ON EXECUTION TIME IS DERIVED. THIS APPROACH PROVIDES A MODEL THAT IS SIMPLE, INTUITIVELY APPEALING, AND IRMEDIATELY USEFUL.

the second secon

THE THEORY PERMITS THE ESTIMATION, IN ADVANCE OF A PROJECT, OF THE AMOUNT OF TESTING IN TERMS OF EXECUTION TIME REQUIRED TO ACHIEVE A SPECIFIED RELIABILITY GOAL (STATED AS A MEAN TIME TO FAILURE (MTTF)). EXECUTION TIME CAN THEN BE RELATED TO CALENDAR TIME, PERMITTING A SCHEDULE TO BE DEVELOPED. ESTIMATES OF EXECUTION TIME AND CALENDAR TIME REMAINING UNTIL THE RELIABILITY GOAL IS ATTAINED CAN BE CONTINUALLY REMADE AS TESTING PROCEEDS, BASED ONLY ON THE LENGTH OF THE EXECUTION TIME INTERVALS BETWEEN FAILURES. THE CURRENT MITT AND THE NUMBER OF ERPORS REMAINING CAN ALSO BE ESTIMATED. MAXIMUM LIKELIHOOD ESTIMATION IS EMPLOYED, AND CONFIDENCE INTERVALS ARE ALSO ESTABLISHED. THE FOREGOING INFORMATION IS OBVIOUSLY VERY VALUABLE IN SCHEDULING AND MONITORING THE PROGRESS OF PROGRAM TESTING. A PROGRAM HAS BEEN IMPLEMENTED TO COMPUTE THE FOREGOING QUANTITIES.

THE RELIABILITY MODEL THAT HAS BEEN DEVELOPED CAN BE USED IN MAKING SYSTEM TRADEOFFS INVOLVING SOFTWARE OR SOFTWARE AND HARDWARE COMPONENTS. IT ALSO PROVIDES A SOUNDLE BASED UNIT OF MEASURE FOR THE COMPARATIVE VALUATION OF VARIOUS PROGRAMMING TECHNIQUES THAT ARE EXPECTED TO ENHANCE RELIABILITY.

THE MODEL HAS BEEN APPLIED TO FOUR MEDIUM-BIZED SOFTTARE DEVELOPMENT PROJECTS, ALL OF WHICH HAVE COMPLETED THEIR LIFE CYCLES. MEASUREMENTS TAKEN OF MITH DURING OPERATION AGREE WELL WITH THE PREDICTIONS MADE AT THE END OF SYSTEM TEST. AS FAR AS THE AUTHOR CAN DETERMINE, THESE ARE THE FIRST TIMES THAT A SOFTWARE RELIABILITY MODEL HAS BEEN USED DURING SOFTWARE DEVELOPMENT PROJECTS. THE PAPER REFLECTS AND INCORPORATES THE PRACTICAL EXPERIENCE GAINED. (A)

281 PROGRAM COMPLEXITY
MYERS, G.J. AN EXTENSION TO THE CYCLOMATIC MEASURE OF PROGRAM COMPLEXITY.
SIGPLAN NOTICES, OCTOBER 1977, 12(10), 61-64.
DESCRIPTION:

A RECENT PAPER HAS DESCRIBED A GRAPH-THEORETIC MEASURE OF PROGRAM COMPLEXITY, WHERE A PROGRAM'S COMPLEXITY IS ASSUMED TO BE ONLY A FACTOR OF THE PROGRAM'S DECISION STRUCTURE. HOWEVER, SEVERAL ANOMALIES HAVE BEEN FOUND WHERE A HIGHER COMPLEXITY MEASURE WOULD BE CALCULATED FOR A PROGRAM OF LESSER COMPLEXITY THAN FOR A MORE-COMPLEX PROGRAM. THIS PAPER DISCUSSES THESE ANOMALIES, DESCRIBES A SIMPLE EXTENSION TO THE MEASURE TO ELIMINATE THEM, AND APPLIES THE MEASURE TO SEVERAL PROGRAMS IN THE LITERATURE. (A) 4P, 3R.

282 PROGRAMMING
NAGY, G., & PENNEBAKER, M.C. A STEP TOWARD AUTOMATIC ANALYSIS OF STUDENT
PROGRAMMING ERRURS IN A BATCH ENVIRONMENT. INTERNATIONAL JOURNAL OF MANMACHINE STUDIES, 1974, 6, 563-578.
DESCRIPTION:

THE OBJECT OF THIS INVESTIGATION IS TO DEVELOP A METHOD FOR THE AUTOMATIC COLLECTION OF MEANINGFUL STATISTICAL INFORMATION ABOUT THE CAUSES OF PROGRAM RESUBMITTAL IN A BATCH-PROJESSING ENVIRONMENT. SUCCESSIVE VERSIONS OF A GIVEN PROGRAM ARE COMPARED STATEMENT-BY-STATEMENT IN ORDER TO ISOLATE MINOR CHANGES MADE IN THE PROGRAM. ALL STATEMENTS INSERTED, SUBSTITUTED, OR DELETED ARE EXAMINED IN TERMS OF (1) THE TYPE OF STATEMENT (I.E. DO, IF, ETC.), (2) THE NUMBER OF CONSECUTIVE STATEMENTS INVOLVED IN THE CHANGE, AND (3) HOW MANY TIMES THE PROGRAM HAS ALREADY BEFN SUBMITTED (THE NUMBER OF "TRIES"). ONE THOUSAND ONE HUNDRED AND TEN PROGRAMS ARE ANALYZED IN THIS MANNEF. THE METHOD IS INTENDED TO BE USED, IN CONJUNCTION WITH DETAILED STUDY OF SELECTED CASES AND WITH FIGHTHER EXPERIMENTATION IN COMPLETELY CONTROLLED SITUATIONS, TO IMPROVE PROGRAMMING INSTRUCTION AND MANUALS, TO PRODUCE BETTER DIAGNOSTIC MESSAGES, TO AID IN THE DESIGN OF NEW COMPILERS, AND EVENTUALLY TO PPOVIDE FOR AUTOMATIC CORRECTION OF TRIVIAL MISTAKES. DESCRIPTION:

American property of the prope

THE PRESENT REPORT IS CONCERNED WITH A PROBLEM CRUCIAL TO THE USE OF COMPUTERS, VIZ. THE SO-CALLED SOFTWARE, OR PROGRAMS, DEVELOPED TO CONTROL THEIR ACTION. THE REPORT SUMMARISES THE DISCUSSIONS AT A WORKING CONFERENCE ON SOFTWARE ENGINEERING, SPONSORED BY THE NATO SCIENCE COMMITTEE. THE CONFERENCE WAS ATTENDED BY MORE THAN FIFTY PEOPLE, FROP ELEYEN DIFFERENT COUNTRIES, ALL CONCERNED PROFESSIONALLY WITH SOFTWARE, EITHER AS USERS, MANUFACTURERS, OR TEACHERS AT UNIVERSITIES. THE DISCUSSIONS COVER ALL ASPECTS OF SOFTWARE INCLUDING: (1) RELATION OF SOFTWARE TO THE HARDWARE OF COMPUTERS; (2) DESIGN OF SOFTWARE; (3) PRODUCTION, OR IMPLEMENTATION OF SOFTWARE; (4) DISTRIBUTION OF SOFTWARE; AND (5) SERVICE ON SOFTWARE.

BY INCLUDING MANY DIRECT QUOTATIONS AND EXCHANGES OF OPINION, THE REPORT REFLECTS THE LIVELY CONTROVERSIES OF THE ORIGINAL DISCUSSION.

ALTHOUGH MUCH OF THE DISCUSSIONS WERE OF A DETAILED TECHNICAL NATURE, THE REPORT ALSO CONTAINS SECTIONS REPORTING ON DISCUSSIONS WHICH WILL BE OF INTEREST TO A MUCH WIDER AUDIENCE. THIS HOLDS FOR SUBJECTS LIKE: (1) THE PROBLEMS OF ACHIEVING SUFFICIENT RELIABILITY IN THE DATA SYSTEMS WHICH ARE BECOMING INCREASINGLY INTEGRATED INTO THE CENTRAL ACTIVITIES OF MODERN SOCIETY; (2) THE DIFFICULTIES OF MEETING SCHEDULES AND SPECIFICATIONS ON LARGE SOFTWARE PROJECTS; (3) EDUCATION OF SOFTWARE (OR DATA SYSTEMS) ENGINEERS; AND (4) THE HIGHLY CONTROVERSIAL QUESTION OF WHETHER SOFTWARE SHOULD BE PRICED SEPARATELY FROM HARDWARE.

THUS, WHILE THE REPORT IS OF PARTICULAR CONCERN TO THE IMMEDIATE USERS OF COMPUTERS AND TO COMPUTES: MANUFACTURERS, MANY POINTS MAD SERVE TO ENLIGHTEN AND WARN POLICY MAKERS AT ALL LEVELS. READERS FROM THE WIDER AUDIENCE SHOULD NOTE, HOWEVER, THAT THE CONFERENCE WAS CONCENTRATING ON THE BASIC ISSUES AND KEY PROBLEMS IN THE CRITICAL AREAS OF SOFTWARE ENGINEERING. IT THEREFORE DID NOT ATTEMPT TO PROVIDE A BALANCED REVIEW OF THE TOTAL STATE OF SOFTWARE, AND TENDS TO UNDERSTRESS THE ACHIEVEMENTS OF THE FIELD. (A)

286 STRUCTURED PROGRAMMING

NEELY, P.M. THE NEW PROGRAMMING DISCIPLINE. SOFTWARE: PRACTICE AND EXPERIENCE, 1976, 6, 7-27.

DESCRIPTION:

RECENTLY THERE HAS BEEN SUBSTANTIAL INTEREST IN PROMOTING "STRUCTURED PROGRAMMING" AS A MEANS OF WRITING MORE NEARLY ERROR FREE PROGRAMS. HOWEVER SINCE THE CHIEF ADVOCATES OF STRUCTURED PROGRAMMING USE ALGOL OR PASCAL, AND DISDAIN FORTRAN, THERE IS A DIFFICULTY IN COMMUNICATION. SINCE IT IS MY PERCEPTION THAT STRUCTURED PROGRAMMING AND THE LESSONS TO BE LEARNED FROM PROOFS OF CORRECTNESS CAN BE APPLIED IN ANY LANGUAGE, INCLUDING FORTRAN, I FEEL THAT THESE IDEAS SHOULD BE PROMULGATED TO APPLIED SCIENTIFIC PROGRAMMERS.

HENCE THIS PAPER WILL COMMENCE WITH A SUMMARY OF THE WHOLE COMPLEX OF IDEAS AND PRACTICES THAT ARE SUBSUMED UNDER THE TERM "STRUCTURED PROGRAMMING". THEN SOME SIMPLE EXAMPLES OF TOP DOWN DESIGN AND PROGRAMMING WILL BE GIVEN. FINALLY I WILL RETURN TO A DISCUSSION OF SOME OF THE PROBLEMS WHICH ARE LIKELY TO BE ENCOUNTERED IN THE USE AND PROMULGATION OF STRUCTURED PROGRAMMING. (A) 21P, 7R.

STATE OF THE PARTY OF THE PARTY

NEWSTED, P.R. FORTRAN PROGRAM COMPREHENSION AS A FUNCTION OF DOCUMENTATION. MILWAUKEE, WISCONSIN: UNIVERSITY OF WISCONSIN, SCHOOL OF BUSINESS ADMINISTRATION, UNDATED. DESCRIPTION:

and the second s

BFHAVIORAL DATA ARE PRESENTED WHICH INDICATE THAT COMMENTS AND MNEMONIC VARIABLE NAMES MAY NOT ALWAYS IMPROVE STUDENT COMPREHENSION OF FORTRAN PROGRAMS. INTERACTION OF THESE VARIABLES WITH PROGRAM DIFFICULTY SUGGESTS THAT THEY ARE USEFUL ONLY AFTER A GIVEN DIFFICULTY LEVEL IS REACHED -- A LEVEL BEYOND WHICH IT IS NOT POSSIBLE TO CONCEPTUALIZE A PROGRAM AS A SINGLE IDEA. (A)

TWO EXPERIMENTS WERE PERFORMED: (1) A BETWEEN-GROUPS EXPERIMENT USING A SINGLE FORTRAN PROGRAM AND VARYING COMMENTS (PRESENT OR ABSENT) AND VARIABLE NAMES ("MNEMOWIC" OR "NON-MNEMONIC"), AND (2) A WITHIN-SUBJECT EXPERIMENT USING FOUR PROGRAMS WHICH VARIED IN DIFFICULTY ("EASY", "HARD") AND VARIABLE TYPE ("MNEMONIC", "NON-MNEMONIC"). AFTER EXPOSURE TO EACH PROGRAM, SUBJECTS WERE GIVEN MULTIPLE-CHOICE COMPREHENSION TESTS. NO SIGNIFICANT EFFECTS WERE FOUND IN THE FIRST EXPERIMENT. IN THE SECOND, BOTH MAIN EFFECTS (DIFFICULTY, VARIABLE TYPE) AND THEIR INTERACTION WERE SIGNIFICANT. THE "EASY, NON-MNEMONIC" PROGRAM WAS ASSOCIATED WITH BETTER TEST PERFORMANCE THAN THE "EASY, MNEMONIC" FROGRAM. (HRR) 7P, 6R.

289 REVIEW OF USER INTERACTION WITH NAVY COMPUTER SYSTEMS
NICHOLSON, R.M., WIGGINS, B.D., & SILVER, C.A. AN INVESTIGATION INTO SOFTWARE
STRUCTURES FOR MAN/MACHINE INTERACTIONS. ARLINGTON, VIRGINIA: ANALYTICS, INC.,
FEBRUARY 1972. (NTIS NO. AD 737266)
DESCRIPTION:

THE CURRENT TREND IN COMMAND AND CONTROL/INFORMATION SYSTEMS WITHIN THE NAVY, TOWARD GREATER USE OF INTERACTIVE CAPABILITIES, HAS THE EFFECT OF BRINGING THE TRUE "USER" -- THE DECISION MAKER -- INTO DIRECT CONTACT WITH THE SYSTEM, RATHER THAN USING A PROGRAMMER AS AN INTERMEDIARY. IT IS THEREFORE NECESSARY THAT THE SYSTEM DESIGNER ORIENT THE MAN/MACHINE COMMUNICATION LESS TOWARD HIS OWN PROGRAMMING COMMUNITY AND MORE TOWARD A USER WHOSE FAMILIARITY WITH COMPUTER DEVICES AND TERMINOLOGY IS SOMEWHAT LESS THAN HIS OWN.

FOR A CLEAR VIEW OF THE TYPICAL USER AND THE FUNCTIONS HE AND THE SYSTEM PERFORM, A SURVEY OF RECENT NAVY SYSTEMS IS DESCRIBED. A REVIEW OF THE LITERATURE IN INFORMATION SYSTEMS TO DETERMINE THE AVAILABILITY OF INFORMATION USEFUL TO THE SYSTEM DESIGNER IN INTERACTIVE SOFTWARE PERFORMANCE IS PRESENTED. FINALLY, A RESEARCH PROGRAM TO DERIVE THE NEEDED INFORMATION IS PROPOSED. (A) 92P, 55R.

290 PROGRAMMING
NICKERSON, R.S. SOME COMMENTS ON SOFTWARE DEVELOPMENT. IN PROCEEDINGS, ARMY
HUMAN FACTORS RESEARCH AND DEVELOPMENT CONFERENCE, OCTOBER 197G.

291 GENERAL DISCUSSION OF HUMAN FACTORS IN COMPUTER SYSTEMS
NICKERSON, R.S., ELKIND, J.I., & CARBONELL, J.R. HUMAN FACTORS AND THE DESIGN
OF TIME SHARING COMPUTER SYSTEMS. HUMAN FACTORS, 1968, 10, 127-133.
DESCRIPTION:

THE ADVENT OF COMPUTER TIME SHARING POSES AN EXTRAORDINARY CHALLENGE TO HUMAN FACTORS RESEARCH DURING THE NEXT DECADE. BEFORE TIME SHARING, TWO FACTS COMBINED TO DE-EMPHASIZE THE IMPORTANCE OF HUMAN FACTORS CONSIDERATIONS IN THE DESIGN OF COMPUTER SYSTEMS: (1) THE COST OF THE COMPUTER'S TIME WAS EXORBITANTLY HIGH RELATIVE TO THE COST OF USERS' TIME, AND (2) THE USERS CONSTITUTED A SELECT, HIGHLY SKILLED AND HIGHLY MOTIVATED GROUP OF SPECIALISTS. TWO OF THE PROMISES OF TIME SHARING, HOWEVER, ARE (1) A DRASTIC REDUCTION IN THE COST OF COMPUTER TIME TO THE INDIVIDUAL USER, AND (2) THE LARGE SCALE AVAILABILITY OF COMPUTER FACILITIES TO INDIVIDUALS UNTRAINED IN ANY AREAS OF COMPUTER TECHNOLOGY. HUMAN FACTORS CONSIDERATIONS THEN BECOME IMPORTANT BOTH FOR ECONOMIC AND PSYCHOLOGICAL REASONS. (A)

PRINCIPAL AREAS DISCUSSED ARE: "CONVERSATIONAL" LANGUAGES, SYSTEM RESPONSE TIME, CHARGING ALGORITHMS AND THEIR EFFECT ON SYSTEM USE, EASE OF USE AND CONFLICTING NEEDS OF NOVICE AND EXPERT USERS, AND MAXIMIZATION OF ACCESSIBILITY VERSUS MINIMIZATION OF SYSTEM IDLE TIME. (HRR) 7P, 4R.

- 302 PROGRAMMING LANGUAGES
 PALME, J. LANGUAGES FOR RELIABLE SOFTWARE. DATAMATION, DECEMBER 1975, 21(12),
 77-80.
 DESCRIPTION:

A NUMBER OF PROGRAMMING LANGUAGE AND OPERATING SYSTEM CONSTRUCTS ARE AVAILABLE WHICH MAY INCREASE THE RELIABILITY OF SOFTWARE, BUT WHICH ARE NOT WIDELY USED, EVEN AMONG THE MOST POPULAR LANGUAGES. THESE CONSTRUCTS ALLOW GREATER DETECTION OF ERRORS AT EXECUTION TIME, OR, IN SOME CASES, AT COMPILATION TIME. AMONG THE FEATURES DISCUSSED ARE RESTRICTIONS ON DATA TYPES AND VALUES, FEATURES WHICH PREVENT UNDEFINED CALCULATIONS, DATA TYPE AND RANGE CHECKING AT MODULE INTERFACES, AND AVOIDANCE OF SEVERAL CONSTRUCTS (E.G., INTERRUPTS, UNNECESSARY PARALLEL PROCESSING) WHICH HAVE BEEN OBSERVED TO CAUSE PROBLEMS. MANY OF THE RECOMMENDED FEATURES HAVE BEEN IMPLEMENTED IN THE LANGUAGE SIMULA 67. (HRR) 3P, OR.

373 SOFTWARE DEVELOPMENT
PARNAS, D. INFCRMATION DISTRIBUTION ASPECTS OF DESIGN METHODOLOGY.
PROCEEDINGS OF IFIP CONGRESS, 1971, 71, 339-344.
DESCRIPTION:

THE ROLE OF DOCUMENTATION IN THE DESIGN AND IMPLEMENTATION OF COMPLEX SYSTEMS IS EXPLORED, RESULTING IN SUGGESTIONS IN SHARP CONTRAST WITH CURRENT PRACTICE. THE CONCEPT OF SYSTEM STRUCTURE IS STUDIED BY EXAMINING THE MEANING OF THE PHRASE "CONNECTIONS BETWEEN MODULES". IT IS SHOWN THAT SEVERAL SYSTEM DESIGN GOALS (EACH SUGGESTING A PARTIAL TIME ORDERING OF THE DECISIONS) MAY BE INCONSISTENT. SOME PROPERTIES OF PROGRAMMERS ARE DISCUSSED. SYSTEM DOCUMENTATION WHICH MAKES ALL INFORMATION ACCESSIBLE TO ANYONE WORKING ON THE PROJECT IS DISCUSSED. THE THESIS THAT SUCH INFORMATION "BROADCASTING" IS HARMFUL, THAT IT IS HELPFUL IF MOST SYSTEM INFORMATION CAN BE HIDDEN FROM MOST PROGRAMMERS, IS SUPPORTED BY USE OF THE ABOVE MENTIONED CONSIDERATIONS AS WELL AS BY EXAMPLES. (A) 6P, 18R.

304 SOFTWARE ENGINEERING PARNAS, D.L. SOME CONCLUSIONS FROM AN EXPERIMENT IN SOFTWARE ENGINEERING TECHNIQUES. AFIPS CONFERENCE PROCEEDINGS, 1972, 41, 325-329. DESCRIPTION:

Division to the second

SECTION OF THE PROPERTY OF THE

Maril application and the comment of the comment of the comment of the second of the s

A SMALL PROGRAMMING PROJECT, UNDERTAKEN BY RELATIVELY INEXPERIENCED PROGRAMMERS, WAS DONE TO ASSESS SEVERAL PARAMETERS AND CLAIMS OF STRUCTURED PROGRAMMING TECHNIQUES. THE DESIGN INCLUDED FIVE MODULES TO BE PROGRAMMED BY EACH OF FIVE TECHNIQUES. A NUMBER OF THESE WERE INCORRECT OR INCOMPLETE. RESULTS WERE DRAWN FROM THE REST. THE PAPER DOES NOT EXPLAIN THE EXPERIMENTAL DESIGN; INSTEAD, IT DWELLS MAINLY ON THE CONCLUSIONS. THESE ARE THAT EFFORT SHOULD BE HEAVILY INVESTED IN THE PRE-BESIGN PHASE FOR THE GREATEST RETURNS. DOCUMENTATION OF EXTERNALS, AND THAT STEMMING FROM PRE-DESIGN, WAS THE MOST VALUABLE. MODULE TESTING BEFORE INTEGRATION SEEMED VALUABLE, AND IT SHOULD BE DONE BY OTHER THAN THE ORIGINAL PROGRAMMER. THE HYPOTHESIS THAT SINGLE INPUT/OUTPUT SUBROUTINE CALLS SHOULD BE THE ONLY COMMUNICATION BETWEEN MODULES WAS REJECTED. DATA STRUCTURES, HOWEVER, WERE KEPT WITHIN SINGLE MODULES. (GDC)

305 SOFTWARE DEVELOPMENT
PARNAS, D.L. A TECHNIQUE FOR SOFTWARE MODULE SPECIFICATION WITH EXAMPLES.
COMMUNICATIONS OF THE ACM, 1972, 15, 330-336.
DESCRIPTION:

THIS PAPER PRESENTS AN APPROACH TO WRITING SPECIFICATIONS FOR PARTS OF SOFTWARE SYSTEMS. THE MAIN GOAL IS TO PROVIDE SPECIFICATIONS SUFFICIENTLY PRECISE AND COMPLETE THAT OTHER PIECES OF SOFTWARE CAN BE WRITTEN TO INTERACT WITH THE PIECE SPECIFIED WITHOUT ADDITIONAL INFORMATION. THE SECONDARY GOAL IS TO INCLUDE IN THE SPECIFICATION NO MORE INFORMATION THAN NECESSARY TO MEET THE FIRST GOAL. THE TECHNIQUE IS ILLUSTRATED BY MEANS OF A VARIETY OF EXAMPLES FROM A TUTORIAL SYSTEM. (A) 7P, 6R.

 SYSTEMS. HUMAN FACTORS, 1970, 12, 165-175.
 DESCRIPTION:

WORK IN HUMAN FACTURS ENCOMPASSES RESEARCH AND APPLICATION IN HUMAN ENGINEERING, PROCEDURE DEVELOPMENT, TRAINING TECHNIQUES, PERSONNEL REQUIREMENTS, TEST AND EVALUATION, TASK DESCRIPTION, AND TASK ALLOCATION. OPPORTUNITIES AND NEEDS EXIST IN COMPUTER-BASED DATA PROCESSING SYSTEMS FOR ALL THESE ENDEAVORS, ESPECIALLY WITH REGARD TO ON-LINE USERS. WITHIN HUMAN ENGINEERING, ONLY MANUAL ENTRY HAS SO FAR RECEIVED MUCH RESEARCH ATTENTION. WORK IS ALSO NEEDED ON DISPLAYS, INTEGRATED ENTRY-DISPLAY, WORKSPACE AND OTHER EQUIPMENT ASPECTS, ON-LINE LANGUAGES, AND PROGRAM PRODUCTION. OF GREATEST CONCERN TO HUMAN ENGINEERING IS THE COMPUTER OUTPUT, DESIGNED BY PROGRAMMERS, PATHER THAN THE HAPDWARE. HUMAN FACTORS PEOPLE WILL HAVE TO MASTER A NEW FIELD AND PROYIDE GUIDANCE TO A NEW DISCIPLINE WHICH HAS NOT YET UNDERSTOOD HUMAN FACTORS REQUIREMENTS. (A) 11P, 7R.

DESIGN REVIEWS

PERRIENS, M.P. AN APPLICATION OF FORFAL INSPECTIONS TO TOP-DOWN STRUCTURED PROGRAM DEVELOPMENT (TECHNICAL REPORT K. C-TR-77-212). GAITHERSBURG, MARYLAND: IBM FEDERAL SYSTEMS DIVISION, JUNE 1977. (NTIS NO. AD AC41645) DESCRIPTION:

Company of the second of the s

THIS REPORT CONTAINS THE FULL STUDY FINDINGS FOR SOW TASK 4.3. THE RESULTS OF THE STUDY WERE THAT FOP-DOWN STRUCTURED PROGRAMMING AND FORMAL INSPECTIONS ARE COMPATIBLE AND CAN BE USED IN COMBINATION DURING SOFTWARE DEVELOPMENT. PRIOR TO RECOMMENDING FULL-SCALE USE, RADC SHOULD IMPLEMENT THE RECOMMENDED INSPECTION METHODOLOGY ON A VARIETY OF SELECTED SOFTWARE PROJECTS USING TOP-JOHN STRUCTURED PROGRAMMING. (A)

- 310 COMPUTER PROGRAMMER SELECTION
 PERRY, D.K., & CANNON, W.M. A VOCATIONAL INTEREST SCALE FOR COMPUTER
 PROGRAMMERS: FINAL REPORT. IN PROCEEDINGS OF THE 4TH ANNUAL COMPUTER PERSONNEL
 FESEARCH CONFERENCE, ASSOCIATION FOR COMFUTING MACHINERY, 1966, 61-82.
- 311 VOCATIONAL INTERESTS OF PROGRAMMERS
 PERRY, D.K., & CANNON, W.M. VOCATIONAL INTERESTS OF COMPUTER PROGRAMMERS.
 JOURNAL OF APPLIED PSYCHOLOGY, 1957, 51, 28-34.
 DESCRIPTION:

THE REVISED SVIB WAS ADMINISTERED TO 1,378 COMPUTER PROGRAMMERS. PRIMARY ANALYSES WERE LIMITED TO 1,003 MALES WITH AT LEAST 2 YR. OF PROGRAMMING EXPERIENCE, WHOSE JOBS WERE PRIMARILY NONSUPERVISORY, AND WHO INDICATED 'SATISFACTION WITH PROGRAMMING. PROGRAMMERS DIFFER FROM OTHER PROFESSIONAL MEN PRIMARILY IN THEIR GREATER INTEPEST IN PROBLEM SOLVING, MATHEMATICS, AND MECHANICAL PURSUITS, AND THEIR LESSER INTEREST IN PEOPLE. THEIR INTERESTS ARE MOST SIMILAR TO OPTOMETRISTS, CHEMISTS, ENGINEERS, PRODUCTION MANAGERS, MATHEMATICS-SCIENCE TEACHERS, AND SENIOR CPAS; BUT NONE OF THESE EXISTING KEYS ADEQUATELY REPRESENTS THE INTERESTS OF PROGRAMMERS. A PPOGRAMMER KEY DEVELOPED ON HALF THE SAMPLE AND EVALUATED ON THE REMAINING HALF PROGRAMMERS WELL BETWEEN PROGRAMMERS AND MEN IN GENERAL. SATISFIED PROGRAMMERS SCORE SIGNIFICANTLY HIGHER ON THE KEY THAN DISSATISFIED PROGRAMMERS. (A) 7P, 1CR.

312 SOFTWARE DESIGN
PETERS, L.J., & TRIPP, L.L. IS SOFTWARE DESIGN WICKED? DATAMATION, MAY 1976, 22(5), PP. 127; 131; 136.
DESCRIPTION:

A COMPARISON OF THE ATTRIBUTES AND PROBLEMS ASSOCIATED WITH SCFTWARE DESIGN AND THE CHARACTEPISTICS OF "WICKED" PROBLEMS CLEARLY ILLUSTRATES THAT SOFTWARE DESIGN IS A WICKED PROBLEM. TOP-DOWN DESIGN, AN APPROACH THAT HAS RECEIVED CONSIDERABLE ATTENTION AND WIDESPREAD ACCEPTANCE, DOES NOT APPEAR TO BE BASED ON ASSUMPTIONS THAT ARE COMPATIBLE WITH SUCH PROBLEMS. ALTHOUGH TOP-DOWN DESIGN OFFIRS DISTINCT ADVANTAGES OVER OTHER DESIGN METHODS, MORE ATTENTION MUST BE DIRECTED TOWARD DEVELOPING METHODS DIRECTED TOWARD WICKED PROBLEMS. (MFA) 3P, 3R.

313 SOFTWARE DESIGN METHODOLOGIES

PETERS, I.J., & TRIPP, L.L. COMPARING SOFTWARE DESIGN METHODOLOGIES.

DATAMATION, NOVEMBER 1977, 23(11), 89-94.

DESCRIPTION:

SOFTWARE DESIGN HAS EVOLVED TO THE STAGE WHERE SEVERAL METHODOLOGIES HAVE BEEN PROPOSED. THIS PAPER BRIEFLY REVIEWS STRUCTURED DESIGN, THE JACKSON METHODOLOGY, LOGICAL CONSTRUCTION OF PROGRAMS, META STEPWISE REFINEMENT, AND HIGHER ORDER SOFTWARE. IT IS CONCLUDED THAT NO SINGLE METHOD EXISTS THAT WOULD BE USEFUL IN EVERY DESIGN PROBLEM, THAT EACH METHOD MAKES UNPROVABLE ASSUMPTIONS, THAT METHODS ASSIST ONLY IN SOLVING ROUTINE ASPECTS OF A DESIGN PROBLEM, AND THAT DESIGNERS MAY BE RELUCTANT TO USE THESE METHODS. (MEA) 6P, 13R.

314 NATURAL LANGUAGE PROGRAMMING
PETRICK, S.R. ON MATURAL LANGUAGE BASED COMPUTER SYSTEMS. IBM JOURNAL OF
RESEARCH AND DEVELOPMENT, 1976, 20, 314-325.
DESCRIPTION:

SOME OF THE ARGUMENTS THAT HAVE BEEN GIVEN BOTH FOR AND AGAINST THE USE OF NATURAL LANGUAGES IN QUESTION-ANSWERING AND PROGRAMMING SYSTEMS ARE DISCUSSED. SEVERAL NATURAL LANGUAGE BASED COMPUTER SYSTEMS ARE CONSIDERED IN ASSESSING THE CURRENT LEVEL OF SYSTEM DEVELOPMENT. FINALLY, CERTAIN PERVASIVE DIFFICULTIES THAT HAVE ARISEN IN DEVELOPING NATURAL LANGUAGE BASED SYSTEMS ARE IDENTIFIED, AND THE APPROACH TAKEN TO OVERCOME THEM IN THE REQUEST (RESTRICTED ENGLISH QUESTION-ANSWERING) SYSTEM IS DESCRIBED. (A)

PERFORMANCE MODELS OF MAN-MACHINE SYSTEMS
PEW, R.W., BARON, S., FEEHRER, C.E., & MILLER, D.C. CRITICAL REVIEW AND
ANALYSIS OF PERFORMANCE MODELS APPLICABLE TO MAN-MACHINE SYSTEMS EVALUATION
(REPORT NO. 3446).. CAMBRIDGE, MASSACHUSETTS: BOLT BERANEK AND NEWMAN, INC.,
MARCH 1977. (NTIS NO. AD A038597)
DESCRIPTION:

THIS REPORT FOCUSES ON THE REVIEW OF POTENTIALLY RELEVANT MODELS AND ON THE IDENTIFICATION OF ISSUES IN MODEL DEVELOPMENT AND APPLICATION THAT MAY HAVE IMPORTANT IMPACT ON MODELS FOR LARGE SCALE MAN-MACHINE SYSTEMS. A DETAILED AND CRITICAL EVALUATION OF SEVERAL CLASSES OF HUMAN PERFORMANCE MODELS IS PRESENTED. INTERRELATIONSHIPS AMONG EXISTING MODELS ARE EXAMINED AND AN EVALUATION IS MADE OF THE NEEDS AND GAPS IN THE TECHNOLOGY. MODELING ISSUES ARE IDENTIFIED AND RESEARCH RECOMMENDATIONS SUGGESTED. APPROXIMATELY FORTY MODELS OR MODEL TECHNIQUES THAT HAVE SOME APPLICABILITY TO THE SIMULATION MODELING PROGRAM ARE DESCRIBED IN THE APPENDIX. (A) 305P, 191R.

316 NATURAL LANGUAGE PROGRAMMING
PLATH, W.J. REQUEST: A NATURAL LANGUAGE QUESTION-ANSWERING SYSTEM. IBM
JOURNAL OF RESEARCH AND DEVELOPMENT, 1976, 2C, 326-335.
DESCRIPTION:

REQUEST IS AN EXPERIMENTAL RESTRICTED ENGLISH QUESTION-ANSWERING SYSTEM THAT CAN ANALYZE AND ANSWER A VARIETY OF ENGLISH QUESTIONS, SPANNING A SIGNIFICANT RANGE OF SYNTACTICAL COMPLEXITY, WITH RESPECT TO A SMALL FORTUNE 500 TYPE DATA BASE. THE LONG-RANGE OBJECTIVE OF THIS WORK IS TO EXPLORE THE POSSIBILITY OF PROVIDING NONPROGRAMMERS WITH A CONVENIENT AND POWERFUL MEANS OF ACCESSING INFORMATION IN FORMATTED DATA BASES WITHOUT HAVING TO LEARN A FORMAL QUERY LANGUAGE. TO ADDPESS THE SOMEWHAT CONFLICTING REQUIREMENTS OF UNDERSTANDABILITY FOR THE MACHINE AND MAXIMUM NATURALNESS FOR THE USER, REQUEST USES A LANGUAGE PROCESSING APPROACH FEATURING: 1) THE USE OF RESTRICTED ENGLISH; 2) A TWO-PHASE, COMPILER-LIKE ORGANIZATION; AND 3) LINGUISTIC ANALYSIS BASED ON A TRANSFORMATIONAL GRAMMAR. THE PRESENT PAPER EXPLORES THE MOTIVATION FOR THIS APPROACH IN SOME DETAIL AND ALSO DESCRIBES THE ORGANIZATION, OPERATION, AND CURRENT STATUS OF THE SYSTEM. (A)

RAMAMOORTHY, C.V., MEEKER, R.E., JR., & TURNER, J. DESIGN AND CONSTRUCTION OF AN AUTOMATED SOFTWARE EVALUATION SYSTEM. IEEE SYMPOSIUM ON COMPUTER SOFTWARE RELIABILITY, 1973, 28-37.
DESCRIPTION:

THE REPORT THE PROPERTY OF THE

THE PROBLEM OF EVALUATING AND VALIDATING LARGE PROGRAMS AND PROGRAMMING SYSTEMS IS ONE THAT LENDS ITSELF TO SOME FORM OF AUTOMATIC ANALYSIS. THE CONCEPT OF AN AUTOMATED EVALUATION SYSTEM IS DEVELOPED AND ILLUSTRATED WITH THE DETAILED DESCRIPTION OF A CURRENT WORKING SYSTEM. THIS SYSTEM IS DESIGNED FOR AUTOMATIC ANALYSIS OF LARGE PROGRAMS AND INCLUDES BOTH STATIC AND DYNAMIC ANALYSIS. THE STATIC ANALYSIS CONSISTS OF A COMPLETE SCAN OF THE SOURCE CODE STATEMENTS OF A PROGRAM WITH AUTOMATIC RECOGNITION OF PREVIOUSLY DEFINED DANGEROUS CONDITIONS AND THE CONSTRUCTION OF A DATA BASE OF PROGRAM CHARACTERISTICS. A GRAPH MODEL OF PROGRAM STRUCTURE IS CONSTRUCTED AND ANALYZED FOR WELL-FORMATION AND THE EXISTENCE OF LOOPS. DYNAMIC ANALYSIS CONSISTS OF THE AUTOMATIC INSERTION OF MONITORS FOR PRESCRIBED VARIABLES. A MONITORING SUBROUTINE CHECKS NEW VARIABLE VALUES WITH PRESCRIBED VALUES AND ALLOWS OTHER STATISTICS GATHERING FUNCTIONS AT RUN TIME. THE UTILITY OF THIS TYPE OF SYSTEM IN AN OVERALL EVALUATION EFFORT IS CONSIDERED ALONG WITH POSSIBILITIES FOR EXTENSIONS. (A) 10P, 3R.

323 PROGRAMMING LANGUAGES

RAMSEY, H.R. PLANS: HUMAN FACTORS IN THE DESIGN OF A COMPUTER PROGRAMMING LANGUAGE. IN PROCEEDINGS OF THE HUMAN FACTORS SOCIETY 18TH ANNUAL MEETING. SANTA MONICA, CALIFORNIA: HUMAN FACTORS SOCIETY, 1974, 39-41. DESCRIPTION:

CONVENTIONAL COMPUTER PROGRAMMING LANGUAGES HAVE PROVEN (NADEQUATE FOR USE IN THE SOLUTION OF COMPLEX RESOURCE ALLOCATION AND SCHEDULING PROBLEMS. A NEW PROGRAMMING LANGUAGE, PLANS, IS DESCRIBED. THE EMPHASIS IN THE DESIGN OF PLANS IS NOT ON SPECIALIZED SCHEDULING COMMANDS, BUT ON PROVISION OF APPROPRIATE BASIC DATA STRUCTURES FOR SCHEDULING PROBLEMS. A METHOD OF LANGUAGE SPECIFICATION IS DESCRIBED WHICH PROVIDES RIGOROUS FUNCTIONAL DEFINITION WHILE ALLOWING AN EXTREMELY CLEAN INTERFACE BETWEEN THE LANGUAGE FUNCTIONAL DESIGN PROCESS (IN WHICH HUMAN FACTORS PERSONNEL MIGHT PARTICIPATE MOST ACTIVELY) AND THE IMPLEMENTATION PROCESS. (A) 3P. 4R.

324 COMPARISON OF FLOWCHARTS AND PROGRAM DESIGN LANGUAGES
RAMSEY, H.R., ATWOOD, M.E., & VAN DOREN, J.R. A COMPARATIVE STUDY OF
FLOWCHARTS AND PROGRAM DESIGN LANGUAGES FOR THE DETAILED PROCEDURAL
SPECIFICATION OF COMPUTER PROGRAMS (TECHNICAL REPORT TR-78-A22). ARLINGTON,
VIRGINIA: U.S. ARMY RESEARCH INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES,
1978.
DESCRIPTION:

AN EXPERIMENT WAS PERFORMED TO ASSESS THE RELATIVE MERITS OF PROGRAM DESIGN LANGUAGES (PDL'S) AND FLOWCHAR'S AS TECHNIQUES FOR THE DEVELOPMENT AND DOCUMENTATION OF DETAILED DESIGNS FOR COMPUTER PROGRAMS.

TWENTY STUDENTS IN A COMPUTER SCIENCE GRADUATE COURSE PARTICIPATED IN THIS EXPERIMENT. WORKING INDIVIDUALLY, THE STUDENTS DESIGNED A TWO-PASS ASSEMBLER FOR A SIMPLE MINICOMPUTER. HALF OF THE STUDENTS EXPRESSED THEIR DESIGN FOR THE FIRST PASS OF THE ASSEMBLER IN THE FORM OF A FLOWCHART, AND EXPRESSED THEIR DESIGN FOR THE SECOND PASS IN A PROGRAM DESIGN LANGUAGE. THE OTHER HALF OF THE STUDENTS USED A PDL FOR PASS ONE, AND A FLOWCHART FOR PASS TWO. FLOWCHARTS AND PDL'S WERE COMPARED ON THE MASIS OF VARIOUS MEASURES OF OVERALL DESIGN QUALITY, DESIGN ERRORS, LEVEL OF DETAIL OF DESIGNS, TIME EXPENDED IN DEVELOPING DESIGNS, AND SUBJECTIVE PREFERENCES.

HAVING COMPLETED THIS DESIGN TASK, THE SUBJECTS THEN PERFORMED AN IMPLEMENTATION TASK. THEY WERE GIVEN FAIRLY DETAILED PROCEDURAL DESIGNS FOR A PROGRAM WHICH SIMULATES THE FUNCTION OF A FAIRLY SOPHISTICATED MINICOMPUTER. THEY WERE THEN REQUIRED TO DEVELOP A WORKING VERSION OF THE PROGRAM IN PL/1. ALTHOUGH THE DESIGNS WERE LOGICALLY EQUIVALENT, HALF THE STUDENTS RECEIVED THEIR SIMULATOR DESIGN IN FLOWCHART FORM, AND HALF IN POLFORM. FLOWCHARTS AND POLFS WERE COMPARED ON THE BASIS OF DESIGN COMPREHENSION TEST PERFORMANCE, VARIOUS MEASURES OF OVERALL IMPLEMENTATION QUALITY, IMPLEMENTATION ERRORS, AND SUBJECTIVE PREFERENCES.

IN THE CONTEXT IN WHICH THIS STUDY WAS PERFORMED, THE USE OF A PROGRAM

IN THE CONTEXT IN WHICH THIS STUDY WAS PERFORMED, THE USE OF A PROGRAM DESIGN LANGUAGE (PDL) BY A SOFTWARE DESIGNER, FOR THE DEVELOPMENT AND DESCRIPTION OF A DETAILED PROGRAM DESIGN, PRODUCED BETTER RESULTS THAN DID THE USE OF FLOWCHARTS. SPECIFICALLY, THE DESIGNS APPEARED TO BE OF SIGNIFICANTLY BETTER QUALITY, INVOLVING MORE ALGORITHMIC OR PROCEDURAL DETAIL, THAN THOSE PRODUCED USING FLOWCHARTS. IN ADDITION, FLOWCHART DESIGNS EXHIBITED CONSIDERABLY MORE ABBREVIATION AND OTHER SPACE-SAVING PRACTICES THAN DID PDL DESIGNS, WITH A POSSIBLE ADVERSE EFFECT OF THE READABILITY.

WHEN EQUIVALENT, HIGHLY READABLE DESIGNS WERE PRESENTED TO SUBJECTS IN BOTH PDL AND FLOWCHART FORM, NO PATTERN OF SHORT-TERM OR LONG-TERM DIFFERENCES IN COMPREHENSION OF THE DESIGN WAS OBSERVED. NO SIGNIFICANT DIFFERENCES WERE DETECTED IN THE QUALITY OR OTHER PROPERTIES OF PROGRAMS WRITTEN AS IMPLEMENTATIONS OF THE DESIGNS. SUBJECTIVE RATINGS INDICATED A MILD PREFERENCE FOR PDL'S.

OVERALL, THE RESULTS SUGGEST THAT SOFTWARE DESIGN PERFORMANCE AND DESIGNER-PROGRAMMER COMMUNICATION MIGHT BE SIGNIFICANTLY IMPROVED BY THE ADOPTION OF INFORMAL PROGRAM DESIGN LANGUAGES, RATHER THAN FLOWCHARTS, AS A STANDARD DOCUMENTATION METHOD FOR DETAILED COMPUTER PROGRAM DESIGNS. (A)

325 INTERACTIVE PROGRAMMING

REASER, J., PRIESMAN, I., & GILL, J. A PRODUCTION ENVIRONMENT EVALUATION OF INTERACTIVE PROGRAMMING (TECHNICAL REPORT NO. USACSC-AT-74-C3). FORT BELVOIR, VIRGINIA: U.S. ARMY COMPUTER SYSTEMS COMMAND, DECEMBER 1974. DESCRIPTION:

THIS REPORT DESCRIBES AN EVALUATION OF INTERACTIVE PROGRAMMING VERSUS BATCH PROGRAMMING WITHIN AN ACTUAL SOFTWARE PRODUCTION ENVIRONMENT AT THE U.S. ARMY COMPUTER SYSTEMS COMMAND. THE PURPOSE OF THE STUDY WAS TO DETERMINE THE PRODUCTIVITY AND COST EFFECTIVENESS DIFFERENCES BETWEEN THE TWO MODES OF OPERATION. THE STUDY WAS CONDUCTED IN A PRODUCTION ENVIRONMENT WITH THE PROGRAMMERS COMPLETING THEIR NORMALLY REQUIRED WORKLOAD AND PROVIDING DOCUMENTATION ON TASKS ROUTINELY ASSIGNED TO THEM. THE RESULTS OF THIS STUDY INDICATE THAT ON A LINE-OF-CODE BASIS THE INTERACTIVE SYSTEM OFFERS AN INCREASE IN PRODUCTIVITY AND A DECREASE IN OVERALL COST, AS COMPARED TO THE BATCH PROCESSING PROCEDURE. CONTINUED SUPPORT OF THE INTERACTIVE SYSTEM IS RECOMMENDED. (A)

REINSTEDT, R.N., HAMMIDI, B.C., PERES, S.H., & RICARD, E.L. COMPUTER PERSONNEL RESEARCH GROUP PROGRAMMER PERFORMANCE PREDICTION STUDY (REPORT NO. RM-4033-PR). SANTA MONICA, CALIFCRNIA: THE RAND CORP., MARCH 1964 (ALSO REPORTED MURE BRIEFLY IN REINSTEDT, R.N. RESULTS OF A PROGRAMMER PERFORMANCE PREDICTION STUDY. IEEE TRANSACTIONS ON ENGINEERING MANAGEMENT, DECEMBER 1967, EM-14, 183-187). DESCRIPTION:

THIS MEMORANDUM REPORTS THE RESULTS OF A RESEARCH STUDY UNDERTAKEN TO GAIN SOME INSIGHT INTO THE RELATIONSHIP BETWEEN, UN THE ONE HAND, RATED JOB PERFORMANCE AND, ON THE OTHER, COGNITIVE ABILITIES, VOCATIONAL INTERESTS, AND BIOGRAPHICAL INFORMATION OF COMPUTER PROGRAMMERS.

A TEST BATTERY COMPOSED OF THE IBM PROGRAMMER APTITUDE TEST, THE TEST OF SEQUENTIAL INSTRUCTIONS (A RESEARCH INSTRUMENT SPECIALLY CONSTRUCTED FOR THIS STUDY), THE STRONG VOCATIONAL INTEREST BLAMF, AND A PERSONAL BACKGROUND DATA FORM WAS ADMINISTERED TO 534 PROGRAMMERS REPRESENTING 24 PARTICIPATING COMPANIES. THE SAMPLE WAS DIVIDED INTO TWO SUB-SAMPLES: 301 PROGRAMMERS WERE CLASSIFIED AS SCIENTIFIC PROGRAMMERS AND 233 WERE CLASSIFIED AS BUSINESS PROGRAMMERS.

THE ANALYSES OF THE DATA INDICATE THAT THE IBM PROGRAMMER APTITUDE TEST AND THE TEST OF SEQUENTIAL INSTRUCTIONS GENERALLY CORRELATE HIGHER TO THE PERFORMANCE RATING CRITERION AMONG THE COMPANIES IN THE SCIENTIFIC SAMPLE THAN IN THE BUSINESS SAMPLE. WHEN THE DATA ARE ANALYZED AGAINST INDIVIDUAL COMPANY PERFORMANCE RATINGS, THERE IS A WIDE RANGE OF CORRELATION (-.67 TO .90).

THE ANALYSES OF THE STRONG VOCATIONAL INTEREST BLANK INDICATE THAT THIS INSTRUMENT HAS PREDICTIVE VALUE IN TERMS OF JOB PERFORMANCE IN BOTH SUB-SAMPLES; FURTHER, THE EMERGING INTEREST PATTERNS TEND TO BE THOSE OF THE SCIENTIFIC, PROFESSIONALLY-ORIENTED, ESTHETIC PERSON. BOTH SAMPLES SHOWED AN EXTREMELY HIGH INTEREST IN MATHEMATICAL SUBJECTS. HIGHEST CORRELATIONS RESULTED FROM THE BUSINESS PROGRAMMERS WHO HAD HIGHLY SCIENTIFIC INTEREST PATTERNS.

SCIENTIFIC PROGRAMMERS HAD A GENERALLY HIGHER EDUCATIONAL LEVEL THAN THE BUSINESS PROGRAMMERS (MORE COLLEGE GRADUATES AND MORE ADVANCED DEGREES).

PROGRAMMERS FROM BOTH THE SCIENTIFIC AND THE BUSINESS SAMPLES WERE, ON THE AVERAGE, A COMPARATIVELY YOUNG GROUP, WITH (AS COMPARED WITH OTHER PROFESSIONS) FEW YEARS OF EXPERIENCE.

FOLLOW-UP STUDIES ARE INDICATED, ESPECIALLY IN THE AREAS OF INTEREST AND PERSONALITY TESTING. 64P, 4R.

 (NTIS NO. AD 636988)
 DESCRIPTION:

THIS IS A REPORT ON THE CRITERION DEVELOPMENT PHASE OF A LONG-TERM RESEARCH PROGRAM CONCERNED WITH COMPUTER PERSONNEL SELECTION AND EVALUATION.

TWO TYPES OF CRITERION MEASURES ARE INVOLVED IN THIS PHASE. BOTH ARE PROFICIENCY TESTS, ONE DESIGNED TO TEST AN INDIVIDUAL'S KNOWLEDGE OF THE BASIC PRINCIPLES AND TECHNIQUES OF PROGRAMMING, AND THE SECOND, TO TEST AN INDIVIDUAL'S PERFORMANCE IN DEPTH IN THE SYSTEMS ANALYSIS AND SYSTEMS DESIGN AREAS. THE DEVELOPMENT OF THE FIRST TYPE, THE BASIC PROGRAMMING KNOWLEDGE TEST (BPKT), IS DESCRIBED IN THIS REPORT. THE SECOND TYPE OF MEASURE IS NOW UNDER CONSTRUCTION AND WILL BE DESCRIBED IN A SUBSEQUENT REPORT.

THE BPKT IS INTENDED TO STAND BY ITSELF AS A CRITERION OF PROGRAMMING PROFICIENCY. TO ACHIEVE A CLOSE CORRESPONDENCE OF TEST CONTENT TO PROGRAMMING JOB REQUIREMENTS, SUBJECT-MATTER EXPERTS PARTICIPATED IN THE CONSTRUCTION AND REVIEW OF THE TEST QUESTIONS. TEST QUESTIONS WERE SELECTED THAT MET THE CRITERIA OF DISCRIMINATION AND PROPRIATE DIFFICULTY, AS INDICATED BY THE STATISTICAL ANALYSIS OF RESULTS OF A LARGE PRELIMINARY TESTING. THE FINAL FORM OF THE TEST CONSISTS OF 100 MULTIPLE-CHOICE QUESTIONS THAT ARE DESIGNED TO BE FREE OF REFERENCES TO SPECIFIC COMPUTERS AND LANGUAGES NOW IN USE.

NORMATIVE SCORES HAVE BEEN DEVELOPED FOR NAVY COMPUTER GROUPS. THE RELATIONSHIPS OF THE BPKT TEST SCORES TO A NUMBER OF VOCATIONAL AND EDUCATIONAL VARIABLES ARE DESCRIBED. RECOMMENDATIONS ARE MADE FOR THE USE OF THE BPKT IN PERSONNEL SELECTION AND EVALUATION OF EXPERIENCES PROGRAMMERS AND ANALYSTS, AND AS A CRITERIOM MEASURE AGAINST WHICH APTITUDE TESTS MAY BE VALIDATED. ROYCE, W.W. SOFTWARE REQUIREMENTS ANALYSIS: SIZING AND COSTING. IN E. HOROWITZ (ED.), PRACTICAL STRATEGIES FOR DEVELOPING LARGE SOFTWARE SYSTEMS. READING, MASSACHUSETTS: ADDISON-WESLEY, 1975, 57-71.

THE SUCCESS OR FAILURE OF A LARGE SOFTWARE PROJECT IS OFTEN DUE TO THE CONSISTENCY AND COMPLETENESS IN SPECIFYING SOFTWARE REQUIREMENTS AND THE ACCURACY WITH WHICH THESE REQUIREMENTS CAN BE TRANSLATED INTO COST AND SCHEDULE ESTIMATES AND HARDWARE REQUIREMENTS. THIS PAPER DISCUSSES FOUR TECHNIQUES FOR IMPROVING REQUIREMENTS ANALYSIS.

- 1. THERE SHOULD BE AUTOMATED TOOLS FOR ANALYZING THE COMPLETENESS, CONSISTENCY, ALLOCATION, AND TRACEABILITY OF THE REQUIREMENTS.
- IMPROVED METHODS FOR DESIGNLESS COSTING TO QUANTIFY REQUIREMENTS SELECTION ARE REQUIRED.
- . PREVIOUSLY DEVELOPED SIMULATIONS, THAT CAN BE USED ON THE CURRENT PROBLEM WITHOUT ADDITIONAL CODING, SHOULD BE DEVELOPED.
- EFFECTIVE SIMULATION-ORIENTED LANGUAGES TO AID IN SIMULATION BUILDING SHOULD BE IMPROVED TO BROADEN THEIR APPLICATIONS. (MEA)

RUBEY, R.J., ET AL. CUMPARATIVE EVALUATION OF PL/1 (USAF REPORT NO. ESD-TR-68-150). SAN PEDRO, CALIFORNIA: LOGICON, INC., 1968. (NTIS NO. AD 669096) DESCRIPTION:

Construction of the management of the best of the construction of

SEVEN BENCHMARK PROBLEMS WERE EACH IMPLEMENTED TWICE BY THE SAME PROGRAMMER, ONCE IN PL/1 AND ONCE IN ANOTHER HIGHER LEVEL LANGUAGE (COBOL, FORTRAN, OR JOVIAL) APPROPRIATE TO THE APPLICATION AREA REPRESENTED BY THE PROBLEM. OVERALL, IT WAS FOUND THAT PL/1 HAD ADVANTAGES OVER BOTH FORTRAN AND JOVIAL AND WAS ACOUT EQUAL TO COBOL FOR THE RESPECTIVE APPLICATION AREAS. THE QUANTITATIVE DATA OBTAINED FROM THE IMPLE PENTATIONS GENERALLY INDICATED THAT THE PL/1 VERSIONS HAD FEWER STATEMEN S IN THE SOURCE PROGRAMS AND WERE CODED MORE RAPIDLY THAN THEIR COMPARISON-LANGUAGE COUNTERPARTS, BUT TOOK LONGER TO DEBUG AND HAD A HIGHER FREQUENCY OF ERRORS. THE QUALITATIVE, SUBJECTIVE OPINIONS OF THE PROBLEM PROGRAMMERS AND PROJECT ANALYSTS INDICATED THAT PL/1 WAS GENERALLY SUPERIOR TO THE COMPARISON LANGUAGES WITH REGARD TO SUITABILITY FOR A WIDE RANGE OF PROBLEMS, NATURALNESS, GENERALITY, AND EASE OF USE. INEFFICIENCIES OBSERVED IN THE LANGUAGE COMPILERS AND ASSOCIATED OPERATING SYSTEMS UTILIZED FOR THE BENCHMARK PROBLEMS INDICATED THAT IMPROVEMENTS ARE REQUIRED IN THESE AREAS IF THE BENEFITS OBTAINABLE FROM THE USE OF HIGHER LEVEL LANGUAGES ARE TO BE FULLY REALIZED. The second secon

THE CONTINUING CONTROVERSY OVER THE RELATIVE MERITS OF TIME-SHARING VERSUS BATCH PROCESSING HAS TAKEN A NEW AND SIGNIFICANT TURN FROM PREDISCIPLINARY SPECULATION TO APPLIED SCIENTIFIC EXPERIMENTATION. WITHIN THE LAST TWO YEARS, FIVE EXPERIMENTAL STUDIES HAVE APPEARED IN THE LITERATURE, EACH COMPARING SOME FORM OF ONLINE AND OFFLINE DATA PROCESSING WITH RESPECT TO MAN-MACHINE MEASURES OF SYSTEM PERFORMANCE. THESE FIVE PIONEERING STUDIES COMPRISE THE FIRST SUBSTANTIVE DATA BASE FOR COMPARING AND EVALUATING EXPERIMENTAL METHODOLOGY AND FINDINGS BEARING ON THE GROWING AND CHANGING COMPETITION BETWEEN TIME-SHARING AND BATCH PROCESSING SYSTEMS. THIS PAPER PROVIDES A CRITICAL REVIEW OF THESE FIVE EXPERIMENTS, SUMMARIZES FINDINGS, PROBLEMS AND PITFALLS, AND OFFERS RECOMMENDATIONS FOR FUTURE EXPERIMENTAL WORK. (A)

FIVE EXPERIMENTAL COMPARISONS OF TIME-SHARING AND BATCH SYSTEMS ARE REVIEWED. THE COMPOSITE RESULTS INDICATE THAT TIME-SHARING REQUIRES FEWER MAN-HOURS, POSSIBLY PRODUCES HIGHER QUALITY RESULTS, AND IS PREFERRED BY USERS. BATCH PROCESSING MAY REQUIRE LESS COMPUTER TIME AND INVOLVE LOWER COSTS. THE METHODOLOGICAL ISSUES OF SUCH COMPARISONS ARE DISCUSSED AND SUGGESTIONS ARE MADE FOR ADDITIONAL EXPERIMENTS. (MEA) 10P. 12R.

DESCRIPTION:

EXPERIMENTAL METHODS AND FINDINGS IN HUMAN PROBLEM-SOLVING USING ON-LINE AND OFF-LINE COMPUTER SYSTEMS ARE REVIEWED. THE ADVENT OF TIME-SHARING SYSTEMS IN THE LAST DECADE PRODUCED AN INITIAL BODY OF EMPIRICAL DATA FROM USER STATISTICS AND EXPERIMENTAL STUDIES COMPARING TIME-SHARING WITH BATCH-PROCESSING. THIS BODY OF DATA IS REVIEWED FOR ITS IMPLICATIONS TO THE CONTROVERSY OVER BATCH AND TIME-SHARING SYSTEMS AND TO THE UNDERSTANDING OF HUMAN BEHAVIOR IN THE MAN-COMPUTER SETTING. A PLEA IS MADE FOR INTERDISCIPLINARY CROSS-FERTILIZATION BETWEEN BEHAVIORAL AND COMPUTER SCIENCES TO BRICGE THE HUMANISTIC LAG IN MAN-COMPUTER COMMUNICATION. (A) 15P, 20R.

355 COMPARISON OF TIME-SHARING WITH BATCH PROCESSING SACKMAN, H. MAN-COMPUTER PROBLEM SOLVING. PRINCETON, NEW JERSEY: AUERBACH, 1970.

DESCRIPTION:

THIS BOOK IS CONCERNED WITH THE GROWING EXPERIMENTAL EVIDENCE ON MAN—
COMPUTER PROBLEM SOLVING, PARTICULARLY IN THE COMPETITION BETWEEN TIME—
SHARING AND BATCH-PROCESSING COMPUTER SYSTEMS. THE BOOK IS DIVIDED INTO
FOUR PARTS. PART I ESSENTIALLY CONSISTS OF AN INTRODUCTION TO TIME—SHARING
AND BATCH-PROCESSING, THE HISTORICAL BACKGROUND OF THE SCIENTIFIC STUDY
OF THE HUMAN USE OF COMPUTERS, AND SUMMARY ACCOUNTS OF EXPLORATORY ONLINE/
OFFLINE STUDIES THAT PRECEDED THE COMPREHENSIVE STUDIES DESCRIBED IN PARTS
II AND III. THE EPILOGUE, PART IV, WAS DESIGNED TO PULL TOGETHER AND
SUMMAPTED THE VARIOUS STRANDS OF RESEARCH ON MAN-COMPUTER PROBLEM SOLVING
UNDER ONLING AND OFFLINE CONDITIONS AS REPORTED IN THIS BOOK. SPECIAL
EMPHASIS IS PLACED ON THE INTERFACE BETWEEN THESE ONLINE/OFFLINE STUDIES AND
THE MAINSTREAM OF THE BEHAVIORAL LITERATURE ON HUMAN PROBLEM SOLVING. THE
BOOK CONCLUDES WITH A PREVIEW OF MASS COMPUTER UTILITIES, AND A PLEA FOR
COOPERATIVE INTERDISCIPLINARY RESEARCH ON EXPERIMENTAL COMMUNITY PROTOTYPES
TO MEET THE CHALLENGE OF THE PUBLIC INTEREST IN THE COMPUTER—SERVICED
SOCIETY OF THE FUTURE. (A, ABBR.)
288P, 69R.

356 COMPARTSON OF TIME-SHARING AND BATCH PROCESSING
SACKMAN, H., ERIKSON, W.J., & GRANT, E.E. EXPLORATORY EXPERIMENTAL STUDIES
COMPARING ONLINE AND OFFLINE PROGRAMMING PERFORMANCE. COMMUNICATIONS OF THE
ACM, 1968, 11, 3-11.
DESCRIPTION:

TWO EXPLORATORY EXPERIMENTS WERE CONDUCTED AT SYSTEM DEVELOPMENT CORPORATION TO COMPARE DEBUGGING PERFORMANCE OF PROGRAMMERS WORKING UNDER CONDITIONS OF ONLINE AND OFFLINE ACCESS TO A COMPUTER. THESE ARE THE FIRST KNOWN STUDIES THAT MEASURE PROGRAMMERS! PERFORMANCE UNDER CONTROLLED CONDITIONS FOR STANDARD TASKS.

STATISTICALLY SIGNIFICANT RESULTS OF BOTH EXPERIMENTS INDICATED FASTER DEBUGGING UNDER ONLINE CONDITIONS, BUT PERHAPS THE MOST IMPORTANT PRACTICAL FINDING INVOLVES THE STRIKING INDIVIDUAL DIFFERENCES IN PROGRAMMER PERFORMANCE. METHODOLOGICAL PROBLEMS ENCOUNTERED IN DESIGNING AND CONDUCTING THESE EXPERIMENTS ARE DESCRIBED; LIMITATIONS OF THE FINDINGS ARE POINTED OUT; HYPOTHESES ARE PRESENTED TO ACCOUNT FOR RESULTS; AND SUGGESTIONS ARE MADE FOR FURTHER RESEARCH. (A) 9P, 15R.

357 COMPARISON OF TIME-SHARING AND BATCH PROCESSING
SACKMAN, H., & GOLD, M.M. TIME-SHARING VERSUS BATCH PROCESSING: AN
EXPERIMENTAL INQUIRY INTO HUMAN PROBLEM-SOLVING (TECHNICAL REPORT NO. SP3110). SANTA MONICA, CALIFORNIA: SYSTEM DEVELOPMENT CORP., 1968.

358 COMPILER TESTING
SAMET, H. A NORMAL FORM FOR COMPILER TESTING. IN PROCEEDINGS OF THE ACM
SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND PROGRAMMING LANGUAGES, SIGPLAN
NOTICES, AUGUST 1977, 12(8), 155-162 (ALSO: SIGART NEWSLETTER, AUGUST 1977,
NO. 64, 155-162).
DESCRIPTION:

A FORMALISM IS PRESENTED FOR OBTAINING A NORMAL FORM TO BE USED IN REPRESENTING PROGRAMS FOR COMPILER TESTING. EXAMPLES ARE USED TO MOTIVATE THE FEATURES THAT MUST BE CONSIDERED WHEN DEVELOPING SUCH A FORMALISM. IT IS PARTICULARLY SUITABLE FOR HEURISTICALLY OPTIMIZED CODE AND HAS BEEN SUCCESSFULLY USED IN A SYSTEM FOR PROVING THAT PROGRAMS WRITTEN IN A SUBSET OF LISP ARE COPLECTLY TRANSLATED TO ASSEMBLY LANGUAGE. (A) 8P. 19R.

359 PROGRAMMING LANGUAGES, REVIEW
SAMMET, J.E. PROGRAMMING LANGUAGES: HISTORY AND FUNDAMENTALS. ENGLEWOOD
CLIFFS, NEW JERSEY: PRENTICE-HALL, 1969.
DESCRIPTION:

profite of the first of the fir

The state of the s

THE PRIMARY PURPOSE OF THIS BOOK IS TO SERVE AS A REFERENCE FOR AN OVERALL VIEW OF HIGHER LEVEL LANGUAGES. THIS BOOK BRINGS TOGETHER IN ONE PLACE, AND IN A CONSISTENT FASHION, FUNDAMENTAL INFORMATION ON PROGRAMMING LANGUAGES, INCLUDING HISTORY, GENERAL CHARACTERISTICS, SIMILARITIES, AND DIFFERENCES.

A SECOND PURPOSE OF THE BOOK IS TO PROVIDE SPECIFIC BASIC INFORMATION ON ALL THE SIGNIFICANT, AND MOST OF THE MINOR, HIGHER LEVEL LANGUAGES DEVELOPED IN THE UNITED STATES.

THE THIRD PURPOSE OF THE BOOK IS TO PROVIDE HISTORY AND PERSPECTIVE FOR THIS PARTICULAR ASPECT OF THE PROGRAMMING FIELD. BECAUSE OF THE RAPIDLY CHANGING NATURE OF THIS TYPE OF WORK, NEW LANGUAGES APPEAR DAILY (LITERALLY) AND SO THIS 800% REPRESENTS A SNAPSHOT OF — AND AN (INDIRECT) EXPLANATION OF HOW WE ARRIVED AT — THE SITUATION AT A GIVEN POINT IN 17ME, NAMELY THE FALL OF 1967.

OTHER PURPOSES ARE TO PROVIDE AN EXTENSIVE BIBLIOGRAPHY OF RELEVANT MATERIAL, TO SHOW VARIOUS PHILOSOPHIES OF LANGUAGE DESIGN, TO DESCRIBE A NUMBER OF KEY FACTORS INVOLVED IN CHOOSING A LANGUAGE, AND TO PROVIDE THE READER WITH ENOUGH INFORMATION SO THAT HE CAN DECIDE WHICH LANGUAGES HE WISHES TO EXAMINE IN DETAIL. (A, ABBR)

 SCHATZOFF, M., TSAO, R., & WIIG, R. AN EXPERIMENTAL COMPARISON OF TIME SHARING
 AND BATCH PROCESSING. COMMUNICATIONS OF THE ACM, 1967, 10, 261-265.
 DESCRIPTION:

THE EFFECTIVENESS FOR PROGRAM DEVELOPMENT OF THE MIT COMPATIBLE TIME-SHARING SYSTEM (CTSS) WAS COMPARED WITH THAT OF THE IBM IBSYS BATCH PROCESSING SYSTEM BY MEANS OF A STATISTICALLY DESIGNED EXPERIMENT. AN IDENTICAL SET OF FOUR PROGRAMMING PROBLEMS WAS ASSIGNED TO EACH OF A GROUP OF FOUR PROGRAMMING SUBJECTS. DATA WAS OBTAINED FOR SIX VARIABLES WHICH WERE CONSIDERED TO BE DEFINITIVE OF "SYSTEM EFFECTIVENESS", AND ANALYSIS OF VARIANCE TECHNIQUES WERE EMPLOYED TO ESTIMATE SYSTEM DIFFERENCES IN THESE VARIABLES. ANALYSIS OF THE RESULTS PROVIDED STRONG EVIDENCE OF IMPORTANT SYSTEM DIFFERENCES. (A) 5P, 2R.

SCHNEIDEWIND, N.F. AMALYSIS OF ERROR PROCESSES IN COMPUTER SOFTWARE. IN PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON RELIABLE SOFTWARE, 21-23 1975, LOS ANGELES, CALIFORNIA. SIGPLAN NOTICES, 1975, 10, 337-346. DESCRIPTION:

A NON-HOMOGENEOUS POISSON PROCESS IS USED TO MODEL THE OCCURRENCE OF ERRORS DETECTED DURING FUNCTIONAL TESTING OF COMMAND AND CONTROL SOFTWARE. THE PARAMETERS OF THE DETECTION PROCESS ARE 2STIMATED BY USING A COMBINATION OF MAXIMUM LIKELIHOOD AND WEIGHTED LEAST SQUARES METHODS. ONCE PARAMETER ESTIMATES ARE OBTAINED, FORECASTS CAN BE MADE OF CUMULATIVE NUMBER CF DETECTED ERRORS. FORECASTING EQUATIONS OF CUMULATIVE CORRECTED ERRORS, ERRORS DETECTED BUT NOT CORRECTED, AND THE TIME REQUIRED TO DETECT OR CORRECT A SPECIFIED NUMBER OF ERRORS, ARE DERIVED FROM THE DETECTED ERROR THE VARIOUS FORECASTS PROVIDE DECISION AIDS FOR MANAGING SOFTWARE FUNCTION. TESTING ACTIVITIES. NAVAL TACTICAL DATA SYSTEM SOFTWARE ERROR DATA ARE USED TO EVALUATE SEVERAL VARIATIONS OF THE FORESASTING EQUATIONS. BECAUSE OF CHANGES WHICH TAKE PLACE IN THE ACTUAL DETECTED ERROR PROCESS, IT WAS FOUND THAT RECENT ERROR OBSERVATIONS ARE MORE REPRESENTATIVE OF FUTURE ERROR OCCURRENCES THAN ARE EARLY OBSERVATIONS. BASED ON A LIMITED TEST OF THE MODEL, ACCEPTABLE ACCURACY WAS OBTAINED WHEN USING THE PREFERRED FORECASTING METHOD. 10P, 7R.

368 PROGRAMMER PERFORMANCE

SCOTT, R.F. A PROGRAMMER PRODUCTIVITY PREDICTION MODEL (UNPUBLISHED DOCTORAL DISSERTATION, TEXAS A&M UNIVERSITY). 1973. DESCRIPTION:

A COMPUTER PROGRAMMER PRODUCTIVITY PREDICTION MODEL HAS BEEN DEVELOPED. THIS DEVELOPMENT WAS PRECEDED BY AN INVESTIGATION OF THE PROGRAMMER PRODUCTIVITY FACTORS. THE RESEARCH WAS ACCOMPLISHED IN THREE PARTS.

TO IDENTIFY IMPORTANT PRODUCTIVITY FACTORS, A DATA ANALYSIS WAS PERFORMED USING A COMBINATION OF EXISTING DATA BASES WITH STEPWISE MULTIVARIATE REGRESSION ANALYSIS. THE DERIVED EQUATION, WITH PROGRAMMER PRODUCTIVITY AS THE DEPENDENT VARIABLE, IS INCLUDED.

TO GAIN ADDITIONAL INSIGHT INTO PRODUCTIVITY FACTORS, AN ALTERNATE NON-ANALYTICAL HETHOD WAS USED. EXPERTS ON COMPUTER PROGRAMMING PROJECT MANAGEMENT WERE SURVEYED. THE ITERATIVE DELPH! SURVEY TECHNIQUE WAS USED TO IDENTIFY IMPORTANT PROGRAMMER PRODUCTIVITY PARAMETERS FROM A PANEL OF EXPERTS. A BACKGROUND REPORT ON THE DELPHI PROCEDURE AND THE SURVEY RESULTS ARE INCLUDED. THE IMPORTANCE OF PROGRAMMER INTERACTIONS WAS EVIDENT IN BOTH THE DATA ANALYSIS AND DELPHI STUDIES.

MODELING WAS NEXT CONSIDERED. THE OBJECTIVE WAS TO FURTHER STUDY PROJECT COMMUNICATIONS AND PROVIDE A PRODUCTIVITY PREDICTION ABILITY. A DISCUSSION OF SMALL GROUP. INFORMATION FEEDBACK AND MULTIPROCESSOR MODEL CONCEPTS IS PRESENTED. A PROJECT MODEL USING THE MULTIPROCESSOR CONCEPT IS PROGRAMMED IN A PROGRAMMING LANGUAGE (APL). THE MODEL EMPLOYS THE CONCEPT OF PROGRAMMER ACTIVITY PROFILES AND USES A CUMULATIVE EXPONENTIAL PRODUCTIVITY RATE. THREE EXAMPLE EXPERIMENTS ARE DISCUSSED.

ALL RESULTS EMPHASIZE THE IMPORTANCE OF INTERACTION AMONG PROGRAMMERS IN REDUCING PRODUCTIVITY. NUMERCUS RESULTS ARE INCLUDED ON THE RELATIVE IMPORTANCE OF VARIOUS VARIABLES TO PRODUCTIVITY. COMMUNICATIONS PATTERNS, NUMBER OF PROGRAMMERS, LENGTH OF PROJECT AND INDIVIDUAL PRODUCTIVITY VARIABLES ARE USED IN THE MODEL FOR PRODUCTIVITY PREDICTION.

SOME RECOMMENDATIONS AND EXTENSIONS FOR FURTHER RESEARCH ARE PRESENTED. (a) 136P, 82R.

369 PROGRAMMER PERFORMANCE

SCOTT, R.F., & SIMMONS, D.B. PROGRAMMER PRODUCTIVITY AND THE DELPHI TECHNIQUE. DATAMATION, MAY 1074, 20(5), 71-73. DESCRIPTION:

THE DELPHI TECHNIQUE WAS USED TO DETERMINE WHICH VARIABLES PROGRAMMING PROJECT MANAGERS FEEL ARE RELATED TO PROGRAMMER PRODUCTIVITY. THIS TECHNIQUE INVOLVES ANONYMOUS RESPONSE, ITERATION, CONTROLLED FEEDBACK, AND STATISTICAL GROUP RESPONSE. THE RESULTS INDICATE THE IMPORTANCE OF PROVIDING TPOUNDED INDEPENDENT PROGRAMMER WITH A WELL DOCUMENTED, THOROUGHLY DEFINED INDEPENDENT TASK, AND USING EXPERIENCED PROGRAMMERS WORKING IN HIGH-LEVEL LANGUAGES. STRUCTURED PROGRAMMING TECHNIQUES WERE CONSIDERED LESS IMPORTANT THAN DOCUMENTATION, PROGRAMMING TOOLS, AND EXPERIENCE. (MEA) 3P, 9R.

EIGHT EXPERI' TED PROGRAMMERS WERE EACH GIVEN THREE FORTRAN PROGRAMS TO MEMORIZE AND LEPRODUCE FUNCTIONALLY, WITHOUT ADTES. THREE LEVELS OF COMPLEXITY OF CONTROL FLOW AND THREE LEVELS OF MNEMONIC VARIABLE NAMES WERE INDEPENDENTLY MANIPULATED. THE EXPERIMENTAL DESIGN WAS AN INCOMPLETE SPLIT-PLOT FACTORIAL WHERE EACH PROGRAMMER WAS GIVEN ONE VERSION OF EACH PROGRAM AND ALL LEVELS OF THE THO PRIMARY INDEPENDENT VARIABLES.

THE PARTICIPANTS CORRECTLY RECALLED SIGNIFICANTLY MORE STATEMENTS WHEN THE COMPLEXITY OF CONTROL FLOW WAS REDUCED. DIFFERENCES IN RECALL FOR THE THREE LEVELS OF MNEMONIC VARIABLE NAMES WERE NOT SIGNIFICANT.

A FURTHER ANALYSIS COMPARED THE PERCENT OF STATEMENTS CORRECTLY RECALLED TO HALSTEAD'S E, A MEASURE OF THE EFFORT REQUIRED TO CODE A PROGRAM. THE PEARSON CORRELATION COEFFICIENT WAS -0.81, OVER THE 24 DATA POINTS; THUS INDICATING THAT HALSTEAD'S E IS A POWERFUL PREDICTOR OF ONE'S ABILITY TO UNDERSTAND A COMPUTER PROGRAM.

SEVERAL CHANGES IN THE EXPERIMENTAL DESIGN AND THE CONDUCT OF THE EXPERIMENT ITSELF ARE RECOMMENDED FOR FUTURE EXPERIMENTAL WORK IN THIS AREA. (A) 19P, 12R.

SHNEIDERMAN, B. EXPERIMENTAL TESTING IN PROGRAMMING LANGUAGES, STYLISTIC
CONSIDERATIONS AND DESIGN TECHNIQUES. AFIPS CONFERENCE PROCFEDINGS, 1975, 44,
653-656.
DESCRIPTION:

THIS PAPER BRIEFLY REVIEWS RESEARCH IN THE AREAS OF PROGRAMMING LANGUAGE DESIGN, STYLISTIC CONSIDERATIONS, AND PROGRAM DESIGN TECHNIQUES. A COMMON CRITICISM THAT CAN BE APPLIED TO THE MAJORITY OF THIS RESEARCH IS THE LACK OF CONTROLLED EXPERIMENTATION PRIOR TO YHE IMPLEMENTATION OF NEW LANGUAGES AND TECHNIQUES. IN ORDER TO ESTABLISH AN APPROPRIATE FRAMEWORK FOR SUCH EXPERIMENTS, RELEVANT PROBLEM DOMAINS ARE DEFINED AND EXPERIMENTAL TECHNIQUES ARE DISCUSSED. (MEA) 4P, 30R.

379 PROGRAMMING
SHNEIDERMAN, B. EXPLORATORY EXPERIMENTS IN PROGRAMMER BEHAVIOR.
INTERNATIONAL JOURNAL OF COMPUTER AND INFORMATION SCIENCES, 1976, 5, 123-143.
DESCRIPTION:

THE THESIS OF THIS PAPER IS THAT STUDIES OF PROGRAMMING SHOULD SEPARATE MACHINE-RELATED ISSUES FROM HUMAN FACTORS ISSUES. THE ISOLATION OF HUMAN FACTORS ISSUES WOULD ALLOW A MORE THOROUGH STUDY OF PROGRAMMING SINCE THE EXPERIMENTAL TECHNIQUES DEVELOPED BY COGNITIVE PSYCHOLOGISTS COULD BE READILY APPLIED. IN ORDER TO APPLY THESE TECHNIQUES, HOWEVER, IT IS FIRST NECESSARY TO DEFINE AN APPROPRIATE EXPERIMENTAL METHODOLOGY. THE METHODOLOGICAL ISSUES DISCUSSED IN THIS PAPER INCLUDE: CLASSIFICATION OF SUBJECTS, CLASSIFICATION OF PROGRAMS, RELEVANT TASKS THAT SHOULD BE STUDIED, AND MEASUREMENT TECHNIQUES.

THIS METHODOLOGY IS ILLUSTRATED IN TWO EXPEPIMENTS. THE FIRST EXPERIMENT, ON PROGRAM MEMORIZATION, WAS MODELED AFTER A PARADIGM USED BY CHASE AND SIMON (COGNITIVE PSYCHOLOGY, 1973, 4, 55-81) IN A STUDY OF MEMORY FOR CHESS POSITIONS. CONSISTENT WITH RESULTS REPORTED IN COGNITIVE PSYCHOLOGY, IT WAS FOUND THAT EXPERIENCED PROGRAMMERS WERE ABLE TO RECALL SIGNIFICANTLY MORE STATEMENTS FROM A NORMAL-ORDER PROGRAM THAN INEXPERIENCED PROGRAMMERS, BUT THERE WERE NO DIFFERENCES IN RECALL FOR A SCRAMBLED-ORDER PROGRAM. THIS SUGGESTS THAT EXPERIENCED PROGRAMMERS HAVE LEARNED MORE EFFICIENT TECHNIQUES FOR RECODING PROGRAMS IN MEMORY. THE SECOND EXPERIMENT COMPARED THE BEHAVIOR OF SUBJECTS FROM TWO EXPERIENCE LEVELS IN COMPREHENDING PROGRAMS INVOLVING EITHER ARITHMETIC OR LOGICAL IF CONSTRUCTS, IN FORTRAN. THE RESULTS INDICATE THAT LOGICAL IF CONSTRUCTS, IN FORTRAN. THE RESULTS INDICATE THAT LOGICAL IF'S ARE INITIALLY EASIER TO COMPREHEND, BUT THAT THIS ADVANTAGE DISAPPEARS AS EXPERIENCE INCREASES. THIS PAPER PRESENTS A COGNITIVE FRAMEWORK FOR DESCRIBING BEHAVIORS INVOLVED IN PROGRAM COMPOSITION, COMPREHENSION, DEBUGGING, MODIFICATION AND THE ACQUISITION OF NEW PROGRAMMING CONCEPTS, SKILLS AND KNOWLEDGE. AN INFORMATION PROCESS MODEL IS PRESENTED WHICH INCLUDES A LONG-TERM STORE OF SEMANTIC AND SYNTACTIC KNOWLEDGE, AND A WORKING MEMORY IN WHICH PROBLEM SOLUTIONS ARE CONSTRUCTED. NEW EXPERIMENTAL EVIDENCE IS PRESENTED TO SUPPORT THE MODEL. (A)

EXPERIMENTS ARE BRIFFLY CITED WHICH COMPARED LOGICAL WITH ARITHMETIC "IF" STATEMENTS, INVESTIGATED SEMANTIC EFFECTS ON MEMORY FOR PROGRAMS, AND INVESTIGATED THE EFFECTS OF COMMENTS, MEANINGFUL VARIABLE NAMES, MODULARIZATION OF PROGRAMS, AND FLOWCHARTS ON PROGRAM COMPREHENSION AND DEBUGGING. (HRR) 30P, 30R.

386 FLOWCHARTING, DOCUMENTATION

SHNEIDERMAN, B., MAYER, R., MCKAY, D., & HELLER, P. EXPERIMENTAL INVESTIGATIONS OF THE UTILITY OF FLOWCHARTS IN PROGRAMMING (TECHNICAL REPORT NO. 36). BLOOMINGTON, INDIANA: INDIANA UNIVERSITY, COMPUTER SCIENCE DEPARTMENT, AUGUST 1975 (ALSO: COMMUNICATIONS OF THE ACM, 1977, 20, 373-381). DESCRIPTION:

THIS PAPER DESCRIBES PREVIOUS RESEARCH ON FLOWCHARTS AND A SERIES OF CONTROLLED EXPERIMENTS TO TEST THE UTILITY OF DETAILED FLOWCHARTS AS AN AID TO PROGRAM COMPOSITION, COMPREHENSION, DEBUGGING AND MODIFICATION. OUR RESULTS SHOWED NO STATISTICALLY SIGNIFICANT DIFFERENCE BETWEEN FLOWCHART AND NO FLOWCHART GROUPS, THEREBY CALLING INTO QUESTION THE UTILITY OF FLOWCHARTING. A PROGRAM OF FURTHER RESEARCH IS SUGGESTED. (A)

FIVE EXPERIMENTS ARE REPORTED: (1) SUBJECTS WHO PRODUCED FLOWCHARTS BEFORE WRITING A PROGRAM DID NO BETTER ON THE PROGRAMMING TASK THAN THOSE WHO DID ONLY THE LATTER; (2) WHEN FLOWCHARTS WERE PRESENTED WITH EITHER THE FIRST OR SECOND OF TWO PROGRAM COMPREHENSION TASKS, NO FLOWCHART-RELATED DIFFERENCES WERE OBSERVED; (3) WHEN THO GROUPS OF SUBJECTS (ONE EXPERIENCED WITH FLOWCHARTS, ONE NOT) WERE GIVEN COMPREHENSION AND DEBUG TASKS WITH LITHER MACRO-FLOWCHARTS, MICRO-FLOWCHARTS, OR NO FLOWCHARTS, NO FLOWCHART MAIN EFFECTS WERE FOUND, BUT THOSE WITH PRIOR FLOWCHART EXPERIENCE PERFORMED BETTER WITH FLOWCHARTS (NOT STATISTICALLY SIGNIFICANT); (4) WITH AN EXPERIMENTAL DESIGN SIMILAR TO (3), BUT USING A MODIFICATION TASK, FLOWCHARTS HAD NO EFFECT ON SOLUTION TIME OR ERRORS; (5) SUBJECTS IN TWO COMPREHENSION TASKS DID BETTER (THOUGH NOT SIGNIFICANTLY) WITH THE PROGRAM ALONE THAN WITH PROGRAM AND FLOWCHART, OR FLOWCHART ALONE. (HRR) 53P, 17R.

387 DEBUGGING

March of the state of the second of the seco

SHNEIDERMAN, B., & MCKAY, D. EXPERIMENTAL INVESTIGATIONS OF COMPUTER PROGRAM DEBUGGING AND MODIFICATION. IN PROCEEDINGS OF THE 6TH CONGRESS OF THE INTERNATIONAL ERGONOMICS ASSOCIATION. SANTA MONICA, CA: HUMAN FACTORS SOCIETY, 1976, 557-563 (ALSO TECHNICAL REPORT NO. 48, COMPUTER SCIENCE DEPARTMENT, INDIANA UNIVERSITY, APRIL 1976).

DESCRIPTION:

ALTHOUGH GREATER EMPHASIS IS PLACED ON THE TASK OF COMPUTER PROGRAM COMPOSITION, DEBUGGING AND MODIFICATION OFTEN CONSUME MORE TIME AND EXPENSE IN PRODUCTION ENVIRONMENTS. DEBUGGING IS THE TASK OF LOCATING SYNTACTIC AND SEMANTIC ERRORS IM PROGRAMS AND CORRECTING THESE ERRORS. MODIFICATION IS THE CHANGE OF A JORKING PRUGRAM TO PERFORM ALTERNATE TASKS.

· And and the same of the same

THE FACTORS AND TECHNIQUES WHICH FACILITATE DEBUGGING AND MODIFICATION ARE POORLY UNDERSTOOD, BUT ARE SUBJECT TO EXPERIMENTAL INVESTIGATION. CONTROLLED EXPERIMENTS CAN BE PERFORMED BY PRESENTING TWO AIDS AND REQUIRING THE SAME TASK. FOR EXAMPLE, IN ONE STUDY WE PRESENTED AN 81 LINE FORTRAN PROGRAM CONTAINING THREE RUGS TO DISTINCT GROUPS OF SUBJECTS. ONE OF THE GROUPS RECEIVED A DETAILED FLOWCHART, BUT OUR RESULTS INDICATED THAT THIS AID DID NOT FACILITATE THE DEBUGGING PROCEDURE. SIMILAR MEGATIVE RESULTS WERE OBTAINED FOR A MODIFICATION TASK.

IN OTHER EXPERIMENTS, COMMENTS AND MEANINGFUL VARIABLE NAMES WERE USEFUL IN DEBUGGING AND MODULARITY FACILITATED MODIFICATION. OTHER POTENTIALLY INFLUENTIAL FACTORS, WHICH ARE SUBJECT TO EXPERIMENTAL STUDY, INCLUDE INDENTATION RULES, TYPE OF CONTROL STRUCTURES, DATA STRUCTURE COMPLEXITY AND PROGRAM DESIGN.

THESE AND OTHER HUMAN FACTOR EXPERIMENTS IN PROGRAMMING HAVE LED TO A COGNITIVE MODEL OF PROGRAMMER BEHAVIOR WHICH DISTINGUISHES BETWEEN THE HIERARCHICALLY LYRUCTURED, MEANINGFULLY ACQUIRED SEMANTIC KNOWLEDGE AND THE ROTELY MEMORIZED SYNTACTIC KNOWLEDGE. ERRORS CAN BE CLASSED INTO SYNTACTIC MISTAKES WHICH ARE RELATIVELY EASY TO LOCATE AND CORRECT AND TWO FORMS OF SEMANTIC MISTAKES. SEMANTIC ERRORS OCCUR WHILE CONSTRUCTING AN INTERNAL SEMANTIC STRUCTURE TO A REPRESENTATION IN THE SYNTAX OF A PROGRAMMING LANGUAGE. MCDIFICATION IS INTERPRETED AS THE ACQUISITION OF AN INTERNAL SEMANTIC STRUCTURE BY STUDYING A PROGRAM, FOLLOWED BY MODIFICATION OF THIS STRUCTURE AND REVISION OF THE CODE. (A) 7P, 22R.

SHOOMAN, M.L., & BOLSKY, M.I. TYPES, DISTRIBUTION, AND TEST AND CORRECTION TIMES FOR PROGRAMMING ERRORS. IN PROCEEDIGUS OF THE 1975 INTERNATIONAL CONFERENCE ON SOFTWARE, SIGPLAN NOTICES, JUNE 1975, 10(6), 347-357. DESCRIPTION:

The same of the sa

IN ORDER TO DEVELOP SOME BASIC INFORMATION ON SOFTWARE ERRORS, AN EXPERIMENT IN COLLECTING DATA ON TYPES AND FREQUENCIES OF SUCH ERRORS WAS CONDUCTED AT BELL LABORATORIES.

THE PAPER REPORTS THE RESULTS OF THIS EXPERMENT, WHOSE COLLECTIVES WERE TO: (1) DEVELOP AND UTILIZE A SET OF TERMS FOR DESCRIBING POSSIBLE TYPES OF ERRORS, THEIR NATURE, AND THEIR FREQUENCY; (2) PERFORM A PILOT STUDY TO DETERMINE IF DATA OF THE TYPE REPORTED IN THIS PAPER COULD BE COLLECTED; (3) INVESTIGATE THE ERROR DENSITY AND ITS CORRESPONDENCE TO PREDICTIONS FROM PREVIOUS DATA REPORTED; (4) DEVELOP DATA ON HOW RESOURCES ARE EXPENDED IN DEBUGGING.

A PROGRAM OF APPROXIMATELY 4K MACHINE INSTRUCTIONS (FINAL SIZE) WAS CHOSEN. PROGRAMMERS WERE ASKED TO FILL OUT FOR EACH ERROR, IN ADDITION TO THE REGULAR TROUBLE REPORT/CORRECTION REPORT (TR/CR) FORM, A SPECIAL SUPPLEMENTARY TR/CR FORM FOR THE PURPOSES OF THIS EXPERIMENT. SIXTY-THREE TR/CR AND SUPPLEMENTARY FORMS WERE COMPLETED DURING THE TEST AND INTEGRATION PHASE OF THE PROGRAM.

IN GENERAL, THE DATA COLLECTED WERE FELT TO BE ACCURATE ENOUGH FOR THE PURPOSES OF THE ANALYSES PRESENTED. THE 63 FORMS REPRESENTED A LITTLE OVER 1-1/2% OF THE TOTAL NUMBER OF MACHINE INSTRUCTIONS OF THE PROGRAM (IN GOOD AGREEMENT WITH THE 1% TO 2% RANGE NOTED IN PREVIOUS STUDIES).

IT WAS DISCOVERED THAT A LARGE PERCENTAGE OF THE ERRORS WAS FOUND BY HAND PROCESSING (WITHOUT THE AID OF A COMPUTER). THIS METHOD WAS FOUND TO BE MUCH CHEAPER THAN TECHNIQUES INVOLVING MACHINE TESTING.

SIME, M.E., ARBLASTER, A.T., & GREEN, T.R.G. REDUCING PROGRAMMING ERRORS IN NESTED CONDITIONALS BY PRESCRIBING A WRITING PROCEDURE. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1977, 9, 119-126. DESCRIPTION:

A CONTROL OF THE PROPERTY OF T

HAYS TO REDUCE CARELESS PROGRAMMING ERRORS WERE INVESTIGATED. NON-PROGRAMMERS LEARNT TO WRITE NESTED CONDITIONAL PROGRAMS IN ONE CF THREE CONDITIONS: AN AUTOMATIC SYNTAX CONDITION, IN WHICH SYNTACTIC ERRORS WERE IMPOSSIBLE BECAUSE PROGRAMS WERE MADE UP FROM WHOLE SYNTACTIC CONSTRUCTIONS RATHER THAN FROM SINGLE WORDS; A PROCEDURAL CONDITION, IN WHICH PROGRAMS WERE WRITTEN WORD BY HORD AS USUAL, BUT A WELL-DEFINED PROCEDURE WAS PRESCRIBED TO HELP SUBJECTS WRITE NESTED CONDITIONALS CORRECTLY: AND A PLAIN CONDITION RESEMBLING STANDARD PROGRAMMING TUITION, IN WHICH SUBJECTS WERE TOLD THE STRUCTURE OF THE LANGUAGE BUT WERE GIVEN NO GUIDE TO HELP IN WRITING. SIGNIFICANTLY MORE ERROR-FREE PROGRAMS HERE WRITTEN IN THE PROCEDURAL CONDITION THAN IN THE PLAIN CONDITION, SHOWING THAT EXPLICIT PROCEDURES CAN IMPROVE PROGRAMMING SUCCESS, AT LEAST IN THESE CONDITIONS. IN THE AUTOMATIC CONDITION THE SUCCESS RATE WAS STILL HIGHER, SHOWING THAT THE PROCEDURE WE USED COULD STILL BE IMPROVED. THESE RESULTS, AND THE OUTCOMES OF FURTHER ANALYSES, BEAR ON RECOMMENDATIONS BY THE "STRUCTURED FROGRAMMING" SCHOOL TO FOLLOW EXPLICIT PROCEDURES WHEN WRITING PROGRAMS, AND ALSO ON PREVIOUS WORK ON THE DESIGN OF EASILY-USED PROGRAMMING LANGUAGES. 392 PROGRAMMING LANGUAGES

SIME, M.E., ARBLASTER, A.T., & GREEN, T.R.G. STRUCTURING THE PROGRAMMER'S TASK. JOURNAL OF OCCUPATIONAL PSYCHOLOGY, 1977, 50, 205-216.

DESCRIPTION:

COMPUTER PROGRAMMING COULD BE MADE EASIER. THIS PAPER GIVES A SHORT ACCOUNT OF THE AUTHORS' EMPIRICAL STUDIES OF PROGRAMMING, SHOWING THAT VERY CONSIDERABLS IMPROVEMENTS CAN BE OBTAINED BOTH FOR BEGINNERS AND FOR PROFESSIONALS. THE IMPROVEMENTS ARE RELATED TO, THOUGH NOT WHOLLY DEPENDENT ON, THE NEW CONCEPTS OF 'STRUCTURED PROGRAMMING'; WE HAVE FOUND WAYS TO IMPROVE BOTH THE PROGRAMMING LANGUAGE ITSELF AND THE PROCEDURES USED BY THE PROGRAMMER. PSYCHOLOGICAL EXPLANATIONS OF THE EFFECTS ARE OFFERED AND THE LIMITATONS OF PRESENT FINDINGS ARE NOTED. (A)

393 PROGRAMMING LANGUAGES

SIME, M.E., FITTER, M., & GREEN, T. WHY IS PROGRAMMING COMPUTERS SO HARD? NEW BEHAVIOUR, SEPTEMBER 1975, 378-381. DESCRIPTION:

THE PROBABILITY OF WRITING A CORRECTLY UNDERSTOOD PROGRAM CAN BE CONSIDERABLY IMPROVED BY BETTER PROGRAMMING LANGUAGE DESIGN. PROGRAMMING LANGUAGES ARE GENERALLY DESIGNED, HOWEVER, IN THE TOTAL ABSENCE OF EMPIRICAL DATA AND PRIMARILY ON THE BASIS OF INTUITION AND GUESSWORK. THIS PAPER BRIEFLY OUTLINES THE ROLE THAT PSYCHOLOGY SHOULD PLAY IN DESIGNING MORE EFFECTIVE PROGRAMMING LANGUAGES. (MEA)

SIME, M.E., GREEN, T.R.G., & GUEST, D.J. PSYCHOLOGICAL EVALUATION OF TWO CONDITIONAL CONSTRUCTIONS USED IN COMPUTER LANGUAGES. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1973, 5, 105-113. DESCRIPTION:

The second se

THERE IS A NEED FOR EMPIRICAL EVALUATION OF PROGRAMMING LANGUAGES FOR "SKILLED USERS, BUT IT IS MORE EFFECTIVE TO COMPARE SPECIFIC FEATURES COMMON TO MANY LANGUAGES THAN TO COMPARE COMPLETE LANGUAGES. THIS CAN BE DONE BY DEVISING MICRO-LANGUAGES STRESSING THE FEATURE OF INTEREST, TOGETHER WITH A SUITABLE SUBJECT MATTER FOR THE PROGRAMS. TO ILLUSTRATE THE POWER OF THIS APPROACH TWO CONDITIONAL CONSTRUCTIONS ARE COMPARED: A NESTABLE CONSTRUCTION, LIKE THAT OF ALGOL 60, AND A BRANCH-TO-LABEL CONSTRUCTION, AS USED IN MANY SIMPLER LANGUAGES. THE FORMER IS EASIER FOR UNSKILLED SUBJECTS. POSSIBLE REASONS FOR THIS FINDING ARE DISCUSSED. (A) 9P, 8R.

395 PROGRAMMING LANGUAGES

SIME, M.E., GREEN, T.R.G., & SUEST, D.J. SCOPE MARKING IN COMPUTEP CONDITIONALS -- A PSYCHOLOGICAL EVALUATION. INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1977, 9, 107-118. DESCRIPTION:

IN A PREVIOUS PAPER THE AUTHORS REPORTED THAT IT WAS EASTER FOR NON-PROGRAMMERS TO LEARN TO USE NESTED CONDITIONAL CONSTRUCTIONS THAN JUMPING, OR BRANCH-TO-LABEL, CONSTRUCTIONS; HOWEVER, AS ONLY SINGLE SITUATIONS WERE STUDIED, THE CONCLUSIONS WERE NECESSARILY RESTRICTED. PRESENT STUDY EXTENDS THE COMPARISON TO THE MORE GENERAL CASE WHERE MESTING REQUIRES "SCOPE MARKERS" TO DISAMBIGUATE THE SYNTAX. THE RESULTS SHOWED. IF THE SCOPE MARKERS WERE SIMPLY THE BEGIN AND END OF ALGOL 60 (ABBREVIATED NEST-BE) THEN THE ADVANTAGE OF NESTING OVER JUMPING WAS WEAKENED; BUT IF THE SCOPE MARKERS CARRIED REDUNDANT INFORMATION ABOUT THE CONDITIONAL TESTED (NEST-INE) (FOR IF-NOT-END) PERFORMANCE WAS EXCELLENT, PARTICULARLY AT DEBUGGING. IT SEEMS NECESSARY TO DISTINGUISH SEQUENCE INFORMATION IN A PROGRAM, WHICH DESCRIBES THE ORDER IN WHICH THINGS ARE DONE, FROM TAXON INFORMATION, WHICH DESCRIBES THE CONDITIONS UNDER WHICH A GIVEN ACTION IS PERFORMED. CONVENTIONAL PROGRAMMING LANGUAGES OBSCURE THE TAXON INFORMATION. THE ADVANTAGE OF HESTIME OVER JUMPING, WE SPECULATE, CLARIFYING THE SEQUENCE INFORMATION BY REDUNDANT RE-CODING IN SPATIAL TERMS; THE ADDED ADVANTAGE OF NEST-INE OVER NEST-BE IS THAT IT CLARIFIES THE TAXON INFORMATION. IT IS BECAUSE DEBUGGING REQUIRES TAXON INFORMATION THAT NEST-INE IS SO MUCH SUPERIOR. ON THIS VIEW ONE WOULD EXPECT THAT IN DECISION TABLE AND PRODUCTION SYSTEM LANGUAGES, WHERE THE TAXON INFORMATION IS EXPLICIT BUT THE SEQUENCE INFORMATION IS OBSCURED, THE REVERSE PHENOMENA SHOULD GCCUR. BECAME DEBUGGING REQUIRES SEQUENCE INFORMATION AS WELL AS TAXON INFORMATION, A DEVICE THAT CLARIFIED THE SEQUENCE WOULD GREATLY IMPROVE SUCH LANGUAGES. (A) 12P, 11R.

397 COMPARISON OF NORMAL BATCH PROCESSING WITH FAST TURNAROUND SMITH, L.B. A COMPARISON OF BATCH PROCESSING AND INSTANT TURNAROUND. COMPARISON OF THE ACM, 1967, 19, 495-500.

A STUDY OF THE PROGRAMMING EFFORTS OF STUDENTS IN AN INTRODUCTORY PROGRAMMING COURSE IS PRESENTED AND THE EFFECTS OF HAVING INSTANT TURNAROUND (A FEW MINUTES) AS OPPOSED TO CONVENTIONAL BATCH PROCESSING WITH TURNAROUND TIMES OF A FEW HOURS ARE EXAMINED. AMONG THE ITEMS COMPARED ARE THE NUMBER OF COMPUTER RUNS PER TRIP TO THE COMPUTATION CENTER, PROGRAM PREPARATION TIME, KEYPUNCHING TIME, DEBUGGING TIME, NUMBER OF RUNS, AND ELAPSED TIME FROM THE FIRST RUN TO THE LAST RUN ON EACH PROBLEM. EVEN THOUGH THE RESULTS ARE INFLUENCED BY THE FACT THAT "BONUS POINTS" WERE GIVEN FOR COMPLETION OF A PROGRAMMING PROBLEM IN LESS THAN A SPECIFIED NUMBER OF RUNS, THERE IS EVIDENCE TO SUPPORT "INSTANT" OVER "BATCH". (A)

DESCRIPTION:

and the second of the second s

THIS ARTICLE DEALS WITH THE DESIGN AND ACTUAL IMPLEMENTATION IN A COMPUTER PROGRAMMING SYSTEM OF "A PROGRAMMER'S ASSISTANT". THE GENERAL FUNCTION OF THE "PROGRAMMER'S ASSISTANT" IS TO MAKE IT POSSIBLE FOR THE HUMAN PROGRAMMER TO SAY TO THE COMPUTER "DO WHAT I MEAN" INSTEAD OF "DO WHAT I SAY," AND "UNDO WHAT I JUST TRIED --- IT DID NOT WORK," INSTEAD OF LEAVING THE PROGRAMMER WITH THE SAD CONSEQUENCES OF HIS ACTUAL INSTRUCTIONS.

IN OTHER WORDS, THE PROGRAMMER'S ASSISTANT DEALS WITH SUCH FACTORS AS: EASE OF INTERACTION, LEVEL OF INTERACTION, FORGIVENESS FOR ERRORS (BOTH SPELLING ERRORS AND ERRORS OF THOUGHT), GOING BACK AND TAKING A DIFFERENT PATH, CHANGING ONE'S MIND, ETC., AND IN GENERAL, THE PROGRAMMER'S ENVIRONMENT.

THIS AREA OF IMPROVEMENT IN INTERACTIVE PROGRAMMING IS IMPORTANT. FOR MANY APPLICATIONS, THE PROGRAMMER'S ENVIRONMENT INFLUENCES, AND TO A LARGE EXTENT DETERMINES, WHAT SORT OF PROBLEM HE CAN TACKLE, AND HOW FAR KE CAN GO IN A GIVEN TIME. IF THE "ENVIRONMENT" IS "COOPERATIVE" AND "HELPFUL," THEN THE PROGRAMMER CAN BE MORE AMBITIOUS AND PRODUCTIVE. IF NOT, HE MAY SPEND MUCH OF HIS TIME AND ENERGY PERFORMING ROUTINE CLERICAL TASKS AND "FIGHTING THE SYSTEM." (A) 4P, 3R.

J. N. BUXTON (EDS.), SOFTWARE ENGINEERING: CONCEPTS AND TECHNIQUES. NEW YORK:
PETROCELLI/CHARTER, 1976, 275-287.
DESCRIPTION:

THIS PAPER DISCUSSES THE FEASIBILITY AND DESIRABILITY OF CONSTRUCTING A "PROGRAMMING LABORATORY" WHICH WOULD CO-OPERATE WITH THE USER IN THE DEVELOPMENT OF HIS PROGRAMS, FREEING HIM TO CONCENTRATE MORE FULLY ON THE CONCEPTUAL DIFFICULTIES OF THE PROBLEM HE WISHES TO SOLVE. EXPERIENCE WITH SIMILAR SYSTEMS IN OTHER FIELDS INDICATES THAT SUCH A SYSTEM WOULD SIGNIFICANTLY INCREASE THE PROGRAMMER'S PRODUCTIVITY.

THE PILOT SYSTEM, IMPLEMENTED WITHIN THE INTERACTIVE BBN LISP SYSTEM, IS A STEP IN THE DIRECTION OF A PROGRAMMING LABORATORY. PILOT OPERATES AS AN INTERFACE BETWEEN THE USER AND HIS PROGRAMS, MONITORING BOTH THE REQUESTS OF THE USER AND THE OPERATION OF HIS PROGRAMS. FOR EXAMPLE, IF PILOT DETECTS AN ERROR DURING THE EXECUTION OF A PROGRAM, IT TAKES THE APPROPRIATE CORRECTIVE ACTION BASED ON PREVIOUS INSTRUCTIONS FROM THE USER. SIMILARLY, THE USER CAN GIVE DIRECTIONS TO PILOT ABOUT THE OPERATION OF HIS PROGRAMS, EVEN WHILE THEY ARE RUNNING, AND PILOT WILL PERFORM THE WORK REQUIRED. IN ADDITION, THE USER CAN EASILY MODIFY PILOT BY INSTRUCTING IT ABOUT ITS OWN OPERATION AND THUS DEVELOP HIS OWN LANGUAGE AND CONVENTIONS FOR INTERACTING WITH PILOT.

SEVERAL EXAMPLES ARE PRESENTED. (A) 13P, 10R.

417 STRUCTURED PROGRAMMING

TENNY, T. STRUCTURED PROGRAMMING IN FORTRAN. DATAMATION, JULY 1974, 20, PP. 112-111; 113; 115.

DESCRIPTION:

AND A CONTRACTOR OF THE PARTY O

THE INDUSTRY'S INVESTMENT IN FORTRAN WILL KEEP IT AROUND A WHILE, HOWEVER, STRUCTURED PROGRAMMING CAN BE DONE IN FOPTRAN IF CERTAIN RULES ARE FOLLOWED. NUMBERING OF STATEMENTS SHOULD ONLY BE IN INCREASING ORDER. BLOCKING AND NESTING SHOULD BE INDICATED BY BLANK COMMENTS AND INDENTATION. IF, GOTO, AND COMPUTED GOTO STATEMENTS SHOULD BE USED FOR THE PURPOSES OF REPEAT, WHILE, CASE, AND MORE GENERALIZED IF-THEN (-ELSE) CONSTRUCTS. THESE SHOULD ALSO BE DESIGNATED BY STANDARD COMMENTS. THE INTENT OF STRUCTURED PROGRAMMING, MODULARITY, TOP-DOWN DISIGN, CAN BE CARRIED OUT IN FORTRAN WITH PROPER MANAGEMENT AND PROFESSIONAL STANDARDS. (GDC)

GENERAL DISCUSSION OF HUMAN FACTORS IN COMPUTER SYSTEMS TESTA, C.J. BEHAVIORAL FACTORS IN INFORMATION SYSTEMS. COMPUTERS AND PEOPLE, APRIL 1974, 23(4), 13-17.

The state of the s

THE NEED FOR BETTER UNDERSTANDING OF HUMAN BEHAVIOR IN INFORMATION SYSTEMS IS BECOMING INCREASINGLY APPARENT. TRADITIONALLY, INFORMATION SPECIALISTS HAVE CONCENTRATED THEIR EFFORTS ON HARDWARE/SOFTWARE PROBLEMS. AS A RESULT. SOPHISTICATED INFORMATION SYSTEMS WERE OFTEN DEVELOPED, BUT PEOPLE EXPERIENCED DIFFICULTY IN INTERACTING WITH THE COMPLEX SYSTEMS. SINCE INFORMATION SYSTEMS ARE USED, OPERATED, AND MAINTAINED BY PEOPLE, THE DESIGN OF EFFECTIVE INFORMATION SYSTEMS WILL ONLY RESULT IF MEN'S BEHAVIORAL CAPABILITIES ARE TAKEN INTO CONSIDERATION. IN THIS ARTICLE, MAN'S PERCEPTUAL AND COGNITIVE CAPABILITIES WILL BE EXAMINED AS IMPORTANT DETERMINANTS OF THE DESIGN OF INFORMATION SYSTEMS. (A, ABBR)

426 COMMAND LANGUAGE DESIGN BASED ON "MENTAL WORK" REQUIRED
TREU, S. INTERACTIVE COMMAND LANGUAGE DESIGN BASED ON REQUIRED MENTAL WORK.
INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES, 1975, 7, 135-149.
DESCRIPTION:

and the state of the second control of the second of the s

ALTHOUGH THE DEFINITION OF "MENTAL WORK" REMAINS ELUSIVE, SYSTEMATIC MEANS/METHODS SHOULD BE CONSIDERED FOR GAINING EVIDENCE ABOUT INTERACTIVE LANGUAGE FEATURES REQUIRING MORE/LESS EFFORT OF THE HUMAN MIND. THE SUGGESTED APPROACH EMPLOYS A STRUCTURING OF THE USER'S CONCEPTUAL REFERENCE SPACES INTO SETS OF "ACTION PRIMITIVES", PECULIAR TO THE TYPE OF COMPUTERALDED TASK INVOLVED. AN INTERACTIVE COMMAND LANGUAGE CAN THEN BE REGARDED AS THE RANGE OF SOME TRANSFORMATION ON THE USER'S SET OF ACTION PRIMITIVES. THE NATURE AND EFFICIENCY OF THAT TRANSFORMATION, IN CONJUNCTION WITH THE INHERENT NUMBER OF MENTAL ASSOCIATION LINKS, ARE HYPOTHESIZED TO HAVE DIRECT RELATIONSHIPS TO THE LEVEL OF REQUIRED MENTAL WORK. THE USER'S DELAY OR "THINK TIME", EXPENDED IMMEDIATELY PRECEDING COMMAND UTILIZATION, IS ONE MEASURABLE QUANTITY THAT SHOULD BE USEFUL AS A WORK LEVEL INDICATOR. (A)

 1971.
- 428 PROGRAMMING LANGUAGES
 TUCKER, A. VERY HIGH-LEVEL LANGUAGE DESIGN: A VIEWPOINT. COMPUTER
 LANGUAGES, 1975, 1, 3-16.
 DESCRIPTION:

RECENT DEVELOPMENTS IN VERY MIGH-LEVEL LANGUAGE DESIGN INDICATE THAT THESE LANGUAGES HOLD GREAT PROMISE FOR IMPROVING THE LEVEL OF MAN-MACHINE COMMUNICATION, AND HENCE, IMPROVING COMPUTER AND PROGRAMMER UTILIZATION. (ESSENTIALLY, A VERY HIGH-LEVEL LANGUAGE ONE WHICH ALLOWS THE PROGRAMMER TO SPECIFY WHAT TO DO, RATHER THAN HOW TO DO IT..) THIS PAPER SURVEYS THESE DEVELOPMENTS, OUTLINES THE GOALS TO WHICH AN "IDEAL" VERY HIGH-LEVEL LANGUAGE SHOULD ASPIRE, AND THEN PRESENTS THE GESIGN OF A VERY HIGH-LEVEL LANGUAGE THAT WOULD MEET THESE GOALS. THIS DESIGN IS PRESENTED IN THE INTEREST OF LAYING BARE SOME BASIC DESIGN AND IMPLEMENTATION QUESTIONS THAT ARE INHERENT TO SUCH AN ACHIEVEMENT. THE PAPER THEN DISCUSSES THESE QUESTIONS, INDICATING BOTH OLD AND NEW RESEARCH PROBLEMS WHICH THEY SUGGEST. (A)

PROGRAM SYNTHESIS

ULRICH, J.W., & MOLL, R. PROGRAM SYNTHESIS BY ANALOGY. IN PROCEEDINGS OF
THE ACM SYMPOSIUM ON ARTIFICIAL INTELLIGENCE AND PROGRAMMING LANGUAGES,
SIGPLAN NOTICES, AUGUST 1977, 12(8), 22-28 (ALSO SIGART NEWSLETTER,
AUGUST 1977, NO. 64, 22-28).
DESCRIPTION:

BY EXTENDING A GIVEN ANALOGY, A KNOWN PROGRAM WHICH SOLVES A GIVEN PROBLEM IS CONVERTED TO A PROGRAM WHICH SOLVES A DIFFERENT BUT ANALOGOUS PROBLEM. THE DOMAINS OF THE TWO PROBLEMS NEED NOT BE THE SAME BUT THEY MUST BE RELATED BY AN INITIAL SPECIFIED ANALOGY. THERE ARE THREE FEATURES WHICH DISTINGUISH THE APPROACH. FIRST THE ANALOGY FORMATION EVOLVES GRADUALLY WITH THE SYNTHESIS OF THE NEW PROGRAM. SECONDLY, THE FORMATION OF THE ANALOGY IS DIRECTED BY THE CORRECTNESS PROOF OF THE KNOWN PROGRAM. FINALLY, THE OUTPUT OF THE SYNTHESIS PROCESS PRODUCES A CORRECTNESS PROOF FOR THE SYNTHESIZED PROGRAM. (A) 7P, 12R.

430 PROGRAM DESIGN LANGUAGE

VAN LEER, P. TOP-DOWN DEVELOPMENT USING A PROGRAM DESIGN LANGUAGE. IBM

SYSTEMS JOURNAL, 1976, 2, 155-17C.

DESCRIPTION:

Resident the second of the sec

DISCUSSED IS A PROGRAM DESIGN LANGUAGE -- A FORM OF PSEUDOCODE -- THAT HAS BEEN DEVELOPED AND USED TO ORGANIZE, TEACH, DOCUMENT, AND DEVELOP SOFTWARE SYSTEMS. AN EXAMPLE OF TOP-DOWN PROGRAM DESIGN ILLUSTRATES THE KEY STEPS IN USING THE LANGUAGE: DETERMINING THE REQUIREMENTS, ABSTRACTING THE FUNCTIONS, EYPANDING THE FUNCTIONS, AND VERIFYING THE FUNCTIONS. SYNTAX AND CONVENTIONS OF THE LANGUAGE ARE GIVEN IN AN APPENDIX. (0) 16P, 7R.

 WALDINGER, R.J., & LEE, R.C.T. PROW: A STEP TOWARD AUTOMATIC PROGRAM WRITING.
 PROCEEDINGS OF THE INTERNATIONAL JOINT CONFERENCE ON ARTIFICIAL INTELLIGENCE,
 1969, 241-252.
- 432 PROGRAMMING LANGUAGES
 WARREN, D.H.D., PEREIRA, L.M., & PEREIRA, F. PROLOG -- THE LANGUAGE AND ITS
 IMPLEMENTATION COMPARED WITH LISP. IN PROCEEDINGS OF THE ACM SYMFOSIUM ON
 ARTIFICIAL INTELLIGENCE AND FROGRAMMING LANGUAGES, SIGPLAN NOTICES, AUGUST
 1977, 12(8), 109-115 (ALSO: SIGART NEWSLETTER, AUGUST 1977, No. 64, 109-1/5).
 DESCRIPTION:

PROLOG IS A SIMPLE BUT POWERFUL PROGRAMMING LANGUAGE FOUNDED ON SYMBOLIC LOGIC. THE BASIC COMPUTATIONAL MECHANISM IS A PATTERN MATCHING PROCESS ('UNIFICATION') OPERATING ON GENERAL RECORD STRUCTURES ('TERMS' OF LOGIC). WE BRIEFLY REVIEW THE LANGUAGE AND COMPARE IT ESPECIALLY WITH PURE LISP. THE REMAINDER OF THE PAPER DISCUSSES TECHNIQUES FOR IMPLEMENTING PROLOG EFFICIENTLY; IN PARTICULAR, WE DESCRIBE HOW TO COMPILE THE PATTERNS INVOLVED IN THE MATCHING PROCESS. THESE TECHNIQUES ARE AS INCORPORATED IN OUR DECSYSTEM-10 PROLOG COMPILER (WRITTEN IN PROLOG). THE CODE IT GENERATES IS COMPARABLE IN SPEED WITH THAT PRODUCED BY EXISTING DECID LISP COMPILERS. WE ARGUE THAT PATTERN MATCHING IS A BETTER METHOD FOR EXPRESSING OPERATIONS ON STRUCTURED DATA THAN CONVENTIONAL SELECTORS AND CONSTRUCTORS -- BOTH FOR THE USER AND FOR THE IMPLEMENTOR. (A) 7P, 15R.

433 PROGRAMMING LANGUAGES

WASSERMAN, A.I. ISSUES IN PROGRAMMING LANGUAGE DESIGN: AN OVERVIEW. SIGPLAN NOTICES, JULY 1975, 10(7), 10-12.

DESCRIPTION:

SEVERAL KEY QUESTIONS CAN BE RAISED CONCERNING THE DESIGN OF PROGRAMMING LANGUAGES. HOW DO WE DEVELOP A PROGRAMMING MECHANISM WHICH CAN ACCURATELY MIRROR LOGICAL THINKING? FURTHERMORE, HOW DO WE DEVELOP A TOOL WHICH IS SUITABLE FOR STEPWISE REFINEMENT OF THE PROBLEM FROM ITS ABSTRACT FORM TO ITS "ELABORATED" FORM IN A "NATURAL" WAY? LAST, HOW THEN DOES SUCH A LANGUAGE GET INTRODUCED AND ACCEPTED BY THE GENERAL PROGRAMMING COMMUNITY SO THAT IT RAISES THE QUALITY OF SOFTWARE PRODUCTION? THESE ARE THE MAIN QUESTIONS WHICH UNDERLIE PRESENTED RESEARCH AND DEVELOPMENT IN THE FIELD OF PROGRAMMING LANGUAGES. (A, ABBR.) 3P, 44R.

WEINBERG, G.M. THE PSYCHOLOGY OF COMPUTER PROGRAMMING. NEW WORK: WAN NOSTFAND
REINHOLD, 1971.
DESCRIPTION:

THE PRINCIPAL GOAL OF THIS BOOK IS TO ESTABLISH A FRAMEWORK FOR VIEWING COMPUTER PROGRAMMING AS A HUMAN ACTIVITY. THE AREAS CONSIDERED INCLUDE PROGRAMMING AS HUMAN PERFORMANCE, PROGRAMMING AS A SOCIAL ACTIVITY, PROGRAMMING AS AN INDIVIDUAL ACTIVITY, AND PROGRAMMING TOOLS. EXPERIMENTAL RESULTS ARE PRESENTED AND EACH CHAPTER IS FOLLOWED BY AN ANNOTATED BIBLIOGRAPHY. (MEA) 303P, 107R.

437 PROGRAMMER PERFORMANCE
WEIMBERG, G.M. THE PSYCHOLOGY OF IMPROVED PROGRAMMING PERFORMANCE.
DATAMATION, NOVEMBER 1972, 18(11), PP. 82-83; 85.
DESCRIPTION:

THIS PAPER DESCRIBES EXPERIMENTS THAT TEST THE IMPACT OF SPECIFIED GOALS ON PROGRAMMING PERFORMANCE. EXPLICITLY STATED GOALS AFFECT BOTH THE PROGRAMS THAT ARE PRODUCED AND THE ESTIMATED TIME REQUIRED FOR COMPLETION. THE CONFLICTING AND COMPLEMENTARY NATURE OF THE RELATIONS AMONG VARIOUS GOALS IS ALSO CONSIDERED. (MEA) 3P, 3R.

438 ERROR VERIFICATION
JEINBERG, G.M., & GRESSETT, G.L. AN EXPERIMENT IN AUTOMATIC VERIFICATION OF PROGRAMS. COMMUNICATIONS OF THE ACM, 1963, 6, 610-613.
DESCRIPTION:

VERIFICATION OF ERRORS INTRODUCED THROUGH THE STAGES OF KEYPUMCHING AND TRANSCRIPTION IS DISCUSSED. ALTHOUGH THE ARTICLE SPEAK. PRIMARILY TO KEYPUNCH AND SYNTAX ERRORS, IT MAKES SOME CONJECTURES ON HOW ERRORS IN CONTROL AND COMPUTATION STRUCTURES COULD BE DETECTED. THE PAPER DOES NOT DEAL WITH PROGRAM VERIFICATION APOVE THE SYNTAX LEVEL AND IT IS NOT CONCERNED WITH "PROOFS" OF CORRECTNESS, FLOW ANALYSIS, INPUT OUTPUT, AND OTHER TOPICS AT THIS LEVEL.

The state of the s

PROGRAMMER PERFORMANCE WEINBERG, G.M., & SCHULMAN, E.L. GOALS AND PERFORMANCE IN COMPUTER PROGRAMMING. HUMAN FACTORS, 1974, 16, 70-77.

IN ALL STUDIES OF HUMAN PERFORMANCE, THE EXPERIMENTER MUST BE CERTAIN THAT THE SUBJECT IS PERFORMING THE TASK THAT THE EXPERIMENTER BELIEVES HE HAS SET. OTHERWISE RESULTS BECOME UNINTERPRETABLE. EARLY STUDIES OF COMPUTER PROGRAMMING MAVE SHOWN SUCH WIDE VARIATIONS IN INDIVIDUAL PERFORMANCE THAT ONE MIGHT SUSPECT THAT SUBJECTS DIFFERED IN THEIR INTERPRETATION OF THE TASK. EXPERIMENTS ARE REPORTED WHICH SHOW HOW PROGRAMMING PERFORMANCE CAN BE STRONGLY INFLUENCED BY SLIGHT DIFFERENCES IN PERFORMING OBJECTIVES. COMCLUSIONS ARE DRAWN FROM THESE RESULT' REGIRDING BOTH FUTURE EXPERIMENTATION AND MANAGEMENT PRACTICES IN COMPUTER FROGRAMMING.

SUBJECTS INSTRUCTED TO RAPIDLY PRODUCE A PROGRAM TOOK FEWER RUNS AND PRODUCED MORE CORRECT, MORE MODIFIABLE, LESS EFFICIENT PROGRAMS THAN DID SUBJECTS INSTRUCTED TO PRODUCE EFFICIENT PROGRAMS. THE FORMER SUBJECTS ALSO GAVE MUCH MORE CONSERVATIVE PRIOR ESTIMATES OF EXPECTED COMPLETION TIME AND HUMBER OF RUNS. IN A SECOND STUDY, GROUPS OF PROGRAMMERS GIVEN THE SAME PROGRAMMING TASK WITH DIFFCRENT OBJECTIVES (MINIMUM CORE, MINIMUM EXECUTION TIME, OUTPUT READABILITY, PROGRAM READABILITY, MINIMUM STATEMENTS, MINIMUM PROGRAMMING TIME) SUCCEEDED IN SATISFYING THOSE OBJECTIVES AT THE COST OF OTHERS. PROGRAMS WITH READABILITY OBJECTIVES WERE MOST READABLE, WHILE PROGRAMS WITH EXECUTION EFFICIENCY OBJECTIVES WERE JUDGED TO PRODUCE UNACCEPTABLE, UNREADABLE OUTPUTS. (HRR)

IN ORDER TO REDUCE THE COMPLEXITY OF PROGRAMS, MANY IDEAS AND TECHNIQUES HAVE BEEN EXPOUNDED. HOWEVER, NO QUANTITATIVE EVIDENCE HAS BEEN GIVEN THAT THE QUALITY OF THE PROGRAMS HAS INDEED BEEN IMPROVED. WE BELIEVE THAT EXPERIMENTAL STUDIES SHOULD BE PERFORMED TO MEASURE THOSE FACTORS WHICH MAKE PROGRAMS DIFFICULT TO UNDERSTAND AND MAINTAIN. THE FIRST STEP IN SUCH RESEARCH IS TO ESTABLISH A SUITABLE EXPERIMENTAL METHODOLOGY. THIS PAPER DESCRIBES A SERIES OF EXPERIMENTS WHICH HAVE BEEN CONDUCTED WITH THE AIM OF ESTABLISHING SUCH A METHODOLOGY. (A) 12P, 20R.

DESCRIPTION:

Hatel British Commence of the Commence of the

THIS PAPER DESCRIBES A SYSTEM WHICH ORGANIZES A NATURAL LANGUAGE DESCRIPTION OF A PROGRAM INTO A CONVENTIONAL PROGRAM CONTROL STRUCTURE, AS A PART OF A LARGER SYSTEM FOR CONVERTING INFORMAL NATURAL LANGUAGE PROGRAM SPECIFICATIONS INTO RUNNING PROGRAMS. ANALYSIS OF THE INPUT PROGRAM FRAGMENTS USING A MODEL OF A HUMAN "READER" OF SPECIFICATIONS HAS BEEN FOUND TO BE A VERY SUCCESSFUL ADJUNCT TO CONVENTIONAL "PLANNING" METHODOLOGIES.

NATURAL LANGUAGE DESCRIPTIONS OF PROGRAMS CAN FREQUENTLY BE CHARACTERIZED AS "RUBBLE" -- A VERY LOOSELY ORGANIZED SET OF ALMOST INDEPENDENT DESCRIPTION FRAGMENTS. SUCH SPECIFICATIONS ARE OFTEN QUITE ROBUST, DUE TO A LARGE DEGREE OF REDUNDANCY; THEY ARE ALSO FREQUENTLY QUITE CONCISE, DUE TO RELIANCE ON THE READERS' INNATE KNOWLEDGE AND THEIR KNOWLEDGE OF THE APPLICATION DOMAIN. THIS PAPER DISCUSSES A PARAPIGM FOR STRUCTURING THE PORTION OF "RUBBLE" PROGRAM DESCRIPTIONS WHICH MAPS INTO CONVENTIONAL PROGRAMMING LANGUAGE CONTROL CONSTRUCTS AND DEFINITION FACILITIES.

IN ORDER TO FOCUS ON STRUCTURING NATURAL LANGUAGE, IT IS NECESSARY TO INDICATE WHERE THIS MAPPING FITS IN THE BROADER SCHEME OF "UNDERSTANDING" NATURAL LANGUAGE PROGRAM DESCRIPTIONS. THE RESEARCH DESCRIBED BELOW IS THE BASIS FOR THE DESIGN OF AN INTERMEDIATE STAGE IN THE OPERATION OF THE SAFE SYSTEM, A SYSTEM DESIGNED AND IMPLEMENTED AT ISI TO PRODUCE FORMAL, OPERATIONAL SPECIFICATIONS FOR PROGRAMS DESCRIBED IN NATURAL LANGUAGE. PARTICULAR, A (PARENTHESIZED) NATURAL LANGUAGE DESCRIPTION OF A PROGRAM IS GIVEN TO THE SYSTEM -- A DESCRIPTION WHICH RETAINS MOST SEMANTIC AMBIGUITIES OF NATURAL LANGUAGE, BUT WHICH AVOIDS ITS SYNTACTIC AMBIGUITIES. THE INPUT FIRST GOES THROUGH A "DOMAIN ACQUISITION" PHASE WHICH ACQUIRES DOMAIN KNOWLEDGE RELATING THE OBJECTS AND ACTIONS OF THE MODELLED WORLD. THE "PLANNING PHASE", DESCRIBED HEREIN, IS THEN USED TO STRUCTURE THE INPUT INTO A PROGRAM IN CONVENTIONAL TERMS. FINALLY, A PHASE CONCERNED WITH THE RESOLUTION OF FINE DETAILS -- ANAPHORIC REFERENCE, TYPE CONVERSION, AND SOME SEQUENTIAL STRUCTURE RESOLUTION -- IS USED TO PRODUCE THE FINAL PROGRAM. THE RESPECTIVE PHASES DEAL IN TURN WITH THE DATA AND OPERATION STRUCTURE, THE PROGRAM DEFINITION AND CONTROL STRUCTURE. AND THE PROGRAM VARIABLE AND PARAMETER STRUCTURE.

THE SAFE SYSTEM MAKES OPERATIONAL SPECIFICATIONS MORE PRECISE BY FILLING IN THOSE DETAILS THAT WERE SURPRESSED FROM THE SPECIFICATION BECAUSE THEY WERE DEEMED INFERABLE BY AN "INTELLIGENT PEADER". THESE SPECIFICATIONS MUST BE OPERATIONAL, SPECIFYING INFORMALLY AND AT A HIGH LEVEL, HOW SOMETHING IS TO BE DONE. NOT MERELY WHAT MUST BE ACHIEVED. THIS REQUIREMENT ENABLES THE CORRESPONDING FORMAL PROGRAM TO BE CONSTRUCTED WITHOUT ANY DEEP PROBLEM SOLVING ACTIVITY BY RESOLVING THE AMBIGUITIES CONTAINED OF PROGRAM WELL—FORMEDNESS RULES AND THE CONSTRAINTS OF THE APPLICATION DOMAIN. WHEN AN AMBIGUITY CANNOT BE RESOLVED BY THE SYSTEM, IT ASKS THE USER WHICH INTERPRETATION IS INTENDED. (A)

455 PROGRAMMING LANGUAGE

WIRTH, N. ON CERTAIN BASIC CONCEPTS OF PROGRAMMING LANGUAGES (TECHNICAL REPORT NO. CS 65). STANFORD, CALIFORNIA: STANFORD UNIVERSITY, COMPUTER SCIENCE DEPARTMENT, MAY 1967. (NTIS NO. PB 176767) DESCRIPTION:

The state of the s

RECENT DEVELOPMENT OF PROGRAMMING LANGUAGES HAVE LED TO THE EMERGENCE OF LANGUAGES WHOSE GROWTH SHOWED CANCEROUS SYMPTOMS: THE PROLIFERATION OF NEW ELEMENTS DEFIED EVERY CONTROL EXERCISED BY THE DESIGNERS, AND THE NATURE OF THE NEW CELLS OFTEN PROVED TO BE INCOMPATIBLE WITH THE EXISTING BODY. IN ORDER THAT A LANGUAGE BE FREE FROM SUCH SYMPTOMS, IT IS NECESSARY THAT IT BE BUILT UPON BASIC CONCEPTS WHICH ARE SOUND AND MUTUALLY INDEPENDENT. THE RULES GOVERNING THE LANGUAGE MUST BE SIMPLE, CENERALLY APPLICABLE, AND CONSISTENT.

IN PRACTICE, IT TURNS OUT THAT THERE EXISTS AN OPTIMUM IN THE NUMBER OF BASIC CONCEPTS, BELOW WHICH NOT ONLY IMPLEMENTABILITY OF THESE CONCEPTS ON ACTUAL COMPUTERS, BUT ALSO THEIR APPEAL TO HUMAN INTUITION BECOMES QUESTIONABLE BECAUSE OF THEIR HIGH DEGREE OF GENERALIZATION. THE FOLLOWING INFORMAL NOTES DO NOT ABOUND WITH READY-MADE SOLUTIONS, BUT IT IS HOPED THEY SHED SOME LIGHT ON SEVERAL RELATED SUBJECTS AND INSERENT DIFFICULTIES. THEY ARE INTENDED TO SUMMARIZE AND INTERRELATE VARIOUS IDEAS WHICH ARE PARTLY PRESENT IN EXISTING LANGUAGES AND PARTLY NEW. (A, ABBR.) 33P, 6R.

456 STEPWISE REFINEHENT

WIRTH, N., PROGRAM DEVELOPMENT BY STEPWISE REFINEMENT. COMMUNICATIONS OF THE ACM, 1971, 14, 221-227.

DESCRIPTION:

IVIA KONSTRUCCIO CONTRACTORISTICA CONTRA

THE CREATIVE ACTIVITY OF PROGRAMMING -- TO BE DISTINGUISHED FROM CODING -- IS USUALLY TAUGHT BY EXAMPLES SERVING TO EXHIBIT CERTAIN TECHNIQUES. IT IS HERE CONSIDERED AS A SEQUENCE OF DESIGN DECISIONS CONCERNING THE DECOMPOSITION OF TASKS INTO SUBTASKS AND OF DATA INTO DATA STRUCTURES. THE PROCESS OF SUCCESSIVE REFINEMENT OF SPECIFICATIONS IS ILLUSTRATED BY A SHORT, BUT NONTRIVIAL EXAMPLE, FROM WHICH A NUMBER OF CONCLUSIONS ARE DRAWN REGARDING THE ART AND THE INSTRUCTION OF PROGRAMMING. (A)

THE ART AND THE INSTRUCTION OF PROGRAMMING. (A)

THE EXAMPLE FOLLOWED THROUGH BY THIS ARTICLC ILLUSTRATES IN ITS OWN RIGHT
A NUMBER OF USEFUL TECHNIQUES IN PROBLEM SOLVING, SINCE THE EXAMPLE IS
A PUZZLE INVOLVING SEARCH THROUGH A LARGE SPACE. THE PROBLEM IS ONLY
PROGRAMMABLE WHEN A METHOD IS FOUND THAT NARROWS THE SPACE SUFFICIENTLY TO
GET ACCEPTABLE COMPUTER TIMES. (GDC)

457 SYSTEMATIC PROGRAMMING

WIRTH, N. SYSTEMATIC PROGRAMMING: AN INTRODUCTION. ENGLEWOOD CLIFFS, N. J.: PRENTICE-HALL, 1973.

DESCRIPTION:

THE PURPOSE OF 1 IS TEXT IS TO TEACH THE SYSTEMATIC CONSTRUCTION OF ALGORITHMS AS A FART OF A BASIC MATHEMATICAL TRAINING. IT DOFS THIS PRIMARILY THROUGH PROGRAMMING EXAMPLES. THE NOTIONS OF A TOP-DOWN APPROACH ARE ESPOUSED, USING STEPWISE REFINEMENT OF THE PROGRAM DESIGN. THE ORIENTATION OF THE BOOK IS NUMERICAL COMPUTATIONS, RATHER THAN LEXICAL, PROCESS CONTROL, COMMERCIAL TRANSACTION PROCESSING, AND SO FORTH. THE DEFINITION OF PASCAL IS GIVEN AND EXAMPLES IN THE BOOK USE BOTH PASCAL STATEMENTS AND FLOWCHARTS. (GDC)

458 STRUCTURED PROGRAMMING
WIRTH, N. ON THE COMPOSITION OF WELL STRUCTURED PROGRAMS. COMPUTING SURVEYS,
1974, 6, 247-259.
DESCRIPTION:

A PROFESSIONAL PROGRAMMER'S KNOW-HOW USED TO CONSIST OF THE MASTERY OF A SET OF TECHNIQUES APPLICABLE TO SPECIFIC PROBLEMS AND TO SOME SPECIFIC COMPUTER. WITH THE INCREASE OF COMPUTER POWER, THE PROGRAMMERS' TASKS GREW MORE COMPLEX, AND HENCE, THE NEED FOR A SYSTEMATIC APPROACH BECAME EVIDENT. RECENTLY, THE SUBJECT OF PROGRAMMING METHOUS, GENERALLY APPLICABLE RULES AND PATTERNS OF DEVELOPMENT, RECEIVED CONSIDERABLE ATTENTION. "STRUCTURED PROGRAMMING" IS THE FORMULATION OF PROGRAMS AS HIERARCHICAL, NESTED STRUCTURES OF STATEMENTS AND OBJECTS OF COMPUTATION. WE GIVE BRIEF EXAMPLES OF STRUCTURE: PROGRAMS, SHOW THE ESSENCE OF THIS APPROACH, DISCUSS ITS RELATIONSHIP WITH PROGRAM VERIFICATION, AND COMMENT ON THE ROLE OF STRUCTURED LANGUAGES. (A) 132, 13R.

464 SOFTWARE COSTS

WOLVERTON, R.W. THE COST OF DEVELOPING LARGE-SCALE SOFTWARE. IEEE
TRANSACTIONS ON COMPUTERS, 1974, C-23, 615-636.
DESCRIPTION:

THE WORK OF SOFTWARE COST FORECASTING FALLS INTO TWO PARTS. FIRST, WE MAKE WHAT WE CALL STRUCTURAL FORECASTS, AND THEN WE CALCULATE THE ABSOLUTE DOLLAR-VOLUME FORECASTS. STRUCTURAL FORECASTS DESCRIBE THE TECHNOLOGY AND FUNCTION OF A SOFTWARE PROJECT, BUT NOT ITS SIZE. WE ALLOCATE RESOURCES (COSTS) OVER THE PROJECT'S LIFE CYCLE FROM THE STRUCTURAL FORECASTS. JUDGMENT, TECHNICAL KNOWLEDGE, AND ECONOMETRIC RESEARCH SHOULD COMBINE IN MAKING THE STRUCTURAL FORECASTS. A METHODOLOGY BASED ON A 25 X 7 STRUCTURAL FORECAST MATRIX THAT HAS BEEN USED BY TRW WITH GOOD RESULTS OVER THE PAST FEW YEARS IS PRESENTED IN THIS PAPER. WITH THE STRUCTURAL FORECAST IN HAND, WE GO ON TO CALCULATE THE ABSOLUTE DOLLAR-VOLUME FORECASTS. THE GENERAL LOGIC FOLLOWED IN "ABSOLUTE" COST ESTIMATING CAN BE BASED ON EITHER A MENTAL PROCESS 03 AM EXPLICIT ALGORITHM. A COST ESTIMATING ALGORITHM IS PRESENTED AND FIVE TRADITIONAL METHODS OF SOFTWARE COST FORECASTING ARE DESCRIBED: TOP-DOWN ESTIMATING, SIMILARITIES AND DIFFERENCES ESTIMATING, STANDARDS ESTIMATING, AND BOTTON-UP ESTIMATING. ALL FORECASTING METHODS SUFFER FROM THE NEED FOR A VALID COST DATA BASE FOR MANY ESTIMATING SITUATIONS. SOFTWARE INFORMATION ELEMENTS THAT EXPERIENCE HAS SHOWN TO BE USEFUL IN ESTABL'SHING SUCH A DATA BASE ARE GIVEN IN THE BODY OF THE PAPER. MAJOR PRICING PITFALLS ARE IDENTIFIED. TWO CASE STUDIES ARE PRESENTED THAT ILLUSTRATE THE SOFTWAPE COST FORECASTING METHODOLOGY AND HISTORICAL RESULTS. TOPICS FOR FURTHER WORK AND STUDY ARE SUGGESTED. (A)

PAPER IS T
PROGRAM DEL
153P, 19R. A DETAILED LOOK IS TAKEN AT THE PROBLEM OF FACTORING PROGRAM PROOFS INTO A PROOF OF THE UNDERLYING ALGORITHM, FOLLOWED BY A PROO' OF CORRECT IMPLEMENTATION OF ABSTRACT VARIABLES AT THE CONCRETE LEVEL. WE DO THIS CONSIDERING FOUR DIFFERENT CONCRETE "MARKING" ALGORITHMS AND FORMULATING A SINGLE ABSTRACT ALGORITHM AND SET OF ABSTRACT SPECIFICATIONS THAT CAN BE INSTANTIATED TO EACH O. THE FOUR CONCRETE CASES. AN INTERMEDIATE ASSERTION, AS WELL AS SUFFICIENT CONDITIONS FOR CORRECT INITIALIZATION, INVAKIANCE, AND CORRECTNESS AT TERMINATION ARE GIVEN AT THE ABSTRACT LEVEL. PROOFS AT THE CONCRETE LEVEL ARE THEN GIVEN BY EXHIBITING APPROPRIATE MAPPING FUNCTIONS (FROM THE CONCRETE STATE VECTOR TO THE ABSTRACT VARIABLES), AND SHOWING THAT THE SUFFICIENT CONDITIONS ARE TRUE. PROOFS OF TERMINATION ARE GIVEN BY INSTANTIATING "TERMINATION SCHEMAS". (A)

PROGRAMMING PRACTICES YOHE, J.M. AN OVERVIEW OF PROGRAMMING PRACTICES. COMPUTING SURVEYS, 1974, 6,

THE PURPOSE OF THIS PAPER IS TO INDICATE SOMETHING OF THE NATURE OF "GOOD FROGRAMMING." IN THIS CONTEXT, PROGRAMMING IS TAKEN TO MEAN THE ENTIRE PROCESS OF COMMUNICATION BETWEEN HUMANS AND COMPUTERS. THE PROGRAMMING PROCESS IS SUBDIVIDED INTO NINE TASKS, AND AN ELEMENTARY DISCUSSION OF EACH OF THESE TASKS IS PRESENTED. ALTHOUGH THE PAPER IS PRIMARILY DIRECTED TO THE STUDENT OR NOVICE PROGRAMMER, MORE EXPERIENCED PEOPLE MAY FIND IT A WORTHWHILF AID IN CODIFYING OR REINFORCING THEIR EXPERIENCE.

YOUNGS, E.A. ERROR-PRONENESS IN PROGRAMMING (UNPUBLISHED DOCTORAL DISSERTATION TION, UNIVERSITY OF NORTH CAROLINA). 1970.

AN EXPERIMENT WAS CONDUCTED TO EXAMINE THE TYPES AND FREQUENCIES OF ERRORS MADE BY BEGINNING AND EXPERIENCED PROGRAMMERS USING COBOL, ALGOL, PL/1, FORTRAN, AND BASIC. SUGGESTIONS ARE MADE FOR IMPROVEMENTS IN PROGRAMMING LANGUAGES AND COMPILERS. PERHAPS THE MOST IMPORTANT CONTRIBUTION OF THIS PAPER IS TO SUGGEST TECHNIQUES AND CONCEPTS FOR THE QUANTITATIVE STUDY OF PROGRAM DEVELOPMENT. (MEA)
